# République d'Haiti

HISTORY. Haiti occupies the western third of the large island of Hispaniola which was discovered by Christopher Columbus in 1492. The Spanish colony was ceded to France in 1697 and became her most prosperous colony. After the extirpation of the Indians by the Spaniards (by 1533) large numbers of African slaves were imported whose descendants now populate the country. The slaves obtained their liberation following the French Revolution, but subsequently Napoleon sent his brother-in-law, Gen. Leclerc, to restore French authority and re-impose slavery. Toussaint Louverture, the leader of the slaves who had been appointed a French general and governor, was kidnapped and sent to France, where he died in gaol. However, the reckless courage of the Negro troops and the ravages of yellow fever forced the French to evacuate the island and surrender to the blockading British squadron.

The country declared its independence on 1 Jan 1804, and its successful leader, Gen Jean-Jacques Dessalines, proclaimed himself Emperor of the newly-named Haiti After the assassination of Dessalines (1806) a separate régime was set up in the north under Henri Christophe, a Negro general who in 1811 had himself proclaimed King Henry. In the south and west a republic was constituted, with the mulatto Alexander Pétion as its first President Pétion died in 1818 and was succeeded by Jean-Pierre Boyer, under whom the country became re-united after Henry had committed suicide in 1820 From 1822 to 1844 Haiti and the eastern part of the island (later the Dominican Republic) were united After one more monarchical interlude, under the Emperor Faustin (1847–59), Haiti has been a republic. From 1915 to 1934 Haiti was under United States occupation

Following a military *coup* in 1950, and subsequent uprisings, Dr François Duvalier was elected President on 22 Oct 1957 and subsequently became President for Life in 1964. He died on 21 April 1971 and was succeeded as president for life by his son, Jean-Claude Duvalier who fled the country on 7 Feb. 1986.

AREA AND POPULATION. The area is 27,750 sq. km (10,700 sq. miles), of which about three-quarters is mountainous. The population at the census in 1982 was 5,053,792 of which 21% urban and 48.5% male. Estimate (1985) 5,272,000. The areas and populations of the 5 départements are as follows.

**DEFENCE.** The Haitian Defence Force (Forces Armées d'Haiti) totalling about 7,500 men, was divided into Army, Navy, and Air Force The President is Commander-in-Chief and appoints the officers

Army. Total strength, about 6,400, organized into 9 Military Departments and the 'Leopards'. Three of the Departments are in Port-au-Prince and consist of the Presidential Guard (4 Companies), the Dessalines Barracks (7 Companies including the Dessalines Battalion and Headquarters troops), and the Port-au-Prince Police (6 Companies in blue uniforms). The other 6 Military Departments are located outside Port-au-Prince; their troops (21 Companies) operate as District Police. The Fire Brigade and the Prison Guard Company are also part of the Armed Forces. Only the Presidential Guard, the Dessalines Battalion and the Leopards (2 companies of 'Commandos' or Special Forces) with a third company of about 200 recruits, now in training, have any potential for tactical military operations. They are armed mainly with light infantry weapons but have a few elderly pieces of light artillery, 9 light tanks and 6 V-150 commando vehicles.

Navy. The Navy/coastguard of 45 officers and 280 men has 1 ex-US armed tug, and 13 coastal patrol boats. The base is at Port-au-Prince.

Air Force. Personnel strength is about 200, with about 25 aircraft of some 12 varieties. They include 7 Summit/Cessna O2-337 Sentry twin piston-engined counter-insurgency aircraft, 1 DC-3, 6 light transports, 7 training and liaison aircraft, including 4 newly-delivered S.211 jet trainers, and 4 Sikorsky helicopters.

Militia. There was in addition a volunteer civilian force, the Volontaires de la Sécurité Nationale, about half of whom had access to antiquated rifles. This force,

formerly of some importance as François Duvalier's 'private army' of tough, devoted followers (sometimes called Tontons Macoute or Bogeymen) was finally disbanded in Feb 1986

## INTERNATIONAL RELATIONS

Banking. Banque Nationale de Credit, owned by the State, was established 21 Oct 1910 with a capital of US\$5m., and has a monopoly of the note issue. US dollars may be included in the minimum required reserves. The Royal Bank of Canada, the Citibank, the Bank of Nova Scotia, the Bank of Boston, the Banque de l'Union Haitienne (mainly local capital with participation from American, Canadian and Dominican Republic Banks), Banque Nationale de Paris and Banque Nationale de République d'Haiti (the central bank) all have branches in Port-au-Prince

Weights and Measures. The metric system is officially accepted

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1980) 315m kwh

Minerals. Copper exists but is at present uneconomic to exploit Haiti may possess undeveloped mineral resources of oil, gold, silver, antimony, sulphur, coal and lignite, nickel, gypsum and porphyry.

Agriculture. Only one-third of the country is arable and most people own the tiny plots they farm, the resulting pressure of population is the main cause of rural poverty Number of farms is estimated at over 500,000

The occupations of Haiti are nine-tenths agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres lirigation is used in some areas. Haiti's most important product is coffee of good quality, classified as 'mild', and grown by peasants. Production in 1984 totalled about 38,000 tonnes. Second most important crop is sugar. Sisal is grown extensively. Much of the fibre is exported as or for cordage. New types of cotton are being tried with success. New varieties of rice should significantly boost future production, especially in the Artibonite Valley. Output of main crops in 1984 (in 1,000 tonnes) was: Sugar, 3,000, mangoes, 340, plantains, 315, sweet potatoes, 350; cassava, 265, bananas, 235, maize, 186, sorghum, 123; rice, 124, sisal, 11, cotton, 5; cocoa, 3

Rum and other spirits are distilled. Essential oils from vetiver, neroli and amyris are important Cattle and horse breeding are encouraged

Livestock (1984), Cattle, 1 35m, sheep, 92,000, goats, 1 1m., horses, 425,000, poultry, 8m

Fisheries. Production (1984) 5.000 tonnes.

#### INDUSTRY AND TRADE

Industry. Light manufacturing industries assembling or finishing goods for reexport constitute the fastest growing sector. Soap factories produce laundry soap, toilet soap and detergent. A cement factory located near the capital produced 243,000 tonnes in 1980. A steel plant making rods, beams and angles was opened in 1974. There are also a pharmaceutical plant, a tannery, a plastics plant, 2 paint

works, 5 shoe factories, a large factory producing enamel cookingware, 2 pastamaking factories, a tomato cannery and a flour-mill, all located in or near Port-au-Prince.

Labour. Trade unions were recognized in Feb. 1946. Strong government influence is exercised over the insignificant portion of the labour force that is unionized and organized labour has virtually no strength in Haiti.

Commerce. In 1984 exports were US\$250m and imports, US\$365m.

The leading imports are foodstuffs, textiles, machinery, mineral oils, raw materials for transformation industries and vehicles.

Total trade between Haiti and UK (British Department of Trade returns, in £1,000 sterling)

	1981	1982	1983	1984	1985
Imports to UK	1,439	2,615	1,646	1,402	1,512
Exports and re-exports from UK	2,541	3,704	4.171	3.736	5.048

Tourism. In 1984, 90,000 tourists visited Haiti.

#### **COMMUNICATIONS**

Roads. Total length of roads is some 4,000 km, little of which is practicable in ordinary motors in the rainy season. There were (1984) about 50,000 vehicles in Haiti

Railways. The only railway is owned by the Haitian American Sugar Company.

Aviation. An airport capable of handling jets was opened at Port-au-Prince in 1965 US and French carriers provide daily direct services to New York, Miami, Jamaica, Puerto Rico and the French Antilles. There are also services to the Dominican Republic and the Netherlands Antilles. A Haitian company provides a cargo service to the US and Puerto Rico. Air services connecting Port-au-Prince with other Haitian towns are operated by Haiti Air Inter.

Shipping. US, French, Federal Republic of Germany, Dutch, British, Canadian and Japanese lines connect Haiti with the US, Latin America (except Cuba), Canada, Jamaica, Europe and the Far East

Post and Broadcasting. Most principal towns are connected by the government telegraph system, telephones and wireless.

The telephone company, of which the Haitian Government is now the majority stockholder, is in process of being modernized. Telephone subscribers totalled 34.000 in 1984.

In 1982 there were 105,000 radio and 65,000 television receivers

Cinemas (1984) There were 10 cinemas in Port-au-Prince.

Newspapers (1984) There were 6 daily newspapers in Port-au-Prince, also a monthly in English and I weekly newspaper in Cap Haitien.

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Judges, both of the lower courts and the court of appeal, are appointed by the President The legal system is basically French. The divorce law has recently been amended to permit parties to obtain 'quick and painless' divorces at a moderate cost, in the hope of attracting the US trade, now that the Mexican 'divorce mills' have closed down. This has developed a useful flow of dollar revenue.

Police The Police number about 1,200 in Port-au-Prince and are part of the armed forces

Religion. Since the Concordat of 1860, the official religion is Roman Catholicism, under an archbishop with 5 suffragan bishops. There are still quite a number of foreigners, French and French Canadians mainly, among the clergy but the first Haitian archbishop took office in 1966. The Episcopal Church now has its

first Haitian bishop who was consecrated in 1971. Other Christian churches number perhaps 10% of the population. The folk religion is Voodoo.

Education. Education is divided into primary (first 6 years), secondary (the next 7 years) and finally superior or university. The school system is modelled on that of France. The law calls for free and compulsory elementary education in the French language.

For the 1973–74 academic year, urban primary schools numbered 360 (221 lay and 139 religious) attended by 127,330 pupils with 3,532 teachers. There were, for the same period, at the secondary level, 21 public secondary lycées with 15,760 students (4,163 of them girls), 563 teachers (39 of them women) In the private secondary sector, 129 schools were reported with 35,414 students (16,398 girls), 1,172 teachers (107 women) Professional education is divided into 3 categories (a) 41 pre-vocational schools, (b) 18 vocational schools which prepare trained workers, and (c) 5 vocational schools preparing technicians There are also 10 licensed private commercial schools. The total number of students was 13,000, 2,000 of whom were in the private sector.

Higher education is offered at the University of Haiti

Health. There were, in 1972, 332 doctors and 104 dentists in practice, 44 hospitals, and 196 health centres and rural clinics. The hospitals had 3,329 beds, of which 776 were in private and charitable establishments.

Tegucigalpa, the capital, is not served by any railway, and there are no international railway connexions. The total railways operating in 1983 were 1,004 km of 1,067 mm and 914 mm gauge

Aviation. Over a large part of the country the aeroplane is the normal means of transport for both passengers and freight. There are international airports at Tegucigalpa, San Pedro Sula, La Ceiba and over 30 smaller airstrips in various parts of the country.

Shipping. Sailings to the Atlantic coast port of Puerto Cortés from Europe are frequent, mainly operated by the Harrison Line, Cia Generale Transatlantique, the Royal Netherlands Steamships Co., Hapag Lloyd and vessels owned or chartered by the Tela Railroad Co., a subsidiary of United Brands, and the Standard Fruit Co

Post and Broadcasting. The Government in April 1972 operated 18,845 km of telephone lines and 12,526 km of telegraph lines. Number of telephones in use, 1984, 37,278, telephone exchanges, 56, number of telegraph offices, 262, combined telephone and telegraph offices, 184, radio stations, 187, commercial television channels, 4. There were (1979) about 27,000 receivers in use. Transmission in colour commenced mid-1973.

Cinemas (1982). Cinemas numbered about 60 with seating capacity of some 60,000.

Newspapers (1984). The 4 most important daily papers are *El Heraldo* and *La Tribuna* in Tegucigalpa, *La Prensa* and *El Tiempo* in San Pedro Sula Several others exist but their circulation is low and their influence is very limited.

# JUSTICE, RELIGION, FDUCATION AND WELFARE

Justice. The judicial power resides in the Supreme Court, with 7 judges elected by the National Constituent Assembly in 1980 for 6 years; it appoints the judges of the courts of appeal, labour tribunals and the district attorneys who, in turn, name the justices of the peace.

Religion. Roman Catholicism is the prevailing religion, but the constitution guarantees freedom to all creeds, and the State does not contribute to the support of any.

Education. Instruction is free, compulsory (from 7 to 15 years of age) and secular. In 1983 the 6,422 primary schools had 704,612 children (19,300 teachers); the 354 secondary, normal and technical schools had 129,606 pupils (5,916 teachers); the teachers' college had 2,604 students in 1981 (168 teachers). In 1982, the three universities had a total of 29,261 students and 1,825 teachers; one teachers' training college with 5,841 students.

The illiteracy rate was 40% of those 10 years of age and older in 1983.

Health. In 1981 there were about 1,370 doctors. In 1985 there were 46 hospitals (25 private) with 5,220 beds, and 571 health centres

Hong Kong Island and the southern tip of the Kowloon peninsula were ceded by China to Britain after the first and second Anglo-Chinese Wars respectively by the Treaty of Nanking 1842 and the Convention of Peking 1860 Northern Kowloon was leased to Britain for 99 years by China in 1898 Since then, Hong Kong has been under British administration, except from Dec. 1941 to Aug 1945 during the Japanese occupation Talks began in Sept. 1982 between Britain and China over the future of Hong Kong after the lease expiry in 1997 On 19 Dec 1984, the two countries signed a joint declaration whereby China would recover sovereignty over Hong Kong (including Hong Kong Island, Kowloon and the New Territories) from 1 July 1997 and establish it as a Special Administrative Region where the existing social and economic systems, and the present life-style, would remain unchanged for another 50 years.

AREA AND POPULATION. Hong Kong island is 32 km east of the mouth of the Pearl River and 130 km south-east of Canton The area of the island is 78 64 sq km It is separated from the mainland by a fine natural harbour. On the opposite side is the peninsula of Kowloon (11 31 sq km), which was added to the Territory by the Convention of Peking, 1860. By a further convention, signed at Peking on 9 June 1898, about 975 sq km, consisting of all the immediately adjacent mainland and numerous islands in the vicinity, were leased to Great Britain by China for 99 years. This area is known as the New Territories. Total area of the territory is 1,067 65 sq km (including recent reclamations), a large part of it being steep and unproductive hillside Some 38% of the territory is conserved as country parks Shortage of land suitable for development for housing and industry, is a serious problem Since 1945, the Government has reclaimed about 1,940 hectares from the sea, principally from the seafronts of Hong Kong and Kowloon, facing the harbour In the New Territories, the new town of Tsuen Wan, incorporating Tsuen Wan, Kwai Chung and Tsing Yi, already houses 700,000 of its planned ultimate population of 890,000 The construction of 6 further new towns at Sha Tin, Tuen Mun, Tai Po, Fanling, Yuen Long and Junk Bay is now well underway, with designed population capacities of 800,000, 490,000, 300,000, 226,000, 150,000 and 380,000 respectively

The population was 5,109,812 at 1981 census Estimate (end-1984) 5,397,500 During the war years the population of Hong Kong fluctuated sharply In Sept 1945, at the end of the Japanese occupation, it was about 600,000 In mid-1950 it was estimated at 2 24m. Since 1974 the average annual growth rate has been 2 1% Of the present population about 24% are under 15 years of age About 57% of the population was born in Hong Kong

CLIMATE. The climate is warm sub-tropical being much affected by monsoons, the winter being cool and dry and the summer hot and humid, May to Sept. being the wettest months Jan 60°F (15 6°C), July 83°F (28 3°C) Annual rainfall 85" (2,162 mm)

CONSTITUTION AND GOVERNMENT. The administration is in the hands of a Governor, aided by an Executive Council, composed of the Chief Secretary, the Commander, British Forces, the Financial Secretary, the Attorney-General (who are members ex officio) and such other members, both official and unofficial, as may be appointed by the Queen upon the Governor's nomination In July 1985 there were, in addition to the 4 ex-officio members, 3 nominated officials and 9 appointed unofficial members. There is also a Legislative Council, presided over by the Governor From Oct 1985 it consisted of 3 ex-officio members, namely the Chief Secretary, the Financial Secretary, the Attorney-General, 7

official members, 22 appointed unofficial members and 24 elected unofficial members. Chinese and English are the official languages. District boards with elected members were set up in 1982 in the 19 administrative districts of Hong Kong. They have mainly an advisory role to perform and have a substantial influence over district affairs.

**DEFENCE.** The Hong Kong garrison, under the Commander British Forces, comprises units of all three services. Its principal rôle is to assist the Hong Kong Government in maintaining security and stability

Army. The Army constitutes the bulk of the garrison. It comprises a UK battalion, based at Stanley Fort, and 4 Gurkha infantry battalions, one based at Lyemun, the other 3 in the New Territories; supporting units include the Queen's Gurkha Engineers, the Queen's Gurkha Signals, the Gurkha Transport Regiment, and 660 Squadron Army Air Corps

Navy. The Naval Base is at HMS Tamar. The Hong Kong Squadron comprising five patrol craft, converted Ton-class old wooden minesweepers were replaced in 1984 and 1985 by five new larger, faster and better-armed patrol vessels of the Peacock' class specially designed for the purpose (HMS Peacock and HMS Plower were the first, joined by Starling, Swallow and Swift) all built by Hall Russell, Aberdeen, Scotland.

Air Force. The Royal Air Force is based at Shek Kong. No 28 (Army Cooperation) Squadron operates 8 Wessex helicopters. In addition to its operational rôle in support of the army and navy, the RAF carries out search and rescue and medical evacuation tasks It is also responsible for air traffic control services at Shek Kong, and provides a territory-wide air traffic advisory service.

Auxiliary Forces. The local auxiliary defence units, consisting of the Royal Hong Kong Regiment and the Royal Hong Kong Auxiliary Air Force, are administered by the Hong Kong Government, but, if called out, would come under the command of the Commander British Forces. The Royal Hong Kong Regiment (The Volunteers) has a strength of about 950 It is fully mobile and its rôle is to operate in support of regular army battalions stationed in Hong Kong. The Royal Hong Kong Auxiliary Air Force is intended mainly for internal security and air-sea rescue duties. It has a strength of about 131, operating a fleet of seven aircraft – a twinengined Britten-Norman Islander, a twin-engined Cessna 404 Titan Courier, two Scottish Aviation Bulldog Trainers and three Aérospatiale Dauphin 365C1 helicopters

#### **ECONOMY**

**Budget.** The public revenue and expenditure for financial years ending 31 March were as follows (in HK\$)

Revenue Expenditure	1981-82 34,312,900,000 27,778,200,000	1982-83 31,097,600,000 34,597,800,000	1983-84 30,399,700,000 33,393,100,000	1984-85 36,343,000,000 36,902,000,000
-		1 Estimate		

The revenue is derived chiefly from rates, licences, duties on liquor, tobacco, hydrocarbon oils, methyl alcohol, non-alcoholic beverages and cosmetics a tax on earnings and profits, land sales and various duties.

Currency. The unit of currency is the Hong Kong dollar. Banknotes (of denominations of \$10 upwards) are issued by the Hongkong and Shanghai Banking Corporation, and the Standard Chartered Bank. Their combined note and coin issue was, at 30 May 1985, HK\$15,956m. Subsidiary currency consisting of HK\$5, HK\$2,

HK\$1, 50-cent, 20-cent, 10-cent, 5-cent copper-nickel-alloy coins and 1-cent notes is issued by the Hong Kong Government and at 30 May 1985 totalled HK\$1,433m

Since Oct 1983 the HK\$ has been linked to the US\$1 at a fixed exchange rate of US\$1 = HK\$7 80 In March 1986, £1 = HK\$11 20

Since 1975, the Hong Kong Government has issued annually a limited quantity of HK\$1,000 gold coins. The first in the series was issued to commemorate the Queen's visit to Hong Kong in 1975. Gold coins have since been minted to mark the Chinese Lunar Years of the Dragon, the Snake, the Horse, the Goat, the Monkey, the Cockerel, the Dog, the Pig, the Rat and the Ox

**Banking.** There are 140 licensed banks and 96 of them are foreign-incorporated Deposits at 30 May 1985 totalled HK\$323,902m

Weights and Measures. Metric, British Imperial, Chinese and US units are all in current use in Hong Kong However Government Departments have now effectively adopted metric units, all new legislation uses metric terminology and existing legislation is being progressively metricated. Metrication is also proceeding in the private sector.

The statutory equivalent for the *chek* is 14 5/8 inches. The variation of the size of the *chek* with usage still persists in Hong Kong but the *chek* and derived units are now used much less than in the past

AGRICULTURE. In 1984, 159,000 tonnes of vegetables were produced. Livestock (1984) Cattle, 540, pigs, 560,000, poultry, 52,000 tonnes.

WATER. The provision of sufficient reservoir capacity to store the summer rainfall in order to meet supply requirements has always been a serious problem. Over the years no less than 17 impounding reservoirs have been constructed with a total capacity of 586m. cu. metres. The major among these are the Plover Cove Reservoir (230m cu. metres) finally completed in 1973 and the High Island Reservoir (280m cu metres) completed in 1978, both involving the conversion of sea water inlets into fresh water lakes.

There are no sites remaining in Hong Kong suitable for development as storage reservoirs. Consequently the purchase of water from China has been of increasing importance and the future needs of Hong Kong will be met to a large extent from this source. In 1984 water purchased from China was in the order of 290m cu metres which represents about 45% of Hong Kong's demand. The agreement with China allows for annual increases up to a total figure of 620m. cu metres per annum by 1994–95 which will represent around 60% of Hong Kong's demand at that time.

These resources can be further supplemented when necessary by up to 181,000 cu. metres of fresh water a day from a desalting plant completed in 1976 and now considered as a reserve resource

#### INDUSTRY AND TRADE

Industry. An economic policy based on free enterprise and free trade, an industrious work force; an efficient and aggressive commercial infrastructure; modern and efficient sea-port (including container shipping terminals) and airport facilities: its geographical position relative to markets in North America and its traditional trading links with Britain have all contributed to Hong Kong's success as a modern industrial complex

In Dec. 1984, there were 48,038 factories employing 898,947 people out of a total population of approximately 5 4m. The type of factory involved ranges from the small cottage type to large highly complex modern establishments. Given the scarcity of land it is most common for light industry to operate in multi-storey buildings specially designed for this purpose. The main industry is textiles and clothing, which employed 60% of the total industrial workforce and accounted for 40% of total domestic exports in 1984. Other major light manufacturing industries

include electronic products, clocks and watches, toys, plastic products, metalware, footwear, cameras and travel goods. Heavy industry includes ship-building, ship-repairing, aircraft engineering and the manufacture of machinery Agriculture, fishing and some mining are the main primary industries.

Commerce. Hong Kong's industries are mainly export oriented. The total value of domestic exports in 1984 was HK\$137,936m. The major markets were USA (44 5%), China (8.2%), UK (7 6%), Federal Republic of Germany (6 9%), Japan (3 7%) and Canada (3 2%). There is also a sizeable and flourishing entrepôt trade which accounted for another HK\$83,504m. in 1984.

The total value of imports in 1984 was HK\$223,370m., mainly from China (25%), Japan (23%), USA (10 9%), Taiwan (7 7%), Singapore (5 4%) and UK (3 9%)

The chief import items were manufactured goods (28 5%), machinery and transport equipment (25 8%), foodstuffs (9%), chemicals (6 9%), mineral fuel, lubricants and related materials (5 5%).

Duties are levied only on tobacco, hydrocarbon oils, methyl alcohol and alcoholic liquors, whether imported into or manufactured in Hong Kong for local consumption.

All imports (apart from foodstuffs, which are subject to a flat declaration charge irrespective of the value of the consignment) and exports are subject to an *advalorem* declaration charge at the rate of HK50 cents for every \$1,000 value (or part thereof) of the goods shipped

The adverse balance on visible trade is offset by a favourable balance from exchange, shipping and insurance transactions, an inflow of capital, ship-repairing, a flourishing tourist industry, etc.

Hong Kong has a free exchange market Foreign merchants may remit profits or repatriate capital. Import and export controls are kept to the minimum, consistent with strategic requirements

Total trade between Hong Kong and UK (British Department of Trade returns, in £1,000 sterling) is given as follows

	1981	1982	1983	! 984	1985
Imports to UK	898,634	872,545	1,178,343	1,266,965	1,175,984
Exports and re-exports from UK	618,525	732,489	726,711	897,419	949,180

Tourism. 3,151,672 tourists spent HK\$14,030m in Hong Kong during 1984

#### COMMUNICATIONS

Roads. In June 1985 there were 1,287 km of roads, distributed as follows Hong Kong Island, 376 3; Kowloon and New Kowloon, 350 7, and New Territories, 560 A cross-harbour tunnel, 1 8 km in length, opened to traffic in Aug 1972, now links Hong Kong Island with the Kowloon peninsula. The 1 4 km twin-tube Lion Rock Tunnel, which links Kowloon with Sha Tin New Town and other areas of the north-eastern New Territories, became fully operational in Oct. 1978. The 1 8 km twin-tube Aberdeen Tunnel, which connects Aberdeen and Wanchai, became operational in March 1983. A 34 km Light Railway Transit System is scheduled for 1988 and will connect Tuen Mun and Yuen Long in the New Territories.

Railways. There is an electric tramway with a total track length of 30 4 km, and a cable tramway connecting the Peak district with the lower levels in Victoria. The Kowloon-Canton Railway runs for 34 km from the terminus at Hung Hom in Kowloon to the border point at Lo Wu. On 4 April 1979 a direct 'through' passenger train to Guangzhou (Canton) was re-introduced after a lapse of nearly 30 years. A second express train came into operation on 11 Feb. 1980 and a third train was introduced in July 1984. The trains are invariably full and cater mainly for the business and tourist communities as well as Hong Kong residents visiting friends and relatives in China. There are also other passenger services to Lo Wu to allow for connexions to be made for onward trains at the Shenzhen border point (Chinese section). Mail and freight are conveyed across the border without transhipment.

The railway completed its five-year, HK\$3,500m. modernization and electrification project in July 1983. All existing stations were rebuilt and three new stations

were constructed for Tai Wai, Fo Tan and Kowloon Tong. The Kowloon Tong Station is designed as an interchange with the underground Mass Transit Railway.

The status of the Kowloon-Canton Railway changed from a government department to a public corporation on 1 Jan. 1983. The decision was taken in view of the major development of the KCR into a much expanded and more sophisticated railway.

An underground Mass Transit Railway system, comprising 36 stations, is now in operation. The system consists of three lines, one linking the Central District of Hong Kong Island with Tsuen Wan in the west of Kowloon, the second linking Kwun Tong in East Kowloon with Waterloo in Nathan Road and the third linking Admiralty and Chai Wan on Hong Kong Island. Cross platform interchange facilities are provided at Prince Edward, Argyle and Admiralty stations for passengers travelling between the three lines. The system is about 38 5 km in length

Work began at the end of 1981 on the Island Line, which will serve the northern foreshore of Hong Kong Island. Scheduled to be fully operational in mid-1986, the

new line will run for 12.5 km and add 12 new stations to the system.

Aviation. Hong Kong International Airport is situated on the north shore of Kowloon Bay. It is regularly used by over 30 airlines and many charter airlines which provide frequent services throughout the Far East to Europe, North America, Africa, the Middle East, Australia and New Zealand. British Airways operates 10 passenger and cargo services per week, to UK, Africa and many Asian countries. Cathay Pacific Airways, the Hong Kong-based airline, operates 433 passenger and cargo services to the UK, Europe, the Far and Middle East, Australasia and Canada weekly. During 1980, British Caledonian Airways also commenced scheduled services on the Hong Kong to London route. About 1,000 scheduled services are operated weekly to and from Hong Kong by various airlines. In 1984, 57,016 aircraft arrived and departed on international flights, carrying 9.5m. passengers and 419,000 tonnes of freight.

Shipping. The port of Hong Kong, which ranks among the top three container ports in the world, handled 2·1 m. twenty-foot equivalent units in 1984. The Kwai Chung Container Port has six berths with more than 2,300 metres of quay backed by about 88 hectares of cargo handling area. In 1984, some 23,786 ocean-going vessels called at Hong Kong and loaded and discharged more than 41.5 m tonnes of cargo. This included 32 m. tonnes of general goods, 54% of which was containerized cargo.

Telecommunications, Post and Broadcasting. There were 99 post offices in 1984, postal revenue totalled HK\$751 6m.; expenditure, HK\$525·1m., 519m. letters and parcels were handled. Telephone services are provided by the Hong Kong Telephone Co. Ltd. It operates through a network of 66 fully automatic main exchanges and served (1984) over 2m. subscribers. Cable and Wireless (Hong Kong) Ltd, which is owned jointly by Cable and Wireless PLC and the Hong Kong Government, provides the international telecommunication services as well as local telegram and telex services. These include public telegram, telex, telephone, television programmes transmission and reception, leased circuits, facsimile, switched data, ship-shore and air-ground communications. International facilities are provided through submarine cables, microwave, tropospheric scatter and satellite radio systems.

There is a government broadcasting station, Radio Television Hong Kong, with daily transmissions in English and Chinese. A commercial station, the Commercial Broadcasting Co. Ltd, transmits daily in English and Cantonese. Two radio stations operate 8 channels with 4 providing 24-hour service.

Television Broadcasts Ltd and Asia Television Ltd transmit commercial television in English and Chinese on 4 channels, in colour.

Cinemas. In Oct. 1985 there were 102 cinemas with a seating capacity of about 110,000.

HISTORY. Hungary first became an independent kingdom in 1001 For events in Hungary since 1918 see The Statesman's Year-Book, 1945, pp. 1006-7, and 1957, p 1096.

On 23 Oct. 1956 an anti-Stalinist revolution broke out, and the newly formed coalition government of Imre Nagy on 1 Nov withdrew from the Warsaw Pact and asked the UN for protection. János Kádár, formed a counter-government on 3 Nov. and asked the USSR for support

Russian troops suppressed the revolution and abducted Nagy and his Ministers, who were later secretly executed

On 7 Sept 1967 the Soviet-Hungarian treaty of friendship was renewed for 20 years

In 1978 the crown of St Stephen, the symbol of Hungarian nationhood, which had been in US hands since 1945, was returned to Hungary

AREA AND POPULATION. Hungary is bounded north by Czechoslovakia, north-east by the USSR, east by Romania, south by Yugoslavia and west by Austria The peace treaty of 10 Feb 1947 restored the frontiers as of 1 Jan. 1938 The area of Hungary is 93,032 sq km (35,911 sq miles).

CONSTITUTION AND GOVERNMENT. On 1 Feb. 1946 the National

Assembly proclaimed a republic

The present People's Republic was established by a constitution adopted on 18 Aug. 1949. Supreme power is vested in Parliament Parliament elects a Presidential Council, which exercises the functions of Parliament between sessions. It can dissolve government bodies and annul legislation. The 1949 Constitution was amended in 1972. The distinction between 'working people' and 'citizens' disappears. Citizens are stated to have both indirect (through elected representatives) and direct (through local and enterprise councils) democratic rights. State and co-operative property are recognized as co-existing with equal status. Personal property is 'recognized and protected' up to the limit set by law (this includes for private artisans and, since 1 Jan. 1982, for various classes of small companies and 'economic working groups', places of business and machinery)

Ethnic minorities have equal rights and education in their own tongue.

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The administration of justice is the responsibility of the Procurator-General, who is elected by Parliament for a term of 6 years. Civil and criminal cases fall under the jurisdiction of the district courts, county courts and the Supreme Court in Budapest. Criminal proceedings are dealt with by district courts through 3-member councils and by county court and the Supreme Court in 5-member councils. A new Civil Code was adopted in 1978 and a new Criminal Code in 1979.

District Courts act only as courts of first instance, county courts as either courts of first instance or of appeal. The Supreme Court acts normally as an appeal court, but may act as a court of first instance in cases submitted to it by the Public Prosecutor. All courts, when acting as courts of first instance, consist of 1 professional judge and 2 lay assessors, and, as courts of appeal, of 3 professional judges. Local government Executive Committees may try petty offences.

HISTORY. The first settlers came to Iceland in 874 Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognized the rule of the King of Norway. In 1381 Iceland, together with Norway, came under the rule of the Danish kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since 1 Dec. 1918 it has been acknowledged as a sovereign state. It was united with Denmark only through the common sovereign until it was proclaimed an independent republic on 17 June 1944

(the Kolbeinsey) to 63° 17′ N (Surtsey, one of the Westman Islands) It stretches from 13° 30′ (the Gerpir) to 24° 32′ W long (Látrabjarg) The skerry Hvalbakur (The Whaleback) lies 13° 16′ W. long.

CONSTITUTION AND GOVERNMENT. On 24 May 1944 the people of Iceland decided in a referendum to sever all ties with the Danish Crown. The voters were asked whether they were in favour of the abrogation of the Union Act, and whether they approved of the bill for a republican constitution: 70,725 voters were for severance of all political ties with Denmark and only 370 against it, 69,048 were in favour of the republican constitution, 1,042 against it and 2,505 votes were invalid. On 17 June 1944 the republic was formally proclaimed, and as the republic's first president the Alþingi elected Sveinn Bjornsson for a 1-year term (re-elected 1945 and 1949; died 25 Jan. 1952) The President is now elected for a 4-year term.

President of the Republic of Iceland Vigdís Finnbogadóttir (elected 29 June 1980, with 43,611 out of 129,049 valid votes, inaugurated 1 Aug. 1980); re-elected unopposed in 1984.

National flag. Blue with a red white-bordered Scandinavian cross.

National anthem O Guð vors lands (words by M. Jochumsson, 1874, tune by S Sveinbjørnsson).

The official language is Icelandic (islenska)

The Alþingi (Parliament) is divided into two Houses, the Upper House and the Lower House. The former is composed of one-third of the members elected by the whole Alþingi in common sitting. The remaining two-thirds of the members form the Lower House. The members of the Alþingi receive payment for their services.

The budget bills must be laid before the two Houses in joint session, but all other bills can be introduced in either of the Houses. If the Houses do not agree, they assemble in a common sitting and the final decision is given by a majority of two-thirds of the voters, with the exception of budget bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can vote only in the House of which they are members.

The electoral law enacted in 1959 provides for an Albingi of 60 members. Of these, 49 are elected in 8 constituencies by proportional representation, the remaining 11 are apportioned to the parties according to their total vote.

At the elections held on 23 April 1983 the following parties were returned Independence Party, 23; Progressives, 14; People's Alliance, 10, Social Democratic, 6, Social Democratic Alliance, 4, Women's Alliance, 3

The executive power is exercised under the President by the Cabinet. The coalition Cabinet, as constituted in Jan 1986, was as follows.

Prime Minister Steingrimur Hermannsson (Progress)

Foreign Affairs Matthias A. Mathiesen (Ind.) Finance Thorsteinn Palsson (Ind.). Social Affairs: Alexander Stefansson (Progress). Fisheries Halldór Ásgrímsson (Progress). Agriculture, Justice and Church Jón Helgason (Progress) Health and Social Security, Communications Ragnhildur Helgadóttir (Ind.). Commerce Matthías Bjarnason (Ind.). Education Sverrir Hermannsson (Ind.). Energy and Industry Albert Grudmundsson (Ind.)

The ministers take responsibility for their acts. They can be impeached by the Alþingi, and in that case their cause will be decided by the *Landsdómur*, a special tribunal for parliamentary impeachments.

Local Administration liceland is divided into 223 communes, of which 23 have the status of towns, while the 200 remaining communes make up 23 counties (syslur). The commune and county councils are elected by universal suffrage (men and women 20 years of age and over), in town and other urban communes by proportional representation, but in rural communes by simple majority. The county councils consist of one representative for each of the constituent communes, their purpose being the superintendence of local government within the county. Town councils and county councils come under the supervision of the Ministry of Social Affairs. For national government there are 27 divisions, consisting of towns and counties, single or combined, with the exception of Keslavik Airport. In the capital the different branches of national government are independent (courts, police,

customs), while in other national government divisions they are the charge of one official, who, in the case of counties, presides over the county council as well.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The lower courts of justice are those of the provincial magistrates (sýslumenn) and town judges (bæjarfógetar). From these there is an appeal to the Supreme Court (hæstiréttur) in Reykjavík, which has 8 judges.

Religion. The national church, and the only one endowed by the State, is Evangelical Lutheran But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national church are under the superintendence of a bishop. In 1984, 4,589 persons (1.9%) were Dissenters and 3,016 persons (1.3%) did not belong to any religious community.

Education, Compulsory education for children began in 1907, and a university was

founded in Reykjavík in 1911. There is in Reykjavík a teachers' training college and a technical high school; various specialized institutions of learning and a number of second-level schools are scattered throughout the country. There are many part-time schools of cultural activities, including music.

Compulsory education comprises 8 classes, 7-14 years of age. After completion of a facultative 9th class, attended by 93%-95% of the relevant age group, there is access to further schooling free of charge. Some 65% of the age groups 15-19 years old attend schools. Around 15%-20% of each age group go into handicraft apprenticeship About 30% pass matriculation examination, generally at the age of 20 Approximately one third-level student out of every four goes abroad for studies, two-thirds of them to Scandinavia, the rest mainly to English- and Germanspeaking countries

Immatriculation in Iceland in autumn 1984 Preceding the first level, 4,208 First-level (1st-6th class) 25,058 Second-level first stage (7th-9th class) 11,803 Second-level second stage (4-year courses) 15,434 Third-level studies, 5,125

Social Welfare. The main body of the Icelandic social welfare legislation is consolidated in six main acts

- (1) The social security legislation (a) health insurance, including sickness benefits, (b) social security pensions, mainly consisting of old age pension, disablement pension and widows' pension, and also children's pension, (c) employment injuries insurance
- (11) The unemployment insurance legislation, where daily allowances are paid to those who have met certain conditions.
- (111) The subsistence legislation This is controlled by municipal government, and social assistance is granted under special circumstances, when payments from other sources are not sufficient
- (iv) The tax legislation In 1975 family allowances were abolished and children's support included in the tax legislation, according to which a certain amount for each child in a family is subtracted from income taxes or paid out to the family
  - (v) The rehabilitation legislation (vi) Child and juvenile guidance

Health insurance covers the entire population. Citizenship is not demanded and there is no waiting period. Most hospitals are both municipally and state run, a few solely state run and all offer free medical help. Medical treatment out of hospitals is partly paid by the patient, the same applies to medicines, except medicines of lifelong necessary use, which are paid in full by the health insurance. Dental care is free for the age groups 6-15, but is paid 75% for those five years or younger and the age group 16 but 50% for old age and disabled pensioners. Sickness benefits are paid to those who lose income because of periodical illness. The daily amount is fixed and paid from the 11th day of illness.

The pension system is composed of the public social security system and some 90 private pension funds. The social security system pays basic old age and disablement pensions of a fixed amount regardless of past or present income, as well as supplementary pensions to individuals with low present income. The pensions are index-linked, i.e. are changed in line with changes in wage and salary rates in the labour market. The private pension funds pay pensions that depend on past payments of premiums that are a fixed proportion of earnings. The payment of pension fund premiums is compulsory for all wage and salary earners. The pensions paid by the funds differ considerably between the individual funds, but are generally indexlinked. In the public social security system, entitlement to old age and disablement pensions at the full rates is subject to the condition that the beneficiary has been resident in Iceland for 40 years at the age period of 16-67. For shorter period of residence, the benefits are reduced proportionally. Entitled to old age pension are all those who are 67 years old, and have been residents in Iceland for 3 years of the age period of 16-67. Entitled to disablement pension are those who have lost 75% of their working capacity and have been residents in Iceland for 3 years before application or have had full working capacity at the time when they became

residents Old age and disablement pension are of equally high amount, in the year 1985 the total sum was 58,213 kr for an individual Married pensioners are paid 90% of two individuals' pensions. In addition to the basic amount, supplementary allowances are paid according to social circumstances and income possibilities. Widows' pensions are the same amount as old age and disablement pension, provided the applicant is over 60 when she becomes widowed. Women at the age 50-60 get reduced pension. Women under 50 are not entitled to widows' pensions.

The employment injuries insurance covers medical care, daily allowances, disablement pension and survivors' pension and is applicable to practically all em-

ployees.

All benefits within the above-mentioned laws shall go up in step with general

wages within 6 months from their increase.

Social assistance is primarily municipal and granted in cases outside the social security legislation. Domestic assistance to old people and disabled is granted within this legislation, besides other services.

Child and juvenile guidance is performed by chosen committees according to special laws, such as home guidance and family assistance. In cases of parents' disablement the committees take over the guidance of the children involved

HISTORY. The Indus civilization was fully developed by c 2500 B.C., and collapsed c 1750 BC An Aryan civilization spread from the west as far as the Ganges valley by 500 B C.; separate kingdoms were established and many of these were united under the Mauryan dynasty established by Chandragupta in c 320 B.C. The Mauryan Empire was succeeded by numerous small kingdoms. The Gupta dynasty (A.D. 320-600) was followed by the first Arabic invasions of the north-west. Moslem, Hindu and Buddhist states developed together with frequent conflict until the establishment of the Mogul dynasty in 1526. The first settlements by the East India Company were made after 1600 and the company established a formal system of government for Bengal in 1700. During the decline of the Moguls frequent wars between the Company, the French and the native princes led to the Company's being brought under British Government control in 1784; the first Governor-General of India was appointed in 1786. The powers of the Company were abolished by the India Act, 1858, and its functions and forces transferred to the British Crown Representative government was introduced in 1909, and the first parliament in 1919. The separate dominions of India and Pakistan became independent within the Commonwealth in 1947 and India became a republic in 1950.

AREA AND POPULATION. India is bounded north-west by Pakistan, north by China, Tibet, Nepál and Bhután, east by Burma, south-east, south and south west by the Indian ocean. The far eastern states and territories are almost separated from the rest by Bangladesh as it extends northwards from the Bay of Bengal. The area of the Indian Union (excluding the Pakistan and China-occupied parts of Jammu and Kashmir) is 3,166,829 sq. km. Its population according to the 1981 census (preliminary figures) was 683,810,051 (excluding the occupied area of Jammu and Kashmir); this represents an increase of 24.8% since 1971. Sex ratio was 940 females per 1,000 males (929 in 1971); density of population, 221 per sq. km. About 23.7% of the population was urban in 1981 (in Maharashtra, 35%; in Himachal Pradesh, 7.7%).

Many births and deaths go unregistered. Data from certain areas of better registration and field studies suggest that the average annual birth rate for the decade 1971-80 was about 36 per 1,000 population, the death rate 14 8 per 1,000. In 1980 (estimate) the age-group 0-14 years represented 39 7% of the population and only 5.5% were over 60. In 1981 expectation of life for men was 52 years, for women 50

Marriages and divorces are not registered. The minimum age for a civil marriage is 18 for women and 21 for men; for a sacramental marriage, 14 for girls and 18 for youths

The main details of the census of 1 March 1971 and of 1 March 1981 are.

CONSTITUTION AND GOVERNMENT. On 26 Jan. 1950 India became a sovereign democratic republic. India's relations with the British Commonwealth of Nations were defined at the London conference of Prime Ministers on 27 April 1949.

Unanimous agreement was reached to the effect that the Republic of India remains a full member of the Commonwealth and accepts the Queen as 'the symbol of the free association of its independent member nations and, as such, the head of the Commonwealth'. This agreement was ratified by the Constituent Assembly of India on 17 May 1949.

The constitution was passed by the Constituent Assembly on 26 Nov 1949 and came into force on 26 Jan. 1950 It has since been amended 44 times.

India is a Union of States and comprises 22 States and 9 Union territories Each State is administered by a Governor appointed by the President for a term of 5 years while each Union territory is administered by the President through an administrator appointed by him.

The capital is New Delhi

Presidency. The head of the Union is the President in whom all executive power is vested, to be exercised on the advice of ministers responsible to Parliament. He is elected by an electoral college consisting of all the elected members of Parliament and of the various state legislative assemblies. He holds office for 5 years and is eligible for re-election. He must be an Indian citizen at least 35 years old and eligible for election to the Lower House. He can be removed from office by impeachment for violation of the constitution.

There is also a Vice-President who is ex-officio chairman of the Upper House of Parliament.

Central Legislature The Parliament for the Union consists of the President, the Council of States (Rajya Sabha) and the House of the People (Lok Sabha). The Council of States, or the Upper House, consists of not more than 250 members, in 1980 there were 232 elected members and 12 members nominated by the President. The election to this house is indirect; the representatives of each State are elected by the elected members of the Legislative Assembly of that State. The Council of States is a permanent body not liable to dissolution, but one-third of the members retire every second year. The House of the People, or the Lower House, consists of 544 members, 525 directly elected on the basis of adult suffrage from territorial constituencies in the States, and 17 members to represent the Union

territories, chosen in such manner as the Parliament may by law provide; in March 1982 there were 542 elected members and 2 members nominated by the President. The House of the People unless sooner dissolved continues for a period of 5 years from the date appointed for its first meeting; in emergency, Parliament can extend the term by 1 year.

State Legislatures For every State there is a legislature which consists of the Governor, and (a) 2 Houses, a Legislative Assembly and a Legislative Council, in the States of Jammu and Kashmir, Karnataka, Madhya Pradesh, Maharashtra, Tamil Nadu and Uttar Pradesh, and (b) 1 House, a Legislative Assembly, in the other States. Every Legislative Assembly, unless sooner dissolved, continues for 5 years from the date appointed for its first meeting. In emergency the term can be extended by 1 year. Every State Legislative Council is a permanent body and is not subject to dissolution, but one-third of the members retire every year. Parliament can, however, abolish an existing Legislative Council or create a new one, if the proposal is supported by a resolution of the Legislative Assembly concerned.

Legislative Councils have one-third of the total membership of the Assemblies but not less than 40 members, of whom one-third are elected by local authorities, one-third by members of the Assembly, one-twelfth by state university graduates and one-twelfth by teachers of secondary school upwards, the rest are named by the Governor. Legislative Assemblies have between 60 and 500 directly elected members.

Legislation The various subjects of legislation are enumerated in three lists in the seventh schedule to the constitution List I, the Union List, consists of 97 subjects (including defence, foreign affairs, communications, currency and coinage, banking and customs) with respect to which the Union Parliament has exclusive power to make laws. The State legislature has exclusive power to make laws with respect to the 66 subjects in list II, the State List; these include police and public order, agriculture and irrigation, education, public health and local government. The powers to make laws with respect to the 47 subjects (including economic and social planning, legal questions and labour and price control) in list III, the Concurrent List, are held by both Union and State governments, though the former prevails But Parliament may legislate with respect to any subject in the State List in circumstances when the subject assumes national importance or during emergencies.

Other provisions deal with the administrative relations between the Union and the States, interstate trade and commerce, distribution of revenues between the States and the Union, official language, etc

Fundamental Rights Two chapters of the constitution deal with fundamental rights and 'Directive Principles of State Policy'. 'Untouchability' is abolished, and its practice in any form is punishable. The fundamental rights can be enforced through the ordinary courts of law and through the Supreme Court of the Union The directive principles cannot be enforced through the courts of law, they are nevertheless fundamental in the governance of the country.

Special provision is made for migrants from Pakistan and for Indians resident abroad. Under the Citizenship Act, 1955, which supplemented the provisions of the Constitution, Indian citizenship is acquired by birth, by descent, by registration and by naturalization. The Act also provides for loss of citizenship by renunciation, termination and deprivation. The right to vote is granted to every person who is a citizen of India and who is not less than 21 years of age on a fixed date and is not otherwise disqualified.

A Cabinet Minister has a sumptuary allowance of Rs 500 per month, other Ministers (but not Deputy Ministers) of up to Rs 500. At the administrative head of each Ministry is a Secretary of the Government.

There were also 6 Ministers of State with independent charges and 19 Ministers of State.

Local Government There were in 1980, 40 municipal corporations, 1,274 municipalities, 815 town area and notified area committees and 62 cantonment boards. The municipal bodies have the care of the roads, water supply, drainage, sanitation, medical relief, vaccination and education Their main sources of revenue are taxes on the annual rental value of land and buildings, octroi and terminal, vehicle and other taxes. The municipal councils enact their own bye-laws and frame their budgets, which in the case of municipal bodies other than corporations generally require the sanction of the State government. All municipal councils are elected on the principle of adult franchise.

For rural areas there is a 3-tier system of panchayati raj at village, block and district level, although the 3-tier structure may undergo some changes in State legislation to suit local conditions. All panchayati raj bodies are organically linked, and representation is given to special interests. Elected directly by and from among villagers, the panchayats are responsible for agricultural production, rural industries, medical relief, maternity and child welfare, common grazing grounds, village roads, tanks and wells, and maintenance of sanitation. In some places they also look after primary education, maintenance of village records and collection of land revenue. They have their own powers of taxation. There are some judicial panchayats or village courts.

Panchayati raj now cover all the States with the exception of Nagaland and Meghalaya, although Nagaland has area, range and tribal councils. They exist in all the Union Territories except Mizoram and Lakshadweep. In Pondicherry they have been created by declaring existing Municipal Communes to be Commune Panchayat Councils; this is a transition arrangement. In Arunachal Pradesh and Chandigarh the 3-tier system of panchayati raj has been introduced. With most of the country covered by panchayati raj, the emphasis now is on consolidation and clarifying their role in rural development.

The powers and responsibilities of panchayati raj institutions are derived from State Legislatures, and from the executive orders of State governments

Under the Constitution (Part XII and 7th Schedule), the power to raise funds has been divided between the central government and the states Generally, the sources of revenue are mutually exclusive Certain taxes are levied by the Union for the sake of uniformity and distributed to the states. The Finance Commission (Art 280 of the Constitution) advises the President on the distribution of the taxes which are distributable between the centre and the states, and on the principles on which grants should be made out of Union revenues to the states. The main sources of central revenue are customs duties, those excise duties levied by the central government, corporation, income and wealth taxes, estate and succession duties on non-agricultural assets and property, and revenues from the railways and posts and telegraphs. The main heads of revenue in the states are taxes and duties levied by the state governments (including land revenues and agricultural income tax), civil administration and civil works, state undertakings, taxes shared with the centre, and grants received from the centre

Currency. A decimal system of coinage was introduced in 1957. The Indian rupee is divided into 100 paise (until 1964 officially described as naye paise), the decimal coins being 1, 2, 3, 5, 10, 20, 25 and 50 paise.

The rupee is valued in relation to a package of main currencies. The £ is the currency of intervention. In March 1986 Rs 17 50 = £1; Rs 12.21 = US\$1

The paper currency consists of (1) Reserve Bank notes in denominations of Rs 2, 5, 10, 20, 50 and 100; and (2) Government of India currency notes of denominations of Re 1 deemed to be included in the expression 'rupee coin' for the purposes of the Reserve Bank of India Act, 1934

According to the Reserve Bank of India, the total money supply with the public on the last Friday of May 1985 was Rs 24,479 crores.

100,000 rupees are called 1 lakh, 100 lakhs are called 1 crore

Banking. The Reserve Bank, the central bank for India, was established in 1934 and started functioning on 1 April 1935 as a shareholder's bank, it became a nationalized institution on 1 Jan. 1949. It has the sole right of issuing currency-notes. The Bank acts as adviser to the Government on financial problems and is the banker for central and state governments, commercial banks and some other financial institutions. The Bank manages the rupee public debt of central and state governments. It is the custodian of the country's exchange reserve and supervises repatriation of export proceeds and payments for imports. The Bank gives short term loans to state governments and scheduled banks and short and medium-term loans to state co-operative banks and industrial finance institutions. The Bank has extensive powers of regulation of the banking system, directly under the Banking Regulation Act, 1949, and indirectly by the use of variations in Bank rate, variation in reserve ratios, selective credit controls and open market operations. Bank rate was raised to 10% in July 1981.

Except refinance for food credit and export credit, the Reserve Bank's refinance facility to commercial banks has been placed on a discretionary basis. The net profit of the Reserve Bank of India for the year ended June 1982, after making the usual or necessary provisions, amounted to Rs 210 crores.

The commercial banking system consisted of 201 scheduled banks (ie, banks which are included in the 2nd schedule to the Reserve Bank Act) and 4 nonscheduled banks on 30 June 1982, scheduled banks included 121 Regional Rural Banks Total deposits in commercial banks, June 1982, stood at Rs 45,831 crores The business of non-scheduled banks forms less than 0 1% of commercial bank business. Of the 201 scheduled banks, 18 are foreign banks which specialize in financing foreign trade but also compete for domestic business. The largest scheduled bank is the State Bank of India, constituted by nationalizing the Imperial Bank of India in 1955 The State Bank acts as the agent of the Reserve Bank and the subsidiaries of the State Bank act as the agents of the State Bank for transacting government business as well as undertaking commercial functions Fourteen banks with aggregate deposits of not less than Rs 50 crores were nationalized on 19 July 1969. Six banks were nationalized in April 1980. The 28 public sector banks (which comprise the State Bank of India and its seven associate banks and 20 nationalised banks) account for over 90% of deposits and bank credit of all scheduled commercial banks

Weights and Measures. Uniform standards of weights and measures, based on the metric system, were established for the first time by the Standards of Weights and Measures Act, 1956, which provided for a transition period of 10 years. So far the system has been fully adopted in trade transactions but there are a few fields such as engineering, survey and land records and the building and construction industry where it has not; efforts are being made to complete the change as early as possible.

In order to align this legislation with the latest international trends an expert committee (Weights and Measures (Law Revision) Committee) was set up by the central government to suggest a revised Bill which was passed by Parliament

in April 1976. The new Standards of Weights and Measures Act, 1976, has recognized the International System of Units and other units recommended by the General Conference on Weights and Measures and is in line with the recommendations of the International Organisation of Legal Metrology (OIML). The new Act also covers the system of numeration, the approval of models of weights and measures, regulation and control of inter-state trade in relation to weights and measures. The Act also protects consumers through proper indication of weight, quantity, identity, source, date and price on packaged goods. A draft Standards of Weights and Measures (Enforcement) Bill has also been prepared by the committee for adoption either by Parliament or State legislatures, as enforcement is now in the 'concurrent' list of legislation.

The provisions of the 1976 Act came into force in Sept. 1977, as did the accompanying Standards of Weights and Measures (Packaged Commodities) Rules, 1977

While the Standards of Weights and Measures are laid down in the Central Act, enforcement of weights and measures laws is entrusted to the state governments, the central Directorate of Weights and Measures is responsible for co-ordinating activities so as to ensure national uniformity

An Indian Institute of Legal Metrology trains officials of the Weights and Measures departments of India and different developing countries. The Institute is being modernized with technical assistance from the Federal Republic of Germany

There are 2 Regional Reference Standards laboratories at Ahmedabad and Bhubaneswar which (besides calibrating secondary standards of physical measurements) also provide testing facilities in metrological and industrial measurements. These laboratories are equipped with Standards next in line to the National Standards of physical measurements which are maintained at the National Physical Laboratory in New Delhi.

For weights previously in legal use under the Standards of Weight Act, 1956, see The Stafesman's Year-Book, 1961, p. 171

Calendar. The dates of the Saka era (named after the north Indian dynasty of the first century A.D.) are being used alongside Gregorian dates in issues of the Gazette of India, news broadcasts by All-India Radio and government-issued calendars, from 22 March 1957, a date which corresponds with the first day of the year 1879 in the Saka era

#### **ENERGY AND NATURAL RESOURCES**

Electricity. In March 1983 about 55% of all villages had electricity. Total installed capacity (1985, provisional) was 40 6m. kw Production of electricity in 1984–85 was 156,700m. kwh., of which 102,900m. kwh. came from thermal and nuclear stations and 53,800m. kwh from hydro-electric stations.

Oil and Gas. The Oil and Natural Gas Commission, Oil India Ltd and the Assam Oil Co. are the only producers of crude oil. Total production, 1984–85, about 29m. tonnes, about 60% of consumption. The main fields are in Assam and offshore in the Gulf of Cambay (the Bombay High field). Natural gas production, 1984–85, 6,600m, cu. metres.

Water. The net area of 57m. hectares (1982) under irrigation exceeds that of any other country except China, and equals about 38% of the total area under cultivation. Irrigation projects have formed an important part of all three Five-Year Plans. The possibilities of diverting rivers into canals being nearly exhausted, the emphasis is now on damming the monsoon surplus flow and diverting that. Ultimate potential of irrigation is assessed at 107m. hectares, total cultivated land being 142m. hectares. In 1985 India and Bangladesh reached an agreement to monitor the water of the Ganges at the Farakka barrage.

Minerals. Bihar, West Bengal and Madhya Pradesh produce 42%, 25% and 19% of all coal, respectively. The coal industry was nationalized in 1973. Production,

1984-85, 147m. tonnes; reserves (including lignite) are estimated at 114,000m tonnes. (Coal in seams at least 1 2 metres thick and down to a depth of 600 metres, 86,428m tonnes, lignite, 2,100m. tonnes). Production of other minerals, 1984 estimates (in 1,000 tonnes). Iron ore, 41,700, bauxite, 2,000, chromite 450; copper ore, 3,800, manganese ore, 1,100, gold, 2,000 kg. Other important minerals are lead, zinc, limestone, apatite and phosphorite, dolomite, magnesite and silver Value of mineral production, 1982 (provisional), Rs 53,912m. of which mineral fuels produced Rs 48,140m, metallic minerals Rs 2,671m, and non-metallic Rs 3,102m.

Agriculture. The chief industry of India has always been agriculture. About 70% of the people are dependent on the land for their living. In 1983-84 it provided 39.8% of GDP, growth rate, 1982-83, 9%

Agricultural commodities account for about 26% by value of Indian exports, while agricultural commodities, machinery and fertilizers account for about 20% of imports. Tea accounted for about 22% of agricultural exports in 1983–84

An increase in food production of at least 2% per annum is necessary to keep pace with the rising population. Foodgrain production, 78 4m. tons in 1962–63, was 150 5m, tonnes in 1984–85

The Indian Council of Agricultural Research works through 37 institutes and research centres, and 70 national research projects. It supports the establishment of at least 1 agricultural university in each of the states.

The farming year runs from July to June through three crop seasons kharif (monsoon); rabi (winter) and summer.

Agricultural production, 1984-85 (in 1,000 tonnes): rice, 60,000, wheat, 46,000, total foodgrains, 150,500, sugar-cane 165,000, cotton, 8 5m bales (of 170 kg), jute is grown in West Bengal (half total yield), Bihar and Assam, total yield, 7 8m bales, oilseeds, 13,000. The coffee industry is growing, the main cash varieties are Arabica and Robusta (main growing areas Karnataka, Kerala and Tamil Nadu)

The tea industry is important, with production concentrated in Assam, West Bengal, Tamil Nadu, Kerala and Karnataka. Total crop in 1984–85, about 645,300 tonnes from 370,000 hectares

Livestock (1984). Cattle, 182 16m.; sheep, 40 89m., pigs, 8 65m, horses, 900,000; asses, 1m.; goats, 80 8m.; buffaloes, 64m

Fertilizer consumption in 1983-84 was 7 2m tonnes

Land Tenure. There are three main traditional systems of land tenure. ryotwant tenure, where the individual holders, usually peasant proprietors, are responsible for the payment of land revenues; zamindari tenure, where one or more persons own large estates and are responsible for payment (in this system there may be a number of intermediary holders), and mahalwan tenure, where village communities jointly hold an estate and are jointly and severally responsible for payment

Agrarian reform, initiated in the first Five Year Plan, being undertaken by the state governments includes: (1) The abolition of intermediaries under zamindari tenure. (2) Tenancy legislation designed to scale down rents to \(^14 - \frac{1}{2}\) of the value of the produce, to give permanent rights to tenants (subject to the landlord's right to resume a minimum holding for his personal cultivation), and to enable tenants to acquire ownership of their holdings (subject to the landlord's right of resumption for personal cultivation) on payment of compensation over a number of years. (3) Fixing of ceilings on existing holdings and on future acquisition; the holding of a family is between 4.05 and 7.28 hectares if it has assured irrigation to produce two crops a year; 10.93 hectares for land with irrigation facilities for only one crop a year; and 21.85 hectares for all other categories of land. Tea, coffee, cocoa and cardamom plantations have been exempted. (4) The consolidation of holdings in community project areas and the prevention of fragmentation of holdings by reform of inheritance laws. (5) Promotion of farming by co-operative village management (see p 630).

The average size of holding for the whole of India is 2-63 hectares. Andhra Pradesh, 2-87; Assam, 1 46; Bihar, 1-53; Gujarat, 4 49, Jammu and Kashmir,

1.43; Karnataka, 4.11; Kerala, 0.75, Madhya Pradesh, 3.99; Maharashtra, 4.65, Orissa, 1.98, Punjab, 3.85; Rajasthan, 5.5; Tamil Nadu, 1.49; Uttar Pradesh, 1.78; West Bengal, 1.56.

Of the total 71m. rural households possessing operational holdings, 34% hold on the average less than 0 20 hectare of land each

**Opium.** By international agreement the poppy is cultivated under licence, and all raw opium is sold to the central government. Opium, other than for wholly medical use, is available only to registered addicts

Fisheries. Total catch (1981–82) was 2 4m tonnes, of which Kerala, Tamil Nadu, and Maharashtra produced about half Of the total catch, 1,441,000 tonnes were marine fish. There were 102 commercial deep-sea fishing boats, including trawlers, operating in 1982–83 and about 20,000 small craft Fishermen's cooperatives had 552,000 members in 1981, their total sales were worth Rs 177m

Forestry. The lands under the control of the state forest departments are classified as 'reserved forests' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), 'protected forests' and 'unclassed' forest land.

In 1982-83 the total forest area was 75m. hectares Main types are teak and sal Production, 1983, 39m. tonnes. About 16% of the area is inaccessible, of which about 45% is potentially productive Forest revenue, 1981-82 (provisional). Rs 5,239 3m. There are about 3,000 sawmills In 1981-82 1 3m saplings were planted, this is considered insufficient to meet future demands for fuel and industrial wood. Fuel wood consumption, 1983, 133m tonnes Some states have encouraged planting small areas around villages

#### INDUSTRY AND TRADE

Industries. Railways, air transport, armaments and atomic energy are government monopolies. In a number of industries (including the manufacture of iron and steel and mineral oils, shipbuilding and the mining of coal, iron and manganese ores, gypsum, gold and diamonds) new units are set up only by the state. In a further group of industries (road transport, manufacture of chemicals such as drugs, dyestuffs, plastics and fertilizers) the state established new undertakings, but private enterprise may develop either on its own or with state backing, which may take the form of loans or purchase of equity capital. Nationalized industries employed 4m. in 1981. Under the Industries (Development and Regulation) Act, 1951, as amended, industrial undertakings are required to be licensed; 162 industries are within the scope of the Act. The Government are authorized to examine the working of any undertaking, to issue directions to it and to take over its control if this be deemed necessary A Central Advisory Council has been set up consisting of representatives of industry, labour, consumers and primary producers. There are Development Councils for individual industries and (1981) 4 national development banks.

Foreign investment is encouraged by a tax holiday on income up to 6% of capital employed for 5 years. There are special depreciation allowances, and customs and excise concessions for export industries.

Oil refinery installed capacity, 1983, was 37 8m. tonnes, production of refined oils (1982–83), 33 2m. tonnes. The Indian Oil Corporation was established in 1964 and had (1984) most of the market.

Industry, particularly steel, has suffered from a shortage of power and coal. There is expansion in petrochemicals, based on the oil and associated gas of the Bombay High field, and gas from Bassein field. Small industries (initial outlay on capital equipment of less than Rs 2m.) are important; they employ about 7m. and produced (1980) goods worth Rs 209,000m. The industrial growth rate, 1982–83 was 4%.

There were in 1983 over 30,000 unions. The bond labour system was abolished in 1975. Man-days lost by industrial disputes, 1983, 21.55m., of which 2.54m. were in the central sector. An ordnance of July 1981 gave the government power to ban strikes in essential services; the ordnance was to remain in force for six months and would then be renewable.

#### COMMUNICATIONS

Roads. In 1984-85 there were 1,770,000 km of roads, of which 832,000 km were surfaced. Roads are divided into 5 main administrative classes, namely, national highways, state highways, major district roads, other district roads and village

roads. The national highways (31,710 km in 1985) connect capitals of states, major ports and foreign highways. The national highway system is linked with the ESCAP (Economic and Social Commission for Asia and the Pacific) international highway system. The state highways are the main trunk roads of the states, while the major district roads connect subsidiary areas of production and markets with distribution centres, and form the main link between headquarters and neighbouring districts.

There were (31 March 1983) 6,297,131 motor vehicles in India, comprising 1,197,159 private cars and jeeps, 3 4m. motor cycles and scooters, 127,072 taxis, 173,814 buses and 633,643 goods vehicles

Railways. The Indian railway system is government-owned and (under the control of the Railway Board) is divided into 9 zones, route-km at 31 March 1983

Zone	Headquarters	Route-km
Central	Bombay	6,371 km (657 km electrified)
Eastern	Calcutta	4,238 km (1,218 km)

Aviation. The air transport industry in India was nationalized in 1953 with the formation of two Air Corporations. Air India for operating long-distance international air services, and Indian Airlines for operating air services within India and to adjacent countries. A third airline, Vayudoot, was formed in 1981 as an internal feeder airline.

Air India has 9 Boeing 747s and 5 707s, and 3 Airbus A-300B4s, it operates from Bombay, Delhi, Madras, Trivandrum and Calcutta to Africa, Nairobi, Lagos, Seychelles, Mauritius, Dar es Salaam, Lusaka and Harare); to Europe (London, Paris, Amsterdam, Frankfurt, Geneva, Zurich, Brussels, Moscow and Rome), to western Asia (Doha, Abu Dhabi, Dharan, Cairo, Dubai, Bahrain, Kuwait, Aden, Muscat, Jeddah, Ras al Khaymah, Sharjah, Baghdad and Sanna); to east Asia (Bangkok, Hong Kong, Tökyō, Osaka, Kuala Lumpur, Singapore, Perth and Sydney); to North America (New York and Montreal).

Indian Airlines has a fleet of 54 aircraft consisting of Airbus A-300BS, Boeing 737, F-27 and HS-748 aircraft (Sept 1985). During 1984-85 they carried 8.5m. passengers; net profit Rs 52.84 crores. Flights cover over 83,000 unduplicated route km Vayudoot serves remote areas of India; it has a network of 19 stations.

The Civil Aviation Department maintains and operates 87 civil aerodromes and 24 terminals at military aerodromes. The management of the 4 international airports at Bombay (Santa Cruz), Calcutta (Dum Dum), Delhi (Palam) and Madras is vested in the International Airports Authority of India.

Shipping. In Dec. 1983, 405 ships totalling 6,045,000 GRT were on the Indian Register, of these, 72 ships of 337,264 GRT were engaged in coastal trade, and 333

ships of 5,754,649 GRT in overseas trade Traffic of major ports, 1983–84, was as follows

The shipyard at Vishakhapatnam is capable of building vessels of a maximum of 21,500 DWT Present capacity is about 64,500 DWT per year. The Cochin Shipyard can build Panamax type bulk carriers of 85,000 DWT each. On full development the capacity of the shipyard will be 2 such ships a year. Garden Reach Shipbuilders and Engineers are building bulk carriers of 26,000 DWT, ferry ships (6,000 DWT), hydrographic research ships, tugs and fast patrol craft. There are about 5,200 km of major rivers navigable by motorised craft, of which 1,700 km are used. Canals, 4,300 km, of which 485 km are navigable by motorised craft (331 km are used).

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. All courts form a single hierarchy, with the Supreme Court at the head, which constitutes the highest court of appeal. Immediately below it are the high courts and subordinate courts in each state. Every court in this chain, subject to the usual pecuniary and local limits, administers the whole law of the country, whether made by Parliament or by the state legislatures.

The states of Andhra Pradesh, Assam (in common with Nagaland, Meghalaya, Manipur and Tripura and the Union territories of Arunachal Pradesh and Mizoram), Bihar, Gujarat, Himachal Pradesh, Jammu and Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab (in common with the state of Haryana and the Union Territory of Chandigarh), Rajasthan, Taniil Nadu, Uttar

Pradesh, West Bengal and Sikkim have each a High Court. The jurisdiction of Bombay High Court extends to the Territory of Goa. There is a separate High Court for Delhi. For the Andaman and Nicobar Islands the Calcutta High Court, for Pondicherry the High Court of Madras, and for Lakshadweep the High Court of Kerala are the highest judicial authorities; in Dadra and Nagar Haveli the High Court of Bombay is the relevant high court. The Allahabad High Court has a Bench at Lucknow, the Bombay High Court has Benches at Nagpur and Aurangabad, the Madhya Pradesh High Court has Benches at Gwalior and Indore, the Patna High Court has a Bench at Ranchi and the Rajasthan High Court has a Bench at Jaipur. Judges and Division Courts of the Gauhati High Court also sit in Meghalaya, Manipur, Nagaland and Tripura. Below the High Court each state is divided into a number of districts under the jurisdiction of district judges who preside over civil courts and courts of sessions. There are a number of judicial authorities subordinate to the district civil courts. On the criminal side magistrates of various classes act under the overall supervision of the High Court.

The Code of Criminal Procedure, 1898, has been replaced by the Code of Criminal Procedure, 1973 (2 of 1974), which came into force with effect from 1 April 1974. The new Code provides for complete separation of the Judiciary from the Executive throughout India.

Police. The states control their own police force through the state Home Ministers The Home Minister of the central government co-ordinates the work of the states and controls the Central Detective Training School, the Central Forensic Laboratory, the Central Fingerprint Laboratory as well as the National Police Academy at Mount Abu (Rajasthan) where the Indian Police Service is trained This service is recruited by competitive examination of university graduates and provides all senior officers for the state police forces. The Central Bureau of Investigation functions under the control of the Cabinet Secretariat.

The cities of Pune, Ahmedabad, Nagpur, Bangalore, Calcutta, Madras, Bombay and Hyderabad have separate police commissionerates

Educational Organization Education is the concurrent responsibility of state and Union governments. In the union territories it is the responsibility of the central government. The Union Government is also directly responsible for the central universities and all institutions declared by parliament to be of national importance, the promotion of Hindi as the federal language; coordinating and maintaining standards in higher education, research, science and technology. Professional education rests with the Ministry or Department concerned, e.g., medical education, the Ministry or Department of Health. The Department of Education is a part of the Union Ministry of Human Resource Development, headed by a cabinet minister. There are several autonomous organizations attached to the Department of Education. These include the University Grants Commission, the National Institute of Educational Planning and Administration and the National Council of

Educational Research and Training. There is a Central Advisory Board of Education to advise the Union and the State Governments on any educational question which may be referred to it

School Education The school system in India can be divided into four stages primary, middle, secondary and senior secondary

Primary education is imparted either at independent primary (or junior basic) schools or primary classes attached to middle or secondary schools. The period of instruction in this stage varies from 4 to 5 years and the medium of instruction is in most cases the mother tongue of the child or the regional language. Free primary education is available for all children. Legislation for compulsory education has been passed by some state governments and Union Territories but it is not practicable to enforce compulsion when the reasons for non-attendance are socio-economic.

The period for the middle stage varies from 2 to 3 years

Higher Education Higher education is given in arts, science or professional colleges, universities and all-India educational or research institutions. In 1983–84 there were 124 universities, 10 institutions of national importance and 15 institutions deemed as universities. Of the 124 universities, 7 are central. Aligarh Muslim University, Banaras Hindu University, University of Delhi; University of Hyderabad, Jawaharlal Nehru University, North Eastern Hill University, Visva Bharati. The rest are state universities. Total enrolment at universities, 1983–84, 3.55 m, of which 2.93 m were undergraduates. Women students, 976,965.

Grants are paid through the University Grants Commission to the central universities and institutions deemed to be universities for their maintenance and development and to state universities for their development projects only, their maintenance is the concern of state governments. During 1983–84 the University Grants Commission sanctioned grants of Rs 155 34 crores

Technical Education The number of institutions awarding degrees in engineering and technology in 1984–85 was 167 (in 1947·38), and those awarding diplomas in engineering and technology numbered 369 (in 1947. 53), the former admitted about 32,000, the latter about 59,000 students. There were also 7 rural institutes and 38 Girls' Polytechnics with about 700 and 4,000 students respectively. For training high-level engineers and technologists 5 Institutes of Technology, the Indian Institute of Science, Bangalore, and 90 other institutions conduct post-graduate and research courses.

Adult Education In spite of the improvement in the literacy rate, the number of adult illiterates over 14 was over 424 26m in 1981. Adult education is, therefore, being accorded a high priority, it formed part of the Minimum Needs Programme under the seventh Five-Year Plan (1985–90), in which it is proposed to cover all illiterate persons in the age-group 15–35 by 1990. The National Board of Adult Education was established in 1977, effort is concentrated on backward areas, women, scheduled castes, scheduled tribes, settled and migrant labourers. The Rural Functional Literacy Projects, state adult education programme voluntary agencies. Nehru Yovak Kendras and other agencies share the work. The Directorate of Adult Education, established in 1971, is the national resource centre; with 17 state resource centres it is responsible for producing teaching/learning materials, training and orientation, monitoring and evaluating the programme

There were 237,532 adult education centres in Sept 1985.

The Union Government has sponsored and supported major schemes for disease prevention and control which are implemented nationally. These include the prevention and control of malaria, filaria, tuberculosis, leprosy, venereal diseases, smallpox, trachoma and cancer. There are also Union Government schemes in connexion with water supply and sanitation, and with nutrition. The Nutrition Advisory Committee of the Indian Council of Medical Research sponsors schemes for research and advises the Government. The National Nutrition Advisory Committee is to formulate a national nutrition policy and recommend measures for improving national standards.

Medical relief and service is primarily the responsibility of the states Medical education is also a state responsibility but there is a co-ordinating Central Health Educational Bureau. The main languages spoken are Bhutia, Lepcha and Nepáli

Being a small country Sikkim had frequently been involved in struggles over her territory, and as a result her boundaries have been very much reduced over the centuries. In particular the Darjeeling district was acquired from Sikkim by the British East India Company in 1839. The Namgyal dynasty had been ruling Sikkim since the 14th century, the first consecrated ruler was Phuntsog Namgya I who was consecrated in 1642 and given the title of 'Chogyal', meaning 'King ruling in accordance with religious laws', derived from Cho-religion and Gyalpo-king. The last Chogyal was deposed in 1975 and died in America in 1982.

HISTORY. In the 16th century Portuguese traders in quest of spices settled in some of the islands, but were ejected by the British, who in turn were ousted by the Dutch (1595) From 1602 the Netherlands East India Company conquered the Netherlands East Indias, and ruled them until the dissolution of the company in 1798 Thereafter the Netherlands Government ruled the colony from 1816 to 1941, when it was occupied by the Japanese until 1945 An independent republic was proclaimed by Dr Sukarno and Dr Hatta on 17 Aug 1945

Complete and unconditional sovereignty was transferred to the Republic of the United States of Indonesia on 27 Dec 1949, except for the western part of New Guinea, the status of which was to be determined through negotiations between Indonesia and the Netherlands within one year after the transfer of sovereignty. A union was created to regulate the relationship between the two countries. A settlement of the New Guinea (Irian Jaya) question was, however, delayed until 15 Aug 1962, when, through the good offices of the United Nations, an agreement was concluded for the transfer of the territory to Indonesia on 1 May 1963. In Feb. 1956 Indonesia abrogated the union and in Aug. 1956 repudiated Indonesia's debt to the Netherlands.

During 1950 the federal system which had sprung up in 1946–48 (see Thi Statisman's Year-Book, 1950, p. 1233) was abolished, and Indonesia was again made a unitary state. The provisional constitution was passed by the Provisional House of Representatives on 14 and came into force on 17 Aug. 1950. On 5 July 1959 by Presidential decree, the Constitution of 1945 was reinstated and the Constituent Assembly dissolved. For history 1960–66 see Thi Statisman's Year-Book, 1982–83, p. 678.

On 11–12 March 1966 the military commanders under the leadership of Lieut-Gen Suharto took over the executive power while leaving President Sukarno as the head of State. The Communist Party was at once outlawed and the National Fiont was dissolved in Oct. 1966. On 22 Feb. 1967 Sukarno handed over all his powers to Gen. Suharto.

AREA AND POPULATION. Indonesia, covering a total land area of 741,101 sq miles (1,919,400 sq km), consists of some 13,700 islands (6,000 of which are inhabited) extending about 3,200 miles east to west through three timezones (East, Central and West Indonesian Standard time) and 1,250 miles north to south. The largest islands are Sumatra, Java Kalimantan (Indonesian Borneo), Sulawesi (Celebes) and Irian Jaya (the western part of New Guinca). # JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. There are courts of first instance, high courts of appeal in every provincial capital and a Supreme Court of Justice for the whole of Indonesia in Jakarta. Administrative matters on judicial organization are under the direction of the Department of Justice.

In civil law the population is divided into three main groups: Indonesians, Europeans and foreign Orientals, to whom different law systems are applicable. When, however, people from different groups are involved, a system of so-called

'inter-gentile' law is applied

The present criminal law, which has been in force since 1918, is codified and is based on European penal law. This law is equally applicable to all groups of the population. For private and commercial law, however, there are various systems applicable for the various groups of the population. For the Indonesians, a system of private and agrarian law is applicable, this is called Adat Law, and is mainly uncodified. For the other groups the prevailing private and commercial law system is codified in the Private Law Act (1847) and the Commercial Law Act (1847).

These Acts have their origins in the French Code Civile and Code du Commerce through the similar Dutch codifications. These Acts are entirely applicable to Indonesian citizens and to Europeans, whereas to foreign Orientals they are applicable with some exceptions, mainly in the fields of family law and inheritance. Penal law was in the process of being codified in 1981

Religion. Religious liberty is granted to all denominations. The majority of the Indonesians are Moslems. There are nearly 6m Christians; their main strength is in Central and East Java, North Sulawesi, East Nusa Tenggara, the Moluccas and Irian Jaya. There are also about 1m Buddhists, probably for the greater part Chinese. Hinduism has 6m. members, of whom 2.5m. are on Bali

In 1978-79 there were 423,570 Islamic houses of worship, 24,215 Christian (7,052 of them Catholic), 4,365 Hindu and 1,762 Buddhist

Education. Pupils and teachers in 1982 (1,000)

	Pupils	Teachers
Primary	23,900	713
Secondary	5,532	328
Technological	300	27

English is the first foreign language taught in schools. Literacy rate was 72% in 1984

There are 51 universities (23 are private)

Health. In 1981–82 there were 1,224 hospitals, 17,000 health centres and 15,400 doctors.

# **DEFENCE.** Two years' military service is compulsory

Army. The Army consisted (1985) of 250,000 men (100,000 conscripts), with some 400,000 reservists. It is organized in 3 armoured, 7 infantry and 1 airborne divisions, and auxiliary units. Equipment includes 190 T-54/-55/-62, 100 T-72, 300 Chieftain, 300 M-47/-48 and 150 M-60A1 main battle tanks. There is also a 250,000-strong Revolutionary Guard Corps. The Army does operate aircraft, but strength is not known.

Navy. The fleet, declining since the revolution, before the war comprised 3 very old destroyers, 4 frigates, 4 old corvettes, 3 old coastal minesweepers, 2 inshore minesweepers, 7 patrol boats, 14 hovercraft, 2 landing ships, 1 landing craft, 2 supply ships, 1 repair ship, 2 oilers, 4 survey vessels, 1 water carrier and 3 tugs. There were also 30 coastguard cutters and 2 customs craft. The Navy has a fleet of helicopters and fixed-wing aircraft, but no details are available.

The construction of 12 fast missile craft in France was to have been completed by mid-1979, but later boats did not receive their missiles and the last 3 boats were embargoed in France. They eventually sailed on 2 Aug 1981 but one was seized by a Royalist group off Cadiz and after she surrended to the French all three were sent to Iran in a merchant ship to obviate further trouble

Naval personnel nominally totalled 20,000 officers and ratings including cadets apprentices and marines, but fewer than 10,000 were active in 1986

With war following revolution and withdrawal of UK and US maintenance teams the fleet lacks spares and the navy has run down, several ships being laid up. The situation was worsened by cessation of foreign help in training semi-illiterate conscripts and with poor morale following general instability and casualties the above ships do not represent an efficient maritime force.

Claims of sinkings during the Iran-Iraq war have not been officially confirmed Figures for ship and personnel strengths should be interpreted with caution

Air Force. In Aug 1955 the Air Force became a separate and independent arm, and had a strength of about 23 first-line squadrons (each 15 aircraft, plus reserves), with 100,000 personnel before the 1979 revolution Strength (1986) was estimated at 35,000 personnel and 100 serviceable combat aircraft. The latter include some MiG-19/Chinese-built F-6 fighter-bombers, supplied via North Korea, and surviving US fighters that include F-14 Tomcat, F-5E Tiger II and F-4D/E Phantom II fighter-bombers, plus a few RF-4E reconnaissance-fighters. Transport aircraft include F27s, C-130 Hercules, Boeing 707s and 747s some equipped as flight refuelling tankers. The status of the large fleet of CH-47C Chinook, Bell Model 214 and other helicopters is not known, but two P-3F Orion mantime patrol aircraft remain operational Training aircraft include Bonanza basic trainers and 35 turbo-prop PC-7 Turbo-Trainers. Switzerland also recently supplied 15 PC-6 Turbo-Porter light transports

HISTORY. Part of the Ottoman Empire from the 16th century, Iraq was captured by British forces in 1916 and became in 1921 a Kingdom under a League of Nations mandate, administered by Britain. It became independent on 3 Oct 1932 under the Hashemite Dynasty, which was overthrown on 14 July 1958 by a military coup which established a Republic, controlled by a military-led Council of Sovereignty under Gen Qassim The republican régime terminated the adherence of Iraq to the Arab Federation (see The Statesman's Year-Book, 1958, p 806) In 1963 Qassim was overthrown and Gen. Abdul Salam Aref became President, to be succeeded in 1966 by his brother Abdul Rahman Aref. In 1968 a successful coup was mounted by the Ba'th Party, which brought Gen. Ahmed Al Bakr to the Presidency His Vice-President, from 1969, Saddam Hussein, became President in a peaceful transfer of power in 1979

An attempt at succession by the Kurdish minority in the north-east of Iraq flared up in 1962, and fighting continued until the acceptance of a peace plan in June 1966. The Revolutionary Command Council formed after the 17 July 1968 coup announced in March 1970 a complete and constitutional settlement of the Kurdish issue. This was not, however, fully accepted by the Kurdish opposition leader.

In Sept 1980 Iraq invaded Iran in a dispute over territorial rights in the Shatt-al-Arab waterway Fighting was continuing in early 1986

HISTORY. In April 1916 an insurrection against British rule took place and a republic was proclaimed. The armed struggle was renewed in 1919 and continued until 1921. The independence of Ireland was reaffirmed in Jan. 1919 by the National Parliament (Dáil Éireann), elected in Dec 1918.

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the 6 counties accepted this scheme, and a Northern Parliament was duly elected on 24 May 1921. The rest of Ireland, however, ignored the Act.

On 6 Dec. 1921 a treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status subject to the right of Northern Ireland to opt out. This right was exercised, and the border between Saorstát Éireann (26 counties) and Northern Ireland (6 counties) was fixed in Dec. 1925 as the outcome of an agreement between Great Britain, the Irish Free State and Northern Ireland. The agreement was ratified by the three parliaments

Subsequently the constitutional links between Saorstát Éireann and the UK were gradually removed by the Dáil The remaining formal association with the British Commonwealth by virtue of the External Relations Act, 1936, was severed when the Republic of Ireland Act, 1948, came into operation on 18 April 1949

CONSTITUTION AND GOVERNMENT. Ireland is a sovereign independent, democratic republic. Its parliament exercises jurisdiction in 26 of the 32 counties of Ireland.

The first Constitution of the Irish Free State came into operation on 6 Dec. 1922. Certain provisions which were regarded as contrary to the national sentiments were gradually removed by successive amendments, with the result that at the end of 1936 the text differed considerably from the original document. On 14 June 1937 a new Constitution was approved by Parliament (Dáil Éireann) and enacted by a plebiscite on 1 July 1937. This Constitution came into operation on 29 Dec. 1937. Under it the name Ireland (Éire) was restored.

The Constitution provides that, pending the reintegration of the national territory, the laws enacted by the Parliament established by the constitution shall have the same area and extent of application as those of the Irish Free State.

The Oireachtas or National Parliament consists of the President and two Houses, viz., a House of Representatives, called Dáil Éireann, and a Senate, called Seanad Éireann, consisting of 60 members. The Dáil, consisting of 166 members, is elected by adult suffrage Of the 60 members of the Senate, 11 are nominated by the Taoiseach (Prime Minister), 6 are elected by the universities and the remaining

43 are elected from 5 panels of candidates established on a vocational basis, representing the following public services and interests: (1) national language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) agricultural and allied interests, and fisheries, (3) labour, whether organized or unorganized; (4) industry and commerce, including banking, finance, accountancy, engineering and architecture, (5) public administration and social services, including voluntary social activities. The electing body is a college of about 1,032 members, comprising members of the Dáil, Senate, county boroughs and county councils.

A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the Dáil, but the Senate has no power to

veto legislative proposals.

No amendment of the Constitution can be effected except with the approval of

the people given at a referendum.

Agreement on the establishment of a Council of Ireland was reached at a meeting held at Sunningdale on 6-9 Dec 1973 Members of the Irish and UK governments attended together with the Northern Ireland Executive-designate.

Irish is the first official language, English is recognized as a second official language. For further details of the Constitution see The Statesman's Year-Book, 1952, -- 1122, 24

Local Government The elected local authorities comprise 27 county councils, 4 county borough corporations, 7 borough corporations, 49 urban district councils and 25 Boards of Town Commissions. All the members of these authorities are elected under a system of proportional representation, normally every 5 years. All residents of an area who have reached the age of 18 are entitled to vote in the local election for their area. Women are eligible for election as members of local authorities in the same manner and on the same conditions as men. Elected members are not paid, but provision is made for the payment of travelling expenses and subsistence allowances.

The range of services for which local authorities are responsible is broken down into 8 main programme groups as follows: Housing and Building; Road Transportation and Safety; Water Supply and Sewerage; Development Incentives and Controls; Environmental Protection; Recreation and Amenity; Agriculturc, Education, Health and Welfare and Miscellaneous Services. Because of the small size of their administrative areas the functions carried out by town commissioners

and some of the smaller urban district councils have tended to become increasingly limited, and the more important tasks of local government have tended to become

the responsibility of the county councils

The local authorities have a system of government which combines an elected council and a whole-time manager. The elected members have specific functions reserved to them which include the striking of rates (local tax), the borrowing of money, the adoption of development plans, the making, amending or revoking of bye-laws and the nomination of persons to other bodies. The managers, who are paid officers of their authorities, are responsible for the performance of all functions which are not reserved to the elected members, including the employment of staff, making of contracts, management of local authority property, collection of rates and rents and the day-to-day administration of local authority affairs. The manager for a county council is manager also for every borough corporation, urban district council and board of town commissioners whose functional area is wholly within the county A central body called the Local Appointments Commission is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, professional offices and other prescribed offices Where a prescribed office becomes vacant, the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners normally select persons for appointment by the machinery of selection boards

# JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The Constitution provides that justice shall be administered in public in Courts established by law by Judges appointed by the President on the advice of the Government. The jurisdiction and organization of the Courts are dealt with in the Courts (Establishment and Constitution) Act, 1961, the Courts (Supplemental Provisions) Acts, 1961–81. These Courts consist of Courts of First Instance and a Court of Final Appeal, called the Supreme Court The Courts of First Instance are the High Court with full original jurisdiction and the Circuit and the District Courts with local and limited jurisdiction. A judge may not be removed from office except for stated misbehaviour or incapacity and then only on resolutions passed by both Houses of the Oireachtas. Judges of the Supreme, High and Circuit Courts are appointed from among practising barristers. Judges of the District Court (called District Justices) may be appointed from among practising barristers or practising solicitors.

The Supreme Court, which consists of the Chief Justice (who is ex officio an additional judge of the High Court) and 5 ordinary judges, has appellate jurisdiction from all decisions of the High Court. The President may, after consultation with the Council of State, refer a Bill, which has been passed by both Houses of the Oireachtas (other than a money bill and certain other bills), to the Supreme Court for a decision on the question as to whether such Bill or any provision thereof is repugnant to the Constitution.

The High Court, which consists of a President (who is ex officio an additional Judge of the Supreme Court) and 14 ordinary judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise concerning the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The High Court on Circuit acts as an appeal court from the Circuit Court

The Court of Criminal Appeal consists of the Chief Justice or an ordinary Judge of the Supreme Court, together with either 2 ordinary judges of the High Court or the President and one ordinary judge of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave to appeal. The decision of the Court of Criminal Appeal is final, unless that court or the Director of Public Prosecutions certifies that the decision involves a point of law of exceptional public importance, in which case an appeal is taken to the Supreme Court

The Offences against the State Act, 1939 provides in Part V for the establishment of Special Criminal Courts A Special Criminal Court sits without a jury. The rules of evidence that apply in proceedings before a Special Criminal Court are the same as those applicable in trials in the Central Criminal Court. A Special Criminal Court is authorised by the 1939 Act to make rules governing its own practice and procedure. An appeal against conviction or sentence by a Special Criminal Court may be taken to the Court of Criminal Appeal.

The High Court exercising criminal jurisdiction is known as the Central Criminal Court. It consists of a judge or judges of the High Court, nominated by the President of the High Court. The Court sits in Dublin and tries criminal cases which are outside the jurisdiction of the Circuit Court

The country is divided into a number of circuits for the purposes of the Circuit Court. The President of the Circuit Court is ex officio an additional judge of the High Court. The jurisdiction of the court in civil proceedings is limited to £15,000 in contract and tort, £15,000 in actions founded on hire-purchase and credit-sale agreements, £5,000 in equity and £5,000 in probate and administration, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters it has jurisdiction in all cases except murder, treason, piracy and allied offences. The Circuit Court acts as an appeal court from the District Court

The District Court has summary jurisdiction in a large number of criminal cases where the offence is not of a serious nature. In civil matters the Court has jurisdiction in contract and tort (except slander, libel, seduction, slander of title and false imprisonment) where the claim does not exceed £2,500; in proceedings founded on hire-purchase and credit-sale agreements, the jurisdiction is £2,500.

All criminal cases, except those of a minor nature, are tried by a judge and a jury of 12. Juries are also used in many civil cases in the High Court. In a criminal case a majority vote of the jury (10 must agree) is necessary to determine a verdict, but in a civil case the agreement of 9 members is sufficient

Religion. According to the census of population taken in 1981 the principal religious professions were as follows.

Education. Elementary Elementary education is free and was given in about 3,398 national schools (including 112 special schools) in 1984. The average daily enrolment of pupils in 1983-84 was 571,003; the number of teachers of all classes about 20,720, including remedial teachers and teachers of special classes. There are 6 Colleges of Education for the training of primary school teachers, all co-educational The estimated state expenditure on elementary education for 1984 is £350,847,000, excluding the cost of administration.

Special provision is made for handicapped and deprived children in special schools which are recognized on the same basis as primary schools, in special classes attached to ordinary schools and in certain voluntary centres where educational services appropriate to the needs of the children are provided. Categories of children include visually handicapped, hearing impaired, physically handicapped, mentally handicapped, emotionally disturbed, travelling children and other socially disadvantaged children Provision is also made for children with dual or multiple handicaps. Each class in such schools is very much smaller than ordinary classes in a primary school and, because of the size of the catchment areas involved, an extensive system of school transport has been developed. Many handicapped children who have spent some years in a special school or class are integrated into normal schools for part of their school career, if necessary with special additional facilities such as nursing services, special equipment, etc. For others who cannot progress within the ordinary school system the special schools or classes provide both the primary and post-primary level of education. There are also part-time teaching facilities in hospitals, child guidance clinics, rehabilitation workshops, special 'Saturday-morning' centres and home teaching schemes

Special schools (1982–83) numbered 112 with 8,383 pupils. There were 189 special classes attached to ordinary schools with 2,377 pupils 737 remedial teachers were employed for backward pupils in ordinary primary schools 35 peripatetic teachers were employed for children with hearing or visual impairments, and for travelling children.

Secondary. Voluntary secondary schools are under private control and are conducted in most cases by religious orders, all schools receive grants from the State and are open to inspection by the Department of Education. The number of recognized secondary schools during the school year 1983–84 was 511, and the number of pupils in attendance was 209,197. Total estimated state expenditure for 1984 is £214,354,500.

Grants for the provision of audio visual teaching aids are available to secondary schools. Most secondary schools now have at least one television receiving set, purchased with the aid of a state grant.

Vocational Education Committee schools provide courses of general and technical education. The number of vocational schools during the school year 1983-84 was 248, full-time students, 71,968. These schools are controlled by the local Vocational Education Committees; they are financed mainly by state grants and also by local rating authorities and VECs. The estimated state expenditure for 1984 was £113m., from the local rates, £2,437,000 and from VECs, £5m.

Comprehensive Schools which are financed by the State combine academic and technical subjects in one broad curriculum so that each pupil may be offered educational options suited to his needs, abilities and interests. Pupils are prepared for the State examinations and for entrance to universities and institutes of further education. The number of comprehensive schools during the school year 1983–84 was 15 with 8,705 students.

Community Schools continue to be established through the amalgamation of existing voluntary secondary and Vocational Education Committee schools where this is found feasible and desirable and in new areas where a single larger school is considered preferable to 2 smaller schools under separate managements. These schools provide second-level education and also provide adult education facilities for their own areas. They also make facilities available to voluntary organizations and to the adult community generally. The number of community schools during the school

year 1983-84 was 42 with 26,029 students. The estimated State expenditure on running costs for 1984 is £35,751,000 for community and comprehensive schools.

Regional Technical Colleges and Colleges of Technology Apprentice, technician and professional courses (and some degree courses) are provided in the technology colleges of the City of Dublin Vocational Education Committee, the Limerick College of Art, Commerce and Technology and 9 regional technical colleges at Athlone, Carlow, Cork, Dundalk, Galway, Letterkenny, Sligo, Tralee and Waterford. Students (full-time) 1983–84, 16,284

University Education is provided by the National University of Ireland, founded in Dublin in 1908, and by the University of Dublin (Trinity College), founded in 1592. The National University comprises 3 constituent colleges—University College, Dublin, University College, Cork, and University College, Galway.

St Patrick's College, Maynooth, Co. Kildare, is a national seminary for Catholic priests and a pontifical university with the power to confer degrees up to doctoral level in philosophy, theology and canon law. It also admits lay students (men and women) to the courses in arts, celtic studies, science and education which it provides as a recognized college of the National University.

Besides the University medical schools, the Royal College of Surgeons in Ireland,

provides medical qualifications which are internationally recognized.

There are six Colleges of Education for training primary school teachers. For degree awarding purposes, three of these colleges are associated with Trinity College, two with University College, Dublin and one with University College, Cork. The Thomond College of Education, Limerick, trains post-primary teachers in physical education, rural and general science, metalwork and engineering science, woodwork and building science and commercial and secretarial subjects.

Third-level courses with a technological bias, leading to degree, diploma and certificate qualifications are also provided by the National Institutes for Higher Education, Limerick and Dublin. There are also 2 Home Economics Colleges, one associated with Trinity College and the other with University College, Galway.

Agricultural An Chomhairle Oiliuna Talmhaíochta (ACOT) is the agency responsible for providing agricultural advisory and training services. Full-time instruction in agriculture is provided for all sections of the farming community. There are 4 agricultural colleges for young people, administered by ACOT, and 8 private ACOT- aided agricultural colleges, at each of which a 1-year course in agriculture is given. A second-year course in farm machinery is provided at one college. Scholarships tenable at these colleges, all of which are residential, are awarded by ACOT which also provides a comprehensive agricultural advisory service and conducts winter classes in agriculture and horticulture at local centres.

Horticultural Two of the agricultural colleges mentioned above also provide a commercial horticultural course. A third college aided by ACOT also provides this course. A 3-year course in amenity horticulture is provided at the National Botanic Gardens in Dublin.

A comprehensive 3-year training programme for young entrants to farming leading to a 'Certificate in Farming' involving both formal instruction and a period of supervised on-farm work experience, was introduced by ACOT in 1982. Students taking the Certificate in Farming can follow a course in general agriculture, pigs, poultry or horticulture. In the case of horticulture, the major part of this course is taken at one of the three horticultural colleges.

Health Services. Persons in the lower income group (those who are unable to afford general practitioner services for themselves and their dependants) are entitled to a free comprehensive health service (family doctor, hospital and specialist services, maternity and infant-welfare services, dental, ophthalmic and aural services). Persons and dependants in the middle-income groups (less than £13,500 per annum income) are entitled to in-patient and out-patient hospital services including specialist services, free maternity care and help towards the cost of drugs and medicines. Such persons must pay a contribution of 1% of income, subject to a maximum of £130 per year, towards the cost of these services. Hospital treatment for

tuberculosis and certain other infectious diseases as well as for children suffering from certain long-term diseases and disabilities is provided free of charge to all classes of the community. Persons suffering from diabetes and other specified long-term conditions are eligible for a free supply of drugs and other necessary medicines, etc.

Pupils of national (elementary) schools are provided with a free school healthexamination service and are also eligible for free dental, ophthalmic and aural services for defects discovered at school health examinations

A free child-welfare clinic service for children under 6 years of age is available in many urban areas. A disabled persons maintenance allowance is payable in cases of need to chronically disabled persons over 16 who are not living in institutions. The disabled are also entitled to free travel and in certain circumstances to a free electricity allowance, a free television licence, free telephone rental and fuel vouchers. There is a mobility allowance of £320 per year for those unable to walk The mother of a severely handicapped child maintained at home may qualify for a constant care allowance. There are also schemes which provide for the education of the blind, and for the training and placement in suitable employment of the blind and the disabled Welfare services include day care services for children, families in stress and the old. Home helps, meals-on-wheels, home nursing etc, are provided where neccessary. All these services are provided by regional health boards under the direction and control of the Minister for Health.

Social Security. Social-welfare services concerned primarily with income maintenance are under the general control of the Minister for Social Welfare. The services administered by the Department of Social Welfare are divided into Insurance and Assistance schemes.

Insurance Services All employees irrespective of their level of earnings are compulsorily insured from age 16 to 66 years and are liable for pay-related social insurance contributions The majority of employees pay a contribution of 8 5% of their earnings prescribed up to a ceiling of £13,000 while a contribution of 7.5% of their earnings continues to be deducted up to a ceiling of £13,800 Their employers pay a further 12 1% up to a prescribed ceiling of £13,800 (The insured population is approximately 1 2m.) CONSTITUTION AND GOVERNMENT. Israel is an independent sovereign republic, established by proclamation on 14 May 1948 For the history of the British Mandate, see THE STATESMAN'S YEAR-BOOK, 1920-49, under PALLSTINE

In 1950 the Knesset (*Parliament*), which in 1949 had passed the Transition Law dealing in general terms with the powers of the Knesset, President and Cabinet, resolved to enact from time to time fundamental laws, which eventually, taken together, would form the Constitution. The first of these fundamental laws, dealing with the Knesset, Israel Lands and the President, were passed in 1958, 1960 and 1964 respectively and with the Government in 1968

Local Government Local authorities are of three kinds, namely, municipal corporations, local councils and regional councils. Their status, powers and duties are prescribed by statute. Regional councils are local authorities set up in agricultural areas and include all the agricultural settlements in the area under their jurisdiction. All local authorities exercise their authority mainly by means of bye-laws approved by the Minister of the Interior. Their revenue is derived from rates and a surcharge on income tax. Local authorities are elected for a 4-year term of office concurrently with general elections.

There are 36 municipalities (2 Arab), 115 local councils (46 Arab and 6 Druze) and 49 regional councils (1 Arab) comprising 700 villages.

**DEFENCE.** The Defence Service Law, provides a compulsory 39-month conscription for men between the ages of 18 and 26 and a 30-month conscription for men in the age-group of 27-29 years. Unmarried women aged 18-26 serve 24 months. After their term of military service, men are on the reserves until the age of 55 years. Until they are 40, men usually report for 31 days training annually and from then until they are 55, for 14 days. Commissioned and n c o.s usually serve 7 extra days a year.

The Israel Defence Force is a unified force, in which army, navy and air force are subordinate to a single chief-of-staff. The Minister of Defence is *de facto* commander-in-chief but from Oct 1973 the cabinet formed a defence committee with authority to make decisions on military operations

Army. The Army is organized in 11 armoured divisions, 33 armoured brigades, 10 mechanized infantry brigades, 12 territorial/border infantry brigades and 15 artillery brigades. Equipment includes some 3,600 main battle tanks and 4,000 other armoured fighting vehicles Strength (1986) 104,000 (conscripts 88,000), rising to 600,000 on mobilization.

Navy. The Navy includes 3 diesel-electric patrol submarines (built in Britain), 25 missile vessels (4 of 500 tons with helicopter and hangar, 8 of 415 tons, 12 of 220 tons and 1 of 47 tons, the smallest missile craft yet built), 2 missile-armed hydrofoils of 105 tons, 41 coastal patrol craft, 2 transports, 3 medium landing ships, 6 landing craft, 1 'firefish', 1 support ship, 1 training ship, 4 coastguard cutters, and 3 minor landing craft. The Navy controls 3 Westwind patrol aircraft and a small number of JetRanger helicopters.

New construction includes 2 missile armed corvettes of 850 tons, and 10

improved guided-missile hydrofoils of 105 tons, all being built in Israel.

The former Nautical School in Haifa has been reorganized as a Naval Officers' School in Acre. The repair base at Eilat has a syncrolift. In Galilee mixed farming, olive and tobacco plantations prevail. The Hills of Ephraim are a vineyard centre, many parts of the hill country are under afforestation. In the northern Negev farming has been aided by the Yarkon-Negev water pipeline. This has become part of the overall project of the 'National Water Carrier', which is to take water from the Sea of Galilee (Lake Kinnereth) to the

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Law Under the Law and Administration Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was obtaining in Palestine on 14 May 1948 in so far as it is not in conflict with that Ordinance or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities

Capital punishment was abolished in 1954, except for support given to the Nazis and for high treason.

The law of Palestine was derived from three main sources, namely, Ottoman law, English law (Common Law and Equity) and the law enacted by the Palestine legislature, which to a great extent was modelled on English law. The Ottoman law in its turn was derived from three main sources, namely, Moslem law which had survived in the Ottoman Empire, French law adapted by the Ottomans and the personal law of the non-Moslem communities.

Civil Courts Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bye-laws and certain specified offences committed within a municipal area.

Magistrates courts, established in each district and sub-district, have limited jurisdiction in both civil and criminal matters

District courts, sitting at Jerusalem, Tel-Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates courts, and in all criminal matters, and as appellate courts from magistrates courts and municipal courts

The Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil or of Criminal Appeal)

In addition, there are various tribunals for special classes of cases, such as the Rents Tribunals and the Tribunals for the Prevention of Profiteering and Speculation Settlement Officers deal with disputes with regard to the ownership or posses-

sion of land in settlement areas constituted under the Land (Settlement of Title) Ordinance

Religious Courts The rabbinical courts of the Jewish community have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of members of their community other than foreigners, concurrent jurisdiction with the civil courts in such matters of members of their community who are foreigners if they consent to the jurisdiction, and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community, whether foreigners or not, with the consent of all parties to the action, save that such courts may not grant a decree of dissolution of marriage to a foreign subject.

The courts of the several recognized Christian communities have a similar juris-

diction over members of their respective communities

The Moslem religious courts have exclusive jurisdiction in all matters of personal status over Moslems who are not foreigners, and over Moslems who are foreigners, if under the law of their nationality they are subject in such matters to

the jurisdiction of Moslem religious courts

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of 2 judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

Religion. Religious affairs are under the supervision of a special Ministry, with departments for the Christian and Moslem communities. The religious affairs of each community remain under the full control of the ecclesiastical authorities concerned in the case of the Jews, the Sephardi and Ashkenazi Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Moslems, the Qadis. The Druze were officially recognized in 1957 as an autonomous religious community.

In 1985 there were Moslems, 551,000, Christians, 97,000; Druze and others,

69,000.

The Jewish Sabbath and Holy Days are observed as days of rest in the public services. Full provision is, however, made for the free exercise of other faiths, and for the observance by their adherents of their respective days of rest and Holy Days.

Education. Laws passed by the Knesset in 1949 and 1978 provide for free and compulsory education from 5 to 16 years of age. There is free education until 18 years of age.

The State Education Law of 12 Aug 1953 established a unified state-controlled elementary school system with a provision for special religious schools. The standard curriculum for all elementary schools is issued by the Ministry with a possibility of adding supplementary subjects comprising not more than 25% of the total syllabus. Many schools in towns are private, a number are maintained by municipalities and some are administered by teachers' co-operatives or trustees.

## Repubblica Italiana

HISTORY. On 10 June 1946 Italy became a republic on the announcement by the Court of Cassation that a majority of the voters at the referendum held on 2 June had voted for a republic. The final figures, announced on 18 June, showed For a republic, 12,718,641 (54 3% of the valid votes cast, which numbered 23,437,143); for the retention of the monarchy, 10,718,502 (45 7%), invalid and contested, 1,509,735. Total 24,946,878, or 89 1% of the registered electors, who numbered 28,005,449. For the results of the polling in the 13 leading cities, see Thi Statesman's Year-Book, 1951, p. 1175. Voting was compulsory, open to both men and women 21 years of age or older, including members of the Civil Service and the Armed Forces; former active Fascists and a few other categories were excluded

On 18 June the then Provisional Government without specifically proclaiming the republic, issued an 'Order of the Day' decreeing that all court verdicts should in future be handed down 'in the name of the Italian people', that the Gazzetta Ufficiale del Regno d'Italia should be re-named Gazzetta Ufficiale della Repubblica Italiana, that all references to the monarchy should be deleted from legal and government statements and that the shield of the House of Savoy should be removed from the Italian flag

Thus ended the reign of the House of Savoy, whose kings had ruled over Piedmont for 9 centuries and as Kings of Italy since 18 Feb 1861 (For fuller account of the House of Savoy, see The Statesman's Year-Book, 1946, p 1021) The Crown Prince Umberto, son of King Victor Emmanuel III, became Lieut-Gen (ie, Regent) of the kingdom on 5 June 1944 Following the abdication and retirement to Egypt of his father on 9 May 1946, Umberto was declared King Umberto II, his reign lasted to 13 June, when he left the country King Victor Emmanuel III died in Alexandria on 28 Dec 1947

CONSTITUTION AND GOVERNMENT. The new Constitution was

passed by the constituent assembly by 453 votes to 62 on 22 Dec 1947, it came into force on 1 Jan 1948. The Constitution consists of 139 articles and 18 transi-

tional clauses. Its main dispositions are as follows:

Italy is described as 'a democratic republic founded on work'. Parliament consists of the Chamber of Deputies and the Senate. The Chamber is elected for 5 years by universal and direct suffrage and it consists of 630 deputies. The Senate is elected for 5 years on a regional basis; each Region having at least 7 senators, consisting of 315 elected senators, the Valle d'Aosta is represented by 1 senator only. The President of the Republic can nominate 5 senators for life from eminent men in the social, scientific, artistic and literary spheres. On the expiry of his term of office, the President of the Republic becomes a senator by right and for life, unless he declines.

The President of the Republic is elected in a joint session of Chamber and Senate, to which are added 3 delegates from each Regional Council (1 from the Valle d'Aosta). A two-thirds majority is required for the election, but after a third indecisive scrutiny the absolute majority of votes is sufficient. The President must be 50 years or over, his term lasts for 7 years. The President of the Senate acts as his deputy.

The President can dissolve the chambers of parliament, except during the last 6

months of his term of office.

The Cabinet can be forced to resign only on a motivated motion of censure; the defeat of a government bill does not involve the resignation of the Government

A Constitutional Court, consisting of 15 judges who are appointed, 5 each, by the President of the Republic, Parliament (in joint session) and the highest law and administrative courts, has rights similar to those of the Supreme Court of the USA It can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President of the Republic and the Ministers The court was set up in Dec 1955.

The reorganization of the Fascist Party is forbidden. Direct male descendants of King Victor Emmanuel are excluded from all public offices, have no right to vote or to be elected, and are banned from Italian territory, their estates are forfeit to the State. Titles of nobility are no longer recognized, but those existing before 28 Oct.

1922 are retained as part of the name.

National anthem Fratelli d'Italia (words by G Mameli, tune by M Novaro, 1847).

The peace treaty was signed in Paris on 10 Feb 1947, and ratified on 15 Sept 1947. Italy ceded to France 4 frontier districts on the Little St Bernard Pass, the Mont-Cenis Plateau, the Mont-Thabor and Chaberton areas, and the upper valleys of the Tinée, Vésubie and Roya (see map in The Statesman's Year-Book, 1948), to Yugoslavia, nearly the whole of the provinces of Venezia Giulia, the commune of Zara and the island of Pelagosa; to Greece, the Dodecanese; to Albania, the island of Saseno, to China the Italian concession at Tientsin Italy also gave up her former colonies.

Under the peace treaty Italy was to pay reparations to the following states. Greece, US\$105m, Yugoslavia, US\$125m., US\$1, US\$100m., Ethiopia, US\$25m; Albania, US\$5m. By 30 Nov. 1967 the whole debt had been paid.

Head of State On 3 July 1985 Chamber and Senate in joint session elected by an absolute majority (752 votes out of 977 votes cast) Francesco Cossiga (Christian Democrat; born 1928), President of the Republic.

Former Presidents of the Republic Luigi Einaudi (1948-55), Giovanni Gronchi (1955-62); Antonio Segni (1962-64); Giuseppe Saragat (1964-71), Giovanni Leone (1971-78); Alessandro Pertini (1978-85).

From 1186 until 1867 successive families of Shoguns exercised the temporal power. In 1867 the Emperor Meyi recovered the imperial power after the abdication on 14 Oct. 1867 of the fifteenth and last Tokugawa Shogun Keiki (in different pronunciation: Yoshinobu). In 1871 the feudal system (Höken Seido) was abolished, this was the beginning of the rapid westernization.

At San Francisco on 8 Sept. 1951 a Treaty of Peace was signed by Japan and representatives of 48 countries. HISTORY. By a Treaty, signed in London on 22 March 1946, Britain recognized Transjordan as a sovereign independent state. A new Anglo-Transjordan treaty was signed in Amman on 15 March 1948. The treaty was to remain in force for 20 years, but by mutual consent was terminated on 13 March 1957.

CLIMATE. The Line Islands, Phœnix Islands and Banaba have a maritime equatorial climate, but the islands further north and south are tropical. Annual and daily ranges of temperature are small and mean annual rainfall ranges from 50" (1,250 mm) near the equator to 120" (3,000 mm) in the north. Tarawa. Jan 83°F (28 3°C), July 82°F (27.8°C). Annual rainfall 79" (1,977 mm).

## NATURAL RESOURCES

Minerals. Phosphate production was discontinued in 1979

Agriculture. The land is basically coral reefs upon which coral sand has built up, and then been enriched by humus from rotting vegetation and flotsam which has drifted ashore. The principal tree is the coconut, which grows prolifically on all the islands except some of the Phænix Islands. Other food-bearing trees are the pandanus palm and the breadfruit. As the amount of soil is negligible, the only vegetable which grows in any quantity is a coarse calladium (alocasia) with the local name 'babai', which is cultivated most laboriously in deep pits. Pigs and fowls are kept throughout Kiribati, and there is an abundance of fish.

Copra production is mainly in the hands of the individual landowner, who collects the coconut products from the trees on his own land Production (1983) 6,948 tonnes.

Livestock (1984), Pigs, 10,000, poultry (1982), 163,000.

HISTORY. Korea was united in a single kingdom under the Silla dynasty from 668. China, which claimed a vague suzerainty over Korea, recognized Korea's independence in 1895. Korea concluded trade agreements with the USA (1882), Great Britain, Germany (1883). After the Russo-Japanese war of 1904–5. Korea was virtually a Japanese protectorate until it was formally annexed by Japan on 29. Aug. 1910 thus ending the rule of the Yi dynasty which had begun in 1392.

Following the collapse of Japan in 1945, American and Russian forces entered Korea to enforce the surrender of the Japanese troops there, dividing the country for mutual military convenience into two portions separated by the 38th parallel of latitude Negotiations between the Americans and Russians regarding the future of Korea broke down in May 1946

On 25 June 1950 the North Korean forces crossed the 38th parallel and invaded South Korea. The same day, the Security Council of the United Nations asked all member states to render assistance to the Republic of Korea. When the UN forces had reached the Manchurian border Chinese troops entered the war on the side of the North Koreans on 26 Nov. 1950 and penetrated deep into the south By the beginning of April 1951, however, the UN forces had regained the 38th parallel On 23 June 1951 Y. A. Malik, President of the Security Council, suggested a cease-fire, and on 10 July representatives of Gen. Ridgway met representatives of the North Koreans and of the Chinese Volunteer Army. An agreement was signed on 27 July 1953.

For the contributions of member-nations of the United Nations to the war, see I HE STATESMAN'S YEAR-BOOK, 1954, p. 1195, and 1956, p. 1180.

On 16 Aug 1953 the USA and Korea signed a mutual defence pact and on 28 Nov 1956 a treaty of friendship, commerce and navigation

On 4 July 1972 it was announced in Seoul and Pyongyang (North Korea) that talks had taken place aimed at 'the peaceful unification of the fatherland as early as possible'. In Nov 1984 agreement was reached to form a joint economic committee.

A North Korean-UN agreement of 6 Scpt 1976 established a joint security area 850 metres in diameter, divided into 2 equal parts to ensure the separation of the two sides

HISTORY. The Lao People's Democratic Republic was founded on 2 Dec 1975 Until that date Laos was a Kingdom, once called Lanxang (the land of a million elephants)

In 1893 Laos became a French protectorate and in 1907 acquired its present frontiers. In 1941 French authority was suppressed by the Japanese. When the Japanese withdrew in 1945 an independence movement known as Lao Issara (Free Laos) set up a government under Prince Phetsarath, the Viceroy of Luang Prabang. This government collapsed with the return of the French in 1946 and the leaders of the movement fled to Thailand.

Under a new Constitution of 1947 Laos became a constitutional monarchy under the Luang Prabang dynasty, and in 1949 became an independent sovereign state within the French Union. Most of the Lao Issara leaders returned to Laos but a few remained in dissidence under Prince Souphanouvong, who allied himself with the Vietminh and subsequently formed the 'Pathet Lao' (Lao State) rebel movement

The war in Laos from 1953 to 1973 between the Royal Lao Government (supported by American bombing and Thai mercenaries) and the Patriotic Front Pathet Lao (supported by large numbers of North Vietnamese troops) ended in 1973 when an agreement and a protocol were signed. A provisional coalition government was formed by the two sides in 1974 However, after the communist victories in neighbouring Vietnam and Cambodia in April 1975, the Pathet Lao took over the running of the whole country, although maintaining the façade of a coalition On 29 Nov 1975 HM King Savang Vatthana signed a letter of abdication and the People's Congress proclaimed a People's Democratic Republic of Laos For the history of Pathet Lao and the military intervention of the Vietminh, see The Statesman's Year-Book, 1971–72, pp 1126–28 and 1975–76 ed., pp 1115–16

AREA AND POPULATION. Laos is a landlocked country of about 91,400 sq miles (236,800 sq km) bordered on the north by China, the east by Vietnam, the south by Cambodia and the west by Thailand and Burma. Apart from the Mekong River plains along the border of Thailand, the country is mountainous, particularly in the north, and in places densely forested The climate is of a tropical monsoon type with a wet season from May to Oct. and a dry one from Nov to April Most of northern Laos receives about 40–80 in. of rainfall annually, while parts of the Bolovens Plateau in southern Laos have over 150 in.

Estimates place the population at about 3 5m. but the first complete census will be undertaken, with UN assistance, in March 1985. The most heavily populated areas are the Mekong River plains by the Thailand border Otherwise, the population is sparse and scattered, particularly in the northern provinces, and the eastern part of the country has been depopulated by war. The majority of the population is officially divided into 4 groups, about 56% Lao-Lum (Valley-Lao), 34% Lao-Theung (Lao of the mountain sides); and 9% Lao-Soung (Lao of the mountain tops), who comprise the Meo and Yaoe. Other minorities include Vietnamese, Chinese, Europeans, Indians and Pakistanis.

The Lao-Lum and Lao-Tai belong to the Lao branch of the Tai peoples, who migrated into South-East Asia at the time of the Mongol invasion of South China. The valley Lao are Buddhists, following the Hinayana (Theravada) form. The majority of the Lao-Theungma diverse group consisting of many tribes but mostly belonging to the Mon-Khmer group—are animists.

The Meo and Yaoe live in northern Laos. Far greater numbers live in both North

Vietnam and China, having migrated over the last century Their religions have strong Confucian and animistic features but some are Christians

There are 16 provinces Compared with other parts of Asia, Laos has few towns. The administrative capital and largest town is Vientiane, with a population of estimate (1984) 120,000. Other important towns are Luang Prabang, 44,244, Pakse, 44,860, in the extreme south, and Savannakhet, 50,690.

Language Lao is the official language of the country. The liturgical language of Theravada Buddhism is Pali

CLIMATE. A tropical monsoon climate, with high temperatures throughout the year and very heavy rains from May to Oct. Vientiane Jan 70°F (21 1°C), July 81°F (27 2°C). Annual rainfall 69" (1,715 mm)

The Nam Ngum Dam situated about 45 miles north of Vientiane was inaugurated in Dec. 1971 with an initial installed capacity of 30,000 km and a planned ultimate capacity of 150,000 km. The generators of Phase II of the scheme were brought into operation in 1978, giving an installed capacity of 110,000 km. The installation of a fifth generator (Phase III) was due for completion in 1984. Transmission lines to Vientiane and to Thailand have been constructed. Other sources of electric power are the dams on the Sedone River about 20 miles north of Pakse and on the Nam Dong about 5 miles south of Luang Prabang, with installed capacities of 2,400 and 1,200 km respectively. Production (1984) 900m kmh.

Minerals. Various minerals are found, but only tin is mined to any significant extent at present, and only at 2 mines (Tin exports (1980) US\$500,000). There are extremely rich deposits of high-quality iron in Xieng Khouang province and potash near Vientiane

HISTORY. After 20 years' French mandatory regime, Lebanon was proclaimed independent at Beirut on 26 Nov 1941. On 27 Dec. 1943 an agreement was signed between representatives of the French National Committee of Liberation and of Lebanon, by which most of the powers and capacities exercised hitherto by France were transferred as from 1 Jan 1944 to the Lebanese Government The evacuation of foreign troops was completed in Dec 1946

In early May 1958 the opposition to President Chamoun, consisting principally (though not entirely) of Moslem pro-Nasserist elements, rose in insurrection, and for 5 months the Moslem quarters of Beirut, Tripoli, Sidon and the northern Bekaa were in insurgent hands. On 15 July the US Government acceded to President Chamoun's request and landed a considerable force of army and marines who reestablished the authority of the Government

Israeli attacks on Lebanon resulted from the presence and activities of armed Palestinian resistance units. Internal problems, which had long been latent in Lebanese society, were exacerbated by the politically active Palestinian population and by the deeply divisive question of the Palestine problem itself. An attempt to regulate the activities of Palestinian fighters through the secret Cairo agreement of 1969 was frustrated both by the inability of the Government to enforce its provisions and by an influx of battle-hardened fighters expelled from Jordan in Sept 1970. A further attempt to control the guerrillas in 1973 also failed. From March 1975. Lebanon was beset by civil disorder causing considerable loss of life and economic life was brought to a virtual standstill.

By Nov 1976 it was estimated that 40,000 people had been killed and up to 100,000 injured By the end of the year, however, large scale fighting had been brought to an end by the intervention of the Syrian-dominated Arab Deterrent Force which ensured sufficient security to permit Lebanon to establish quasinormal conditions under President Sarkis. Large areas of the country, however, remained outside Governmental control, including West Beirut which was the scene of frequent conflict between opposing militia groups. The South, where the Arab Deterrent Force could not deploy, remained unsettled and subject to frequent Israeli attacks In March 1978 there was an Israeli invasion following a Palestinian attack inside Israel Israeli troops eventually withdrew in June, but instead of handing over all their positions to UN Peacekeeping Forces they installed Israelicontrolled Lebanese militia forces in border areas. Severe disruption continued in the South. In June 1982, following on the attempted assassination of the Israeli ambassador in London, Israeli forces once again invaded, this time in massive strength, and swept through the country, eventually laying siege to and devastatingly bombing Beirut In Sept. Palestinian forces, together with the PLO leadership, evacuated Beirut On 23 Aug 1982 Bachir Gemayel was elected President of Lebanon. On 14 Sept he was assassinated His brother, Amin Gemayel, was elected in his place on 21 Sept Since then there has been a state of 'no peace, no war' with intermittent clashes between the various de facto forces on the ground. Israeli forces started a complete withdrawal on 16 Feb 1985. A peace agreement was signed by the leaders of the Druse, Amal and (Christian) Lebanese Forces to end the civil war on 28 Jan. 1986

AREA AND POPULATION. Lebanon is a mountainous country about 135 miles long and varying between 20 and 35 miles wide, bounded on the north and east by Syria, on the west by the Mediterranean and on the south by Israel Between

the two parellel mountain ranges of Lebanon and Anti-Lebanon lies the fertile Bekaa Valley. About one-half of the country lies at an altitude of over 3,000 ft

The area of Lebanon is estimated at 10,452 sq km (4,036 sq. miles) and the population at 3 5m. (1984, estimate). The principal towns, with estimated population (1980), are Beirut (the capital), 702,000, Tripoli 175,000, Zahlé, 46,800, Saida (Sidon), 24,740, Tyre, 14,000

The official language is Arabic. French and, increasingly, English are widely spoken in official and commercial circles

CLIMATE. A Mediterranean climate with short, warm winters and long, hot and rainless summers, with high humidity in coastal areas Rainfall is largely confined to the winter months and can be torrential, with snow on high ground Beirut Jan 55°F(13°C), July 81°F(27°C) Annual rainfall 35 7" (893 mm)

CONSTITUTION AND GOVERNMENT. Lebanon is an independent republic The first Constitution was established under the French Mandate on 23 May 1926. It has since been amended in 1927, 1929, 1943 (twice) and 1947. It is a written constitution based on the classical separation of powers, with a President, a single chamber elected by universal adult suffrage, and an independent judiciary. The Executive consists of the President and a Prime Minister and Cabinet appointed by him. The system is, however, adapted to the peculiar communal balance on which Lebanese political life depends. This is done by the electoral law which allocates deputies according to the confessional distribution of the population, and by a series of constitutional conventions whereby, e.g., the President is always a Maronite Christian, the Prime Minister a Sunni Moslem and the Speaker of the Chamber a Shia Moslem. There is no highly developed party system other than on religious confessional lines.

#### INTERNATIONAL RELATIONS

Membership. Lebanon is a member of UN and the Arab League

#### **ECONOMY**

**Planning.** Since the civil war a Development and Reconstruction Council has been responsible for co-ordinating all efforts

Budget. The budget for 1985 provides for a total expenditure of £Leb.10,000m

Currency. The Lebanese pound, divided into 100 piastres, is issued by the Banque du Liban, which commenced operations on 1 April 1964. There is a fluctuating official rate of exchange, fixed monthly (March 1986. £Leb.27.93 = £1 sterling, £Leb 19.45 = US\$1), this in practice is used only for the calculation of ad-valorem customs duties on Lebanese imports and for import statistics. For other purposes the free market is used.

Banking. Beirut was an important international financial centre, and there were about 80 banks registered with the central bank in 1979, including 2 British banks, the British Bank of the Middle East and the Chartered Bank. As a result of the civil war in 1975–76, Beirut lost much of its status as an international and regional banking centre, in general only local offices for banks remain

Weights and Measures. The use of the metric system is legal and obligatory throughout the whole of the country. In outlying districts the former weights and measures may still be in use. They are 1 okiya = 0.47 lb, 6 okiya = 1 oke = 2.82 lb, 2 okes = 1 rottol = 5.64 lb; 200 okes = 1 kantar

#### ENERGY AND NATURAL RESOURCES

Oil. There are 2 oil refineries in Lebanon, one at Tripoli, which refines oil brought by ship from Iraq, and the other at Sidon, which refines oil brought from Saudi Arabia by a pipeline owned by the Trans-Arabian Pipeline Co These refineries were not fully active in 1984 and the country depends on imports.

Minerals. Iron ore exists but is difficult to work Other minerals known to exist are iron pyrites, copper, bituminous shales, asphalt, phosphates, ceramic clays and glass sand, but the available information is of doubtful value

Agriculture. Lebanon is essentially an agricultural country, although owing to its physical character only about 38% of the total area of the country is at present cultivated

The estimated yield (in 1,000 tonnes) of the main crops in 1982 was as follows Citrus fruits, 315; apples, 130, grapes, 161, potatoes, 126; sugar-beet, 61, wheat, 23, bananas, 15, olives, 75 No reliable estimates available for 1984.

#### INDUSTRY AND TRADE

Industry. Industry suffered badly during the civil war The manufacturing industry was small but had doubled in size in the 10 years before the war As a result of the war some industrial concerns have closed but others are working at reduced capacity.

Commerce. Foreign as well as local wholesale and retail trade is the principal source of income in Lebanon and provides about 31% of the total Because of the protectionist policies followed in some neighbouring countries, this sector has been declining, the sectors to gain being those of banking, real estate, government and services.

In 1978 imports were estimated at £Leb 5,220m., exports were valued at £Leb 1,639m Imports came mainly from USA, Federal Republic of Germany, France, Italy and UK Exports went mainly to Saudi Arabia, Kuwait, Syria, Libya and Iraq. Reliable trade figures have not been published in recent years

Total trade between Lebanon and UK (British Department of Trade returns, in

£1,000 sterling).	1981	1982	1983	1984	1985
Imports to UK	7,470	24,237	11,521	6,859	7,888
Exports and re-exports from UK	61,945	67,640	81,435	76,223	52,751

Customs duties are usually imposed on an ad-valorem basis the receipts are the Lebanese Government's main source of income, actual yield in 1978, £Leb 509m The considerable adverse balance of trade is offset by invisible receipts, including foreign capital investment in Lebanese real estate, remittances from émigrés and receipts from tourism and international arbitrage operations

**Tourism.** Receipts from tourism were £Leb 573m in 1973, since 1975 they have been negligible, this sector having suffered badly as a result of the war

# LIBERIA

Capital Monrovia
Population 1 9m (1984)
GNP per capita US\$470 (1983)

HISTORY. The Republic of Liberia had its origin in the efforts of several American philanthropic societies to establish freed American slaves in a colony on the West African coast. In 1822 a settlement was formed near the spot where Monrovia now stands. On 26 July 1847 the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognized by Great Britain and France, and ultimately by other powers.

On 12 April 1980, President Tolbert was assassinated, his government was overthrown and the Constitution suspended President Tolbert's party, the True Whig Party, was formed in 1860 and had been in power since 1870. Recent economic decline and pressure for change had undermined the Government. In March 1980, the newly formed People's Progressive Party was banned and its leaders arrested. HISTORY. Tripoli fell under Turkish domination in the 16th century, and though in 1711 the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet In Sept 1911 Italy occupied Tripoli and on 19 Oct 1912, by the Treaty of Ouchy, Turkey recognized the sovereignty of Italy in Tripoli

After the expulsion of the Germans and Italians in 1942 and 1943, Tripolitania and Cyrenaica were placed under British, and the Fezzan under French, military administration Britain recognized the Amir Mohammed Idris Al-Senussi as Amir

of Cyrenaica in June 1949.

Libya became an independent, sovereign, federal kingdom under the Amir of Cyrenaica, Mohammed Idris Al-Senussi, as King of the United Kingdom of Libya, on 24 Dec 1951, when the British Residents in Tripolitania and Cyrenaica and the French Resident in the Fezzan transferred their remaining powers to the federal government of Libya, in pursuance of decisions passed by the United Nations in 1949 and 1950

On 1 Sept 1969 King Idris was deposed by a group of army officers. Twelve of the group of officers formed the Revolutionary Command Council chaired by Col Muammar Qadhafi and proclaimed a republic

AREA AND POPULATION. Libya is bounded north by the Mediterranean Sea, east by Egypt and Sudan, south by Chad and Niger and west by Algeria and Tunisia The area is estimated at 1,759,540 sq km (679,358 sq miles) The population, at the census of 1973, was 2,249,237 Estimate (1985) 3,838,000

In 1981, 54% of the population was urban The chief cities are Tripoli, 980,000; Benghazi, 650,000; Misurata, 285,000, Zavia, 247,000, Sebha (the main town in the southern province) 113,000

the southern province, 115,000

CLIMATE. The coastal region has a warm temperate climate, with mild wet winters and hot dry summers, though most of the country suffers from aridity Tripoli Jan 52°F (11 1°C), July 81°F (27 2°C) Annual rainfall 16" (400 mm) Benghazi. Jan 56°F (13 3°C), July 77°F (25°C) Annual rainfall 11" (267 mm)

CONSTITUTION AND GOVERNMENT. Under the new 1977 Constitution, Libya is now divided into 25 municipalities and 126 'Basic People's Congresses', which form the primary level of government The General People's Congress, created in Jan. 1976 as the national legislature, comprises 3 delegates from each of the 186 Basic People's Congresses. The General People's Committee, which replaced the Council of Ministers, is assisted by the 5-member General People's Secretariat, which replaced the Revolutionary Command Council. It was ruled by the Revolutionary Command Council (RCC) under the leadership of Col. Muammar Qadhafi.

In March 1977 a new form of direct democracy, the 'Jamahiriya' (state of the masses) was promulgated and the official name of the country was changed to Socialist Peoples Libyan Arab Jamahiriya. At local level authority is now vested in 186 Basic and 25 Municipal People's Congresses which appoint Popular Committees to execute policy. Officials of these Congresses and Committees form at national level the General People's Congress, a body of some 1,000 delegates which

normally meets for about a week twice a year. This is the highest policy-making body in the country. The General People's Congress appoints its own General Secretariat and the General People's Committee, whose members head the 20 government departments which execute policy at national level. The Secretary of the General People's Committee has functions similar to those of a Prime Minister.

Following the re-organization of March 1979 Col. Qadhafi retained his position as leader of the Revolution But neither he nor his former RCC colleagues have any formal posts in the new administration.

### INTERNATIONAL RELATIONS

Membership. Libya is a member of UN, OAU and the Arab League

#### **ECONOMY**

**Planning.** Declining oil revenues (50% down on 1980 levels) has meant postponing of most projects envisaged in the 5-year development plan (1981-85)

**Budget.** A development budget of LD2,370m. was announced for 1983 but is likely to be under-spent by 50%

Currency. The currency is the Libyan dinar which is divided into 1,000 millemes. Rate of exchange, March 1986 LD 0 43 = £1, LD 0 30 = US\$1.

Banking. A National Bank of Libya was established in 1955, it was renamed the Central Bank of Libya in 1972. All foreign banks were nationalized by Dec 1970 In 1972 the Libyan Government set up the Libyan Arab Foreign Bank whose function is overseas investment and to participate in multinational banking corporations. The National Agricultural Bank, which has been set up to give loans and subsidies to farmers to develop their land and to assist them in marketing their crops, has offices in Tripoli, Benghazi, Sebha and other agricultural centres. The National Industrial and Real Estate Bank has been divided to form a Real Estate Bank to provide loans for house-buyers and the Development Bank to finance industrial projects.

Weights and Measures. Although the metric system has been officially adopted and is obligatory for all contracts, the following weights and measures are still used okc = 1 282 kg, kantar = 51 28 kg, draa = 46 cm, handaza = 68 cm

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Electricity output capacity in 1980 was 1,950 mw and under the development plan was scheduled to rise to 3,878 mw by 1985 Production (1984) 11,870m kwh.

Oil. Production (1985) 50m tonnes Reserves (1981) 21,000m bbls The Libyan National Oil Corporation (NOC) was established in March 1970 to be the state's organization for the exploitation of Libya's oil resources NOC does not participate in the production of oil but has a majority share in all the operating companies with the exception of two small producers Aquitaine-Libya and Wintershall Libya.

The largest producers are Oasis (59 2% NOC, Marathon and Conoco, 16 3% and Amerada Hess 8 2%) and AGOCO (100% NOC) who together produce more than 50% of total production. The other significant producers are Occidental Libya (51% NOC, 49% Occidental US) AGIP N A M E. (50% NOC, 50% AGIP Italy) SIRTE Oil Co. (formerly ESSO Libya until EXXON withdrew in Oct. 1981) and Mobil Oil Libya Ltd. (82 8% NOC, 17 2% Veba-Gelsenberg) who continue to use the Mobil name despite the fact that Mobil Inc. followed EXXON's example and withdrew in July 1982.

Gas. Reserves (1982) 670,000m cu metres Production (1982) 29,000m cu metres In 1983 a gas pipeline was under construction which will take gas from Brega, along the coast to Misurata

Minerals. There were (1984) 5 cement factories with a capacity of 4 75m tonnes per annum. Two new plants were under construction in 1984 with a capacity of 2 5m. tonnes. Gypsum output (1982) 172,400 tonnes. Iron ore deposits have been found in the south.

Agriculture. Tripolitania has 3 zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 sq. miles, is the only one properly suited for agriculture, and may be further sub-divided into: (1) the oases along the coast, the richest in North Africa, in which thrive the date palm, the olive, the orange, the peanut and the potato; (2) the steppe district, suitable for cereals (barley and wheat) and pasture, it has olive, almond, vine, orange and mulberry trees and ricinus plants, (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine, (4) the Jebel (the mountain district, Tarhuna, Garian, Nalut-Yefren), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the fertile hills of Msellata Of some 25m acres of productive land in Tripolitania, nearly 20m are used for grazing and about 1m. for static farming. The sub-desert zone produces the alfa plant. The desert zone and the Fezzan contain some fertile oases, such as those of Ghadames, Ghat, Socna, Sebha, Brak.

Cyrenaica has about 10m. acres of potentially productive land, most of which, however, is suitable only for grazing. Certain areas, chief of which is the plateau known as the Barce Plain (about 1,000 ft above sea-level), are suitable for dry farming, in addition, grapes, olives and dates are grown. With improved irrigation, production, particularly of vegetables, could be increased, but stock raising and dry farming will remain of primary importance. About 143,000 acres are used for settled farming; about 272,000 acres are covered by natural forests. The Agricultural Development Authority plans to reclaim 6,000 hectares each year for agriculture. In the Fezzan there are about 6,700 acres of irrigated gardens and about 297,000 acres are planted with date palms.

Production (1984, in tonnes). Wheat, 150,000, barley, 70,000, milk, 67,000, meat, 150,000. Olive trees number about 3 4m and productive date-palm trees about 3 m.

Livestock (1984) 4 8m sheep, 1 5m goats, 200,000 cattle, 7m poultry

Fisheries. The catch in 1982 was 7,425 tonnes

### INDUSTRY AND TRADE

Industry. Among the traditional industries of Tripolitania and Cyrenaica are sponge fishing, tunny fishing, tobacco growing and processing, dyeing and weaving of local wool and imported cotton yarn, and olive oil Tripolitania also produces bricks, salt, leather and esparto grass for paper-making. Home industries of both territories include the making of matting, carpets, leather articles and fabrics embroidered with gold and silver. The Government has embarked on an ambitious programme of industrial development aimed at the local manufacture of building materials (steel and aluminium pipes and fittings, electric cables, cement, bricks, glass, etc.), foodstuffs (dairy products, flour, tinned fruits and vegetables, dates, fish processing and canning, etc.), textiles and footwear (ready-made clothing, woollen and cotton cloth, blankets, leather footwear, etc.) and development of mineral deposits (iron ore, phosphates, mineral salts). Small scale private sector industrialization is encouraged by government loans and subsidies. From 21 Sept. 1969 all businesses were Libyan-owned, but oil companies and banks were excluded

EVENT. Two earthquakes struck Mexico City and nearby states on 19-20 Sept 1985 causing at least 4,200 deaths and making over 30,000 homeless

#### INTERNATIONAL RELATIONS

Membership. Mexico is a member of UN, OAS and ALADI (formerly LAFTA)

External Debt. The public sector external debt (Dec. 1983) was US\$62,556m. and private sector US\$14,000m.

#### **ECONOMY**

**Budget.** The 1984 budget provides for expenditure of 12,023,282m pesos.

Currency. The monetary unit is the peso divided into 100 centavos. There are coins of 20 and 50 centavos and 1, 5, 10, 50 and 100 pesos; and banknotes of 100, 500, 1,000, 2,000, 5,000 and 10,000 pesos.

Rate of exchange, March 1986: 442 pesos = US\$1; 623 pesos = £1

Banking. The Bank of Mexico, established 1 Sept. 1925, is the central bank of issue; it is modelled on the Federal Reserve system, with large powers to 'manage' the currency. On 1 Sept. 1982 the private banking sector was nationalized.

Weights and Measures. The metric system was introduced in 1896, and its sole use is enjoined by law of 14 Dec. 1928

# **ENERGY AND NATURAL RESOURCES**

Electricity. In 1984 the 498 generating plants had installed capacity of 19 36m kw (34% hydro-electric) Production (1983) 79,951m kwh

Oil. The chief Mexican oilfields had proven reserves of oil and gas, in 1983, of 72,500m bbls. In 1982 the oil industry generated 6 3% of the GDP and supplied about 85% of the energy consumed in the country. Since the nationalization of the industry in 1938, Petróleos Mexicanos, a government-owned enterprise, has exclusive rights to the exploitation, refining and sale of oil and its by-products. Initially centred on the northeast coasts of the Gulf of Mexico, the industry developed with the discovery of rich fields in the south and southeast, particularly in Veracruz, Tabasco and Chiapas. Offshore wells and those from the southeast now provide the main yields. Exploration has been primarily in recent years in deep waters on the continental shelf in the Gulf coast area, as well as in the northern and southern zones inland. Crude petroleum output was 165m tonnes in 1985.

Gas. Natural gas production came to 38.892m cu metres in 1984

Minerals. Uranium deposits were di covered in the states of Chihuahua, Durango, Sonora and Queretaro in 1959, rich deposits have been located in Nuevo León Total reserves (proven 1982) 15,000 tonnes of uranium 308, potential reserves, 150,000 tonnes.

Silver output (tonnes) was 1,987 in 1984, gold 7,058 kg

Mexico has large coal resources, calculated at 5,448m tonnes, including 1,675m tonnes (65% cokeable) including high-grade coking coal in Coahuila

Output, 1984 (in 1,000 tonnes) Lead, 183, copper, 189, zinc, 290, fluorite, 627, pig iron, 5,489; sulphur, 1,826, manganese, 181, gypsum, 2,300, phosphorus, 518, barite, 426.

Agriculture. About 80% of Mexico's territory is unsuitable for agriculture. Irrigation is needed, 50% of the land having less than 500 mm of rain a year. In 1981 Mexico had 21 9m, hectares of arable land, 74 4m, hectares of meadows and pastures, 48 1m, hectares of forests, 1 6m, hectares of permanent crops and 40 6m, hectares of other land. In 1980, the government launched the Sistema Alimentario Mexicano to raise food production and rationalize land tenure, with the aim of achieving self-sufficiency in basic crops. Grains occupy most of the cultivated land, with about 43% given to maize, 10% to sorghuni and 5% to wheat. In 1982 there were 146,083 tractors. It is estimated that Mexico should be self-supporting with at least 17m, hectares of land under irrigation and 20.3m, hectares under cultivation.

Livestock (1984) Cattle, 37 5m., sheep, 6.4m, pigs, 18 37m.; horses, 5 65m., goats, 10m, mules, 3 62m; donkeys, 2 82m, poultry, 213m

Mexico's basic food crop is maize, and a rapid expansion of this crop is one of the chief aims of Mexican agricultural policy, balanced by the demand for 'cash crops' for export, such as cotton, sugar, garbanzos (chick peas), bananas, winter vegetables and coffee

Production of crops for 1983 was as follows (in 1,000 tonnes)

Crop	1983	Crop	1983	Crop	1983
Maize	13,191	Sugar-cane	33,860	Oranges	1,758
Sorghum	4.827	Tomatoes	1,300	Bananas	1,382
Wheat	3,491	Potatoes	910	Lemons	601
Barley	557	Dry beans	1,296	Pineapples	635
Rice	1,416	Soybeans	687	Apples	312
Cottonseed	340	Coconuts	1131	Grapes	478
Cotton lint	182	Coffee	313	Mangoes	750
		1 198	1	•	

Sugar-cane is linked closely with the export markets, although not to the same degree as coffee, in view of the fact that despite the large crop, the national consumption of sugar, at approximately 35 kg a year per person, is one of the highest in the world. Exports have however remained more or less stable: 1972 exports represented 25% of total output.

Forestry. Forests extended over 48m. hectares in 1981, containing pine, spruce.

cedar, mahogany, logwood and rosewood. There are 14 forest reserves (nearly 800,000 hectares) and 47 national park forests of 750,000 hectares. In 1983 total roundwood production amounted to 8 75m. cu. metres.

Fisheries. Catch (1983, in tonnes) sardines, 303,290, anchoveta, 84,662, shrimp and prawns, 67,555, oysters, 27,810, tunny, 17,541, shark, 17,436, sea perch (mojarras), 63,989, sea bass, 10,723 Total catch in 1983 was 972,627 tonnes

# INDUSTRY AND TRADE

Industry. In 1983, the primary sector (agriculture etc.) provided 7.9% of GDP, the mining, oil and petrochemical industry 11.2%, manufacturing and construction 27.4% and the service sector (commerce, transport and communications, power supply and other services) 54.6%

**Labour.** In 1980, the economically active population was 22,066,084, of whom 5 7m were engaged in the primary sector and 2 6m in manufacturing Approximately 5m people belong to trade unions, of whom 85% are affiliated to the *Congreso del Irahajo*.

#### COMMUNICATIONS

**Roads.** Total length, (1982) 214,073 km, of which 1,178 km were motorways. Motor vehicles registered in 1982 comprised 5,221,159 passenger cars, and 1,978,327 commercial vehicles

Railways. In 1937 the main railway lines were nationalized. The principal group is the *Ferrocarriles Nacionales de México*, with 25,474 km of track. Three lines (215 km) remain privately owned. In 1984, FNM carried 60m tonnes of freight and 20 8m passengers. In Mexico City an urban railway system opened in 1969 had 105 km of track and 7 lines in 1985. In 1984 it carried 1,250m passengers.

### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Magistrates of the Supreme Court are appointed for 6 years by the President and confirmed by the Senate, they can be removed only on impeachment. The courts include the Supreme Court with 21 magistrates, 12 collegiate circuit courts with 3 judges each and 9 unitary circuit courts with 1 judge each, and 68 district courts with 1 judge each.

The penal code of I Jan 1930 abolished the death penalty, except for the armed forces, and set up a commission of alienists and other specialists, in place of courts, to deal with criminal cases (for federal offences), each state also appoints its own local magistrates

The Mexican Constitution provides a guarantee of individual rights by means of a judicial procedure known as *amparo*, which gives any injured person whose constitutional rights have, in his opinion, been infringed, right to immediate access to the courts and full remedy, combining the swiftness of the Anglo-Saxon writ of habe as corpus and the breadth of remedy available through the injunction

Religion. The prevailing religion is the Roman Catholic (92 6% of the population in 1980), with (1983) 3 cardinals, 12 archbishops and 87 bishops, but by the constitution of 1857, the Church was separated from the State, and the constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property, and since 1917 the property of the Church has been held to belong to the State In the 1920s the Government suppressed the political influence of the priesthood and temporarily (1929--31) closed the churches An understanding between State and Church was, however, reached, and all churches eschewing public affairs flourish freely. At the 1980 census there were also 3 3% Protestants, and 4 1% members of other religions

Education. Primary and secondary education is free and compulsory, and secular Clergy are forbidden to establish primary schools. All private schools must conform to government standards. In the Federal District education is controlled by the national government, elsewhere by the state authorities.

HISTORY. The island was discovered by Capt Fearn in 1798, annexed by Germany in Oct 1888, and surrendered to the Australian forces in 1914. It was administered under a mandate, effective from 17 Dec 1920, conferred on the British Empire and approved by the League of Nations until 1 Nov 1947, when the United Nations General Assembly approved a trusteeship agreement with the governments of Australia, New Zealand and UK as joint administering authority. Independence was gained in 1968.

AREA AND POPULATION. The island is situated 0° 32'S lat and 166° 56' E long. Area, 5,263 acres (2,130 hectares) It is an oval-shaped upheaval coral island of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide. There is no deep water harbour but offshore moorings, reputedly the deepest in the world, are capable of holding medium-sized vessels, including 30,000 tonne capacity bulk carriers. On the seaward side the reef dips abruptly into the deep waters of the Pacific at an angle of 45° On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 150 to 300 yd and completely encircling the island. There is an extensive plateau bearing phosphate of a high grade, the mining rights of which were vested in the British Phosphate Commissioners until 1 July 1970, subject to the rights of the Nauruan landowners. In July 1970 the Nauru Phosphate Corporation assumed control and management of the enterprise. It is chiefly on the fertile section of land between the sandy beach and the plateau that the Nauruans have established themselves With the exception of a small fringe round a shallow lagoon, about 1 mile inland, the plateau, which contains the phosphate deposits, has few foodbearing trees and is not settled by the Nauruans.

At the census held on 22 Jan. 1977 the population totalled 7,254, of whom 4,174 were Nauruans Estimate (1983) 8,421

CONSTITUTION AND GOVERNMENT. A Legislative Council was established by the Nauru Act, passed by the Australian Parliament in Dec 1965 and was inaugurated on 31 Jan 1966. The trusteeship agreement terminated on 31 Jan. 1968, on which day Nauru became an independent republic but having special relationship with the Commonwealth. The interests in the phosphate deposits were purchased in 1919 from the Pacific Phosphate Company by the governments of the UK, the Commonwealth of Australia and New Zealand at a cost of £Stg3 5m., and a Board of Commissioners representing the 3 governments was appointed to manage and control the working of the deposits In May 1967, in Canberra, the British Phosphate Corporation agreed to hand over the phosphate industry to Nauru and on 15 June 1967 agreement was reached that the Nauruans could buy the assets of the B.P.C. for

HISTORY. William of Orange (1533-84), as the German count of Nassau, inherited vast possessions in the Netherlands and the Princedom of Orange in France He was the initiator of the struggle for independence from Spain (1568-1648), in the Republic of the United Netherlands he and his successors became the 'first servants of the Republic' with the title of 'Stadhouder' (governor) In 1689 William III acceded to the throne of England, becoming joint sovereign with Mary II, his wife William III died in 1702 without issue, and after a stadhouderless period a member of the Frisian branch of Orange-Nassau was nominated hereditary stadhouder in 1747, but his successor, Willem V, had to take refuge in England, in 1795, at the invasion of the French Army In Nov. 1813 the United Provinces were freed from French domination

The Congress of Vienna joined the Belgian provinces, the 'Austrian Netherlands' before the French Revolution, to the Northern Netherlands. The son of the former stadhouder Willem V was proclaimed King of the Netherlands at The Hague on 16 March 1815 as Willem I. The union was dissolved by the Belgian revolution of 1830, and the treaty of London, 19 April 1839, constituted Belgium an independent kingdom

The 'Delta-project', scheduled to be completed in the 1980s, comprises the building of (semi) enclosure dams in the estuaries between the islands in the south-western part of the country, excluding the sea-entrances to the ports of Rotterdam and Antwerp, it will also create fresh-water reservoirs. CONSTITUTION AND GOVERNMENT. According to the Constitution of the Kingdom of the Netherlands, the Kingdom consists of the Netherlands, Aruba and the Netherlands Antilles. Their relations are regulated by the 'Statute' for the Kingdom, which came into force on 29 Dec 1954. Each part enjoys full autonomy; they are united, on a footing of equality, for mutual assistance and the protection of their common interests.

The first Constitution of the Netherlands after its restoration as a Sovereign State was promulgated in 1814. It was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King), 1840 (after the secession of the Belgian provinces), 1848, 1884, 1887, 1917, 1922, 1938, 1946, 1948, 1953, 1956, 1963, 1972 and 1983

The Netherlands is a constitutional and hereditary monarchy. The royal succession is in the direct male or female line in the order of primogeniture. The Sovereign comes of age on reaching his 18th year. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the Council of State.

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament (the Staten-Generaal), consisting of 2 Chambers After the 1956 revision of the Constitution the Upper or First Chamber is composed of 75 members, elected by the members of the Provincial States, and the Second Chamber consists of 150 deputies, who are elected directly from all Netherlands nationals who are aged 18 or over on polling day Members of the States-General must be Netherlanders or recognized as Netherlands subjects and 21 years of age or over, they may be men or women They receive an allowance

First Chamber (as constituted in 1983). Labour Party, 17, Christian Democratic Appeal, 26, People's Party for Freedom and Democracy, 17, Democrats '66, 6, Party of Political Radicals, 1, Communist Party, 2, Pacifist Socialist Party, 2, Calvinist Party, 2; Reformed Political Federation, 1, Calvinist Political Union, 1.

Second Chamber (elected on 8 Sept. 1982). Labour Party, 47; Christian Democratic Appeal, 45; People's Party for Freedom and Democracy, 36; Democrats '66, 6, Communist Party, 3; Party of Political Radicals, 2, Pacifist Socialist Party, 3, Calvinist Party, 3; Reformed Political Federation, 2, Calvinist Political Union, 1, Evangelical People's Party, 1; Conservative Nationalist Party, 1.

The revised Constitution of 1917 has introduced an electoral system based on universal suffrage and proportional representation. Under its provisions, members of the Second Chamber are directly elected by citizens of both sexes who are Netherlands subjects not under 18 years (since 1972).

The members of the First Chamber and of the Second Chamber are elected for 4 years, and retire in a body. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, subject to the condition that new elections take place within 40 days, and the new House or Houses be convoked within 3 months.

Both the Government and the Second Chamber may propose Bills; the First

Chamber can only approve or reject them without inserting amendments. The meetings of both Chambers are public, though each of them may by a majority vote decide on a secret session. It is a fixed custom, that Ministers and Secretaries of State, on their own initiative or upon invitation of the Parliament, attend the sessions to defend their policy, their budget, their proposals of Bills, etc., when these are in discussion. A Minister or Secretary of State, however, cannot be a member of Parliament at the same time.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the oversea part of the kingdom, the Netherlands Antilles

Every act of the Sovereign has to be covered by a responsible Minister

The Ministry, a coalition of Christian Democrats and Liberals, was composed as follows in March 1986

Prime Minister Ruud Lubbers (CDA)

Deputy Prime Minister and Economic Affairs Gijs van Aardenne (VVD) Foreign Affairs Hans van den Broek (CDA) Finance Herman Ruding (CDA) Defence Jacob de Ruiter (CDA) Development Aid Co-operation Eegje Schoo (VVD) Social Affairs and Employment Jan de Koning (CDA) Home Affairs Hans Wiegal (VVD) Justice Frits Korthals Altes (VVD) Agriculture and Fisheries Gerrit Braks (CDA) Welfare, Public Health and Culture Elco Brinkman (CDA). Education and Science Wim Deetman (CDA) Transport and Public Works Neelie Smit-Kroes (VVD) Housing, Physical Planning and Environment Pieter Winsemius (VVD)

There are also 16 state secretaries

The Council of State (Raad van State), appointed by the Crown, is composed of a vice-president and not more than 28 members. The Queen is president, but the day-to-day running of the council is in the hands of the vice-president. The Council can be consulted on all legislative matters. Decisions of the Crown in administrative disputes are prepared by a special section of the Council.

The Hague is the seat of the Court, Government and Parliament, Amsterdam is

National flag Three horizontal stripes of red, white, blue

Local Government The kingdom is divided in 12 provinces and about 720 municipalities The creation of a new province in the Zuiderzee area is in preparation Each province has its own representative body, the Provincial States The members must be 21 years of age or over, they are elected for 4 years, directly from the Netherlands inhabitants of the province who are 18 years of age or over. The electoral register is the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 83 for Zuid-Holland to 43 for Zeeland. The Provincial States are entitled to issue ordinances concerning the welfare of the province, and to raise taxes pursuant to legal provisions. The provincial budgets and the provincial ordinances and resolutions relating to provincial property, loans, taxes, etc., must be approved by the Crown. The members of the Provincial States elect the First Chamber of the States-General They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputy States', is charged with the executive power and, if required, with the enforcement of the law in the province. Deputy as well as Provincial States are presided over by a Commissioner of the Queen, appointed by the Crown, who in the former assembly has a deciding vote, but attends the latter in only a deliberative capacity. He is the chief magistrate in the province. The Commissioner and the members of the Deputy States receive an allowance.

\*Each municipality forms a Corporation with its own interests and rights, subject

to the general law, and is governed by a Municipal Council, directly elected from the Netherlands inhabitants, and, under certain circumstances, non-Netherlands inhabitants of the municipality who are 18 years of age or over, for 4 years All Netherlands inhabitants and non-Netherlands inhabitants who meet certain requirements aged 21 or over are eligible, the number of members varying from 7 to 45, according to the population The Municipal Council has the right to issue bye-laws concerning the communal welfare. The total peacetime strength amounts to 71,400, including Military Police. The number of regulars is 24,000. The Army also employs 13,000 civilians. The legal period of active service for national servicemen is 22–24 months, the actual service period is 16 months for reserve-officers and n.c o s and 14 months for other ranks. The balance is spent as 'short leave'. After their period of actual service or short leave, conscript personnel are granted long leave. Some units in the Netherlands are earmarked for assignment to the United Nations as peace-keeping forces. Since Dec. 1983 an infantry company, composed of regulars and conscripts, has been involved in the UN peace-keeping operations in Lebanon. For civil defence purposes there are a number of mobilizable fire-fighting, rescue and medical battalions. The army is responsible for the training of these units which in time of war are placed under the command of the National Commander of the Civil Defence

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district courts and by 62 cantonal courts; trial by jury is unknown. All judges are appointed for life by the Sovereign (the judges of the High Court from a list prepared by the Second Chamber of the States-General). They can be removed only by a decision of the High Court.

At the district court the juvenile judge is specially appointed to try children's civil cases and at the same time charged with administration of justice for criminal actions committed by young persons between 12 and 18 years old, unless imprisonment of 6 months or more ought to be inflicted, such cases are tried by 3 judges

### THE NETHERLANDS ANTILLES

## De Nederlandse Antillen

Editorial note Aruba is from 1 Jan 1986 no longer a part of Netherlands Antilles, but full details of its status were only coming through as this edition of THE STATESMAN'S YEAR-BOOK was going to press.

AREA AND POPULATION. The Netherlands Antilles are an integral part of the Netherlands and comprise two groups of islands, viz, the Leeward Islands, Curação and Bonaire, and the Windward Islands, St Maarten, St Eustatius and Saba The Leeward Islands are situated 40–70 miles north of the Venezuelan coast between 12° and 13° N lat and 68° and 71° W long. The Windward group lies east of Puerto Rico For the constitutional position of the Netherlands Antilles see p 883. The total area is 993 sq km (383 sq miles) and the population, including Aruba, was 260,000 in 1983

		Popula-			Popula-
I eeward group	Sq km	tion	Windward group	Sa km	tion
Curação	444	165.011	St Maarten (St Martin) <sup>1</sup>	34	15,926
Bonaire	288	9,704	St Eustatius	21	1,335
		•	Saba	13	1.010

<sup>1</sup>The southern part belongs to the Netherlands Antilles, the northern to France

The capital is Willemstad on Curação, population (1983) 50,000 In 1975, 4,258 births, 1,193 deaths and 1,536 marriages were registered

CLIMATE. All the islands have a tropical marine climate, with very little difference in temperatures over the year. There is a short rainy season from Oct. to Jan Willemstad. Jan. 79°F (26. 1°C), July 82°F (27. 8°C). Annual rainfall 23" (582 mm)

GOVERNMENT. Since Dec 1954, the Netherlands Antilles have been fully autonomous in internal affairs, and constitutionally equal with the Netherlands and Suriname The Sovereign of the Kingdom of the Netherlands is Head of the Government of the Netherlands Antilles and is represented by a Governor.

The executive power in internal affairs rests with the Governor and the Council of Ministers, who together form the Government. The Ministers are responsible to the unicameral legislature (Staten). This consists of 22 members (12 from Curação, 8 from Aruba, 1 from Bonaire, 1 from the Windward Islands) and is elected by general suffrage. It was agreed in 1977 that the 2 smallest islands, Saba and St Eustatius would each have a representative (non-voting) in the Staten.

The executive power in external affairs is vested in the Council of Ministers of the Kingdom, in which the Antilles is represented by a Minister Plenipotentiary with full voting powers.

In 1951 the Netherlands Antilles Islands Regulation provided for self-government of each of the 4 insular communities Aruba, Bonaire, Curação and the Windward Islands The autonomous powers of the insular communities are divided between the Island Council (elected by general suffrage), the Executive Council and the Lieut -Governor (Gezaghebber), who is responsible for maintaining public peace and order

General elections were held on 22 Nov. 1985.

Dutch is the official language. In addition a 'lingua franca', *Papiamento* has evolved out of Spanish, Dutch and some other languages

FINANCE. The central budget for 1984 envisaged 342m guilders revenue and 394m. guilders expenditure.

The official rate of exchange was £1 = 258 Antillian guilder, US\$1 = 180 Antillian guilder in March 1986.

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Production (1984) totalled 1,517m. kwh.

Oil. The economy of the Netherlands Antilles is almost entirely based on the refining of oil imported from Venezuela to Curaçao and Aruba About 25% (Curaçao) and 30% (Aruba) of the gainfully occupied are working at the refineries or their shipping establishments. On account of the activities of the oil companies (affiliated to the Royal Dutch/Shell and the Standard Oil of New Jersey), the prosperity on Curaçao and Aruba is good in comparison with the other islands. Refinery production (1981) 25m tonnes.

Minerals. About 100,000 tons of calcium phosphate are annually mined in Curação

Agriculture. Livestock (1984). Cattle, 9,000, goats, 23,000

#### INDUSTRY AND TRADE

Industry. Curação has a paint factory, 2 cigarette factories, a textile factory, a brewery and some smaller industries. The Texas Instruments Co and Electronic Fabriek have established electronic factories. Almost all products needed for consumption and production are imported, as the rocky soil permits little agriculture and local fishing is insufficient for home consumption. Bonaire has a textile factory and a modern-equipped salt plant. St Maarten has a rum factory and fishing is important. St Eustatius and Saba are of less economic importance.

Trade (1980) Total imports amounted to US\$5,944m, total exports to US\$6,054m

Total trade between the Netherlands Antilles and UK (British Department of Trade returns, in £1,000 sterling)

### **NEW ZEALAND**

Capital Wellington
Population 3 2m (1984)
GNP per capita. US\$7,410 (1983)

HISTORY. The first European to discover New Zealand was Tasman in 1642. The coast was explored by Capt. Cook in 1769. From about 1800 onwards, New Zealand became a resort for whalers and traders, chiefly from Australia By the Treaty of Waitangi, in 1840, between Governor William Hobson and the representatives of the Maori race, the Maori chiefs ceded the sovereignty to the British Crown and the islands became a British colony Then followed a steady stream of British settlers

The Maoris are a branch of the Polynesian race, having emigrated from the eastern Pacific before and during the 14th century Between 1845 and 1848, and between 1860 and 1870, misunderstandings over land led to war, but peace was permanently established in 1871, and the development of New Zealand has been marked by racial harmony and integration

AREA AND POPULATION. New Zealand lies south-east of Australia in the south Pacific, Wellington being 1,983 km from Sydney by sea There are two principal islands, the North and South Islands, besides Stewart Island, Chatham Islands and small outlying islands, as well as the territories overseas (see pp 911-13).

New Zealand (*ie*, North, South and Stewart Islands) extends over 1,750 km from north to south Area, excluding territories overseas, 268,704 sq km, North Island, 11,469,000 hectares, South Island, 15,046,000 hectares, Stewart Island, 174,000 hectares, Chatham Islands, 96,000 hectares, minor islands, 82,900 hectares Census population, exclusive of territories overseas

The census of New Zealand is quinquennial, but the census falling in 1931 was abandoned as an act of national economy, and owing to war conditions the census due in 1941 was not taken until 25 Sept 1945

CLIMATE. Lying in the cool temperate zone, New Zealand enjoys very mild winters for its latitude owing to its oceanic situation, and only the extreme south has cold winters. The situation of the mountain chain produces much sharper climatic contrasts between east and west than in a north-south direction. Observations for 1983. #### **ENERGY AND NATURAL RESOURCES**

Electricity. The general policy of the Government in regard to electric power is to supply power in bulk, leaving the reticulation and retail supply in the hands of local authorities; some of these are cities and boroughs but most are electric power boards. During the year ending 31 March 1984 hydro energy provided 78% of the national electricity supply, the balance coming from coal, oil, natural gas and geothermal energy. The last is obtained from Wairakei in the thermal region, natural steam is used to drive the turbines.

The transmission systems of the North and South Islands are linked by a high-voltage direct-current transmission and 40 km of submarine cable in Cook Strait

Forestry. Of the 6.2m, hectares of indigenous forest, most is protected in National Parks or State Forests. Declining quantities of indigenous timber are being produced from restricted areas of State Forest and from privately owned forest. There are just over 1m, hectares of productive exotic forest, and this produces far more timber than the indigenous forests. Introduced pines form the bulk of the large exotic forest estate and among these radiata pine is the best multi-purpose tree, reaching log size in 25–30 years. Other species planted are Douglas fir and Eucalyptus species. The table below shows production of rough sawn timber in cu. metres for years ending 31 March:

Social Welfare. New Zealand's record for progressive legislation reaches back to 1898, when it was second only to Denmark in introducing non-contributory old-age pensions

The present system came into operation from 1 April 1972. It provides for retirement, unemployment, widowhood, invalidity and sickness, as well as hospital and other medical care. Since 1 April 1969 the scheme has been financed from general taxation. Previously there was a special social security tax on virtually all income of individuals and companies in excess of \$4 a week which met approximately three-quarters of the cost of the scheme, the balance being met from general taxation.

At 31 Dec. 1984 the current weekly rates of widows', invalids', sickness, domestic purposes, unemployment and miners' benefits were \$162.46 for a married couple, \$97.48 for an unmarried person aged 20 years or over, and \$75.02 for those under 20 years.

There are additional payments for dependent children.

All benefits except superannuation and family allowances are subject to an income test.

Family Benefit A family benefit of \$6 a week is payable for each dependent child.

Unemployment Benefit The payment is subject to the condition that the applicant is capable and willing to undertake suitable employment.

Sickness Benefit Payment is subject to medical evidence of incapacity of a person who has suffered a loss of weekly earnings as a result

Other benefits include emergency benefits and additional benefits for those in need but who either do not qualify for one of the standard benefits or who have special needs or commitments for which a benefit at the standard rate is insufficient

Medical, Hospital and Related Benefits Medical, hospital and other related benefits are also provided under the Social Welfare scheme. These consist mainly of the payment of certain fees for medical attention by private practitioners, free treatment in public and mental hospitals, certain fees for treatment in private hospitals, maternity benefits (including ante-natal and post-natal treatment and services of doctors and nurses at confinements), phaimaceutical benefits (medicines, drugs, etc., prescribed by medical practitioners), etc. There are also benefits in connexion with dental services up to the age of 16, X-ray diagnosis, massage, home-nursing, artificial aids, etc.

Pensions Provision is made for the payment of pensions and allowances to members or dependants of disabled, deceased or missing members, of the New Zealand Forces who served in the South African War, the two World Wars, the Korean War and the Vietnam War, to members of the New Zealand Mercantile Marine during the Second World War, or in connexion with any emergency whether arising out of the obligations undertaken by New Zealand in the Charter of the United Nations or otherwise Principal rates are. War pensions are payable to widows at a rate of \$50.76 a week, together with a mother's allowance of \$58.98 a week, increased by \$6 a week for each additional child, in addition to the normal child allowances of \$6 per week for each child. These rates may be increased by an amount not exceeding \$41.29 per week if the pensioner is suffering from total blindness, two or more serious disabilities or one extremely severe disability

An 'economic pension' is defined as a supplementary pension granted on economic grounds and is additional to any pension payable as of right in respect of death or disablement. The maximum weekly rates are \$81.23 to a married person (if unmarried, \$97.48), to the widow or dependent widowed mother of a member, \$97.48.

War veterans' allowances are \$97.48 weekly for a single person and \$81 23 for a married person, plus an equal amount to a wife, increased by \$1 50 a week each at age 65, subject to income qualifications

Domestic Purposes Benefit A domestic purposes benefit is payable to unsupported male and female solo parents including divorced, separated and unmarried persons, prisoners' spouses and also to those who are required to give full-time care to a person (other than their spouse) who would otherwise have to be admitted to hospital

Death Benefit A death benefit of \$1,000 is payable to a widow or widower if totally dependent on the deceased plus \$500 for each dependent child but not exceeding \$1,500

### MINOR ISLANDS

The minor islands (total area, 320 sq miles, 829 sq km) included within the geographical boundaries of New Zealand (but not within any local government area) are the following. Kermadec Islands (34 sq km), Three Kings Islands (8 sq km), Auckland Islands (114 sq km), Campbell Island (62 sq. km), Antipodes Islands (606 sq. km), Bounty Islands (1 sq. km), Snares Islands (3 sq. km), Solander Island (1 sq. km). With the exception of Raoul Island in the Kermadec Group (population, 5, 1981 census) and Campbell Island (population, 10, 1981 census) both of which have staffed meteorological stations, none of these islands is inhabited.

The **Kermadec Islands** were annexed to New Zealand in 1887, have no separate administration and all New Zealand laws apply to them. Situation, 29° 10′ to 131° 30′ S. lat., 177° 45′ to 179° W long, 600 miles NNE of New Zealand The largest of the group is Raoul or Sunday Island, 20 miles in circuit, while Macaulay Island is 3 miles in circuit.

### TERRITORIES OVERSEAS

Territories Overseas coming within the jurisdiction of New Zealand consist of Tokelau and the Ross Dependency

Tokelau. Situated some 480 km to the north of Western Samoa between 8° and 10° S lat, and between 171° and 173° W long, are the 3 atoll islands of Atafu, Nukunonu and Fakaofo of the Tokelau (Union) group Formerly part of the Gilbert and Ellice Islands Colony, the group was transferred to the jurisdiction of New Zealand on 11 Feb 1926 By legislation enacted in 1948, the Tokelau Islands were declared part of New Zealand as from 1 Jan 1949 The area of the group is 1,011 hectares; the population at census 2 Nov 1981 was 1,572

By the Tokelau Islands Act 1948 the Tokelau Group was included within the territorial boundaries of New Zealand, legislative powers are now invested in the Governor-General in Council The inhabitants are British subjects and New Zealand citizens. In Dec. 1976 the territory was officially renamed 'Tokelau', the name by which it has customarily been known to its inhabitants.

From 8 Nov 1974 the office of Administrator was invested in the Secretary of Foreign Affairs Certain powers are delegated to the district officer in Apia, Western Samoa

Because of the very restricted economic and social future in the atolls, the islanders agreed to a proposal put to them by the Minister of Island Territories in 1965 that over a period of years most of the population be resettled in New Zealand Up to March 1975, 528 migrants entered New Zealand as permanent residents under Government sponsorship. At the request of the people the scheme has now been suspended

New Zealand Government and to Tokelau totalled \$2 64m for the year ended 31 March 1984

Ross Dependency. By Imperial Order in Council, dated 30 July 1923, the territories between 160° E long and 150° W long and south of 60° S lat were brought within the jurisdiction of the New Zealand Government. The region was named the Ross Dependency. From time to time laws for the Dependency have been made by regulations promulgated by the Governor-General of New Zealand.

The mainland area is estimated at 400,000-450,000 sq km and is mostly ice-covered. In Jan 1957 a New Zealand expedition under Sir Edmund Hillary established a base in the Dependency. In Jan 1958 Sir Edmund Hillary and 4 other New Zealanders reached the South Pole.

The main base—Scott Base—at Pram Point, Ross Island—is manned throughout the year, about 12 people being present during winter Vanda Station in the dry ice-free Wright Valley is manned every summer

# SELF-GOVERNING TERRITORIES OVERSEAS

## THE COOK ISLANDS

HISTORY. The Cook Islands, which lie between 8° and 23° S lat, and 156° and 167° W long, were proclaimed a British protectorate in 1888, and on 11 June 1901 were annexed and proclaimed part of New Zealand In 1965 the Cook Islands became a self-governing territory in 'free association' with New Zealand.

AREA AND POPULATION. The islands within the territory fall roughly into two groups—the scattered islands towards the north (Northern group) and the islands towards the south known as the Lower group. The names of the islands with their populations as at the census of 1 Dec. 1981 were as follows.

	Area			Area

In 1984, 408 live births and 102 deaths were registered. In 1983 there were 24,000 Cook Islanders living abroad, mainly in New Zealand.

CONSTITUTION AND GOVERNMENT. The Cook Islands Constitution Act 1964, which provides for the establishment of internal self-government in the Cook Islands, came into force on 4 Aug. 1965.

The Act establishes the Cook Islands as fully self-governing but linked to New Zealand by a common Head of State, the Queen, and a common citizenship, that of New Zealand It provides for a ministerial system of government with a Cabinet consisting of a Premier and 6 other Ministers. The New Zealand Government is represented by a New Zealand Representative and the position of a Queen's Representative has recently been created by changes in the Constitution. New Zealand continues to be responsible for the external affairs and defence of the Cook Islands, subject to consultation between the New Zealand Prime Minister and the Prime Minister. HISTORY. Active colonization of the Pacific coast was undertaken by Spaniards from Panama, beginning in 1523. After links with other Central American territories, and Mexico, Nicaragua became completely independent in 1838, but subject to a prolonged feud between the 'Liberals' of León and the 'Conservatives' of Granada Mosquitia remained an autonomous kingdom on the Atlantic coast, under British protection until 1860.

On 5 Aug. 1914 the Bryan-Chamarro treaty between Nicaragua and the US was signed, under which the US in return for US\$3m acquired a permanent option for a canal route through Nicaragua and a 99-year option for a naval base in the Bay of Fonseca on the Pacific coast and Corn Islands on the Atlantic coast. It was ratified by Nicaragua on 7 April 1916 and by the US on 22 June 1916. US Marines finally left in 1933. The Bryan-Chamarro treaty was abrogated on 14 July 1970 and the Corn Islands handed back in 1971

The 46-year political domination of Nicaragua by the Somoza family ended on 17 July 1979, after the 17 years long struggle by the Sandinista National Liberation Front flared into civil war. Federal Republic of Nigeria

HISTORY. The Federal Republic comprises a number of areas formerly under separate administrations. Lagos, ceded in Aug. 1861 by King Dosunmu, was placed under the Governor of Sierra Leone in 1866. In 1874 it was detached, together with Gold Coast Colony, and formed part of the latter until Jan. 1886, when a separate 'colony and protectorate of Lagos' was constituted. Meanwhile the United African Company had established British interests in the Niger valley, and in July 1886 the company obtained a charter under the name of the Royal Niger Company. This company surrendered its charter to the Crown on 31 Dec. 1899, and on 1 Jan 1900 the greater part of its territories was formed into the protectorate of Northern Nigeria. Along the coast the Oil Rivers protectorate had been declared in June 1885. This was enlarged and renamed the Niger Coast protectorate in 1893; and on 1 Jan 1900, on its absorbing the remainder of the territories of the Royal Niger Company, it became the protectorate of Southern Nigeria In Feb 1906 Lagos and Southern Nigeria were united into the 'colony and protectorate of Southern Nigeria', and on 1 Jan. 1914 the latter was amalgamated with the protectorate of Northern Nigeria to form the 'colony and protectorate of Nigeria', under a Governor On I Oct. 1954 Nigeria became a federation under a Governor-General.

On 1 Oct. 1960 Nigeria became sovereign and independent and a member of the Commonwealth and on 1 Oct. 1963 Nigeria became a republic

CONSTITUTION AND GOVERNMENT. Norway is a constitutional and hereditary monarchy The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal

The Constitution, voted by the constituent assembly at Eidsvoll on 17 May 1814 and modified at various times, vests the legislative power of the realm in the Storting (Parliament). The royal veto may be exercised, but if the same Bill passes two Stortings formed by separate and subsequent elections it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

Since June 1938 all branches of the Government service, including the state church, are open to women

National flag Red with a blue white-bordered Scandinavian cross National anthem Ja, vi elsker dette landet (words by B Bjørnson, 1865, tune by R. Nordraak, 1865).

The Storting assembles every year. The meetings take place suo jure, and not by any writ from the King or the executive. They begin on the first weekday in Oct each year, until June the following year. Every Norwegian subject of 18 years of age is entitled to vote, unless he is disqualified for a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct and the method of election is proportional. The country is divided into 19 districts, each electing from 4 to 15 representatives.

At the elections for the Storting held in 1985 the following parties were

elected: Labour, 71, Conservative, 50, Centre Party, 12, Christian Democratic

Party, 16; Socialist Left Party, 6, Party of Progress, 2

The Storting, when assembled, divides itself by election into the Lagting and the Odelsting. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. Each Ting (the Storting, the Odelsting and the Lagting) nominates its own president. Most questions are decided by the Storting, but questions relating to legislation must be considered and decided by the Odelsting and the Lagting separately. Only when the Odelsting and the Lagting disagree, the Bill has to be considered by the Storting in plenary sitting, and a new law can then only be decided by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution, which can only be decided by the Storting in plenary sitting. The Storting elects 5 delegates, whose duty it is to revise the public accounts. The Lagting and the ordinary members of the Supreme Court of Justice (the Hopesterett) form a High Court of the Realm (the Riksrett) for the trial of ministers, members of the Hopesterett and members of the Storting. The impeachment before the Riksrett can only be decided by the Odelsting.

The executive is represented by the King, who exercises his authority through the Cabinet or Council of State (Statsrad), composed of a Prime Minister (Statsrader) and (at present) 17 ministers (Statsrader). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote

A Conservative Government was formed and took office on 14 Oct 1981, after a general election on 9 Sept 1985 the members of the Government were

Local Government For the purposes of administration the country is divided into 19 counties (fylker), in each of which the central government is represented by a county governor (fylkesmannen) In addition, there are 47 urban districts (hykommuner) and 407 rural districts (herredskommuner), each of which usually corresponds in size to a parish (prestegield) The districts are administered by district councils (kommunestyrer), whose membership may vary between 13 and 85 councillors, and by a committee (formannskap) which is elected by and from the members of the council The council is four times the size of the committee. The council elects a chairman and a vice-chairman from among the committee members

Each of the 18 counties forms a county district (fylkeskommune), while the remaining one, Oslo, comprises an urban district. The supreme authority in a county district is the county council (fylkesting). The members of the county council are elected directly by the electors of the county and the number of representatives varies between 25 and 85. In a county district the county committee (fvlkesutvalg) occupies a position corresponding to that of the committee (formannskap) in the primary districts. The county committee is elected by and from among the members of the county council. The number of county committee members is one-fourth of the membership of the county council, but must be not more than 15. The county council elects from among the members of the county committee a county sheriff (fylkesordforer) and a deputy sheriff

#### **ENERGY AND NATURAL RESOURCES**

Electricity. Norway is a large producer of hydro-electric energy. The potential total hydro-electric power, for a whole year at regulated mean water flow is estimated at 162,000m, kwh annually

By the end of 1983 the capacity of the installations for production of thermoelectric energy amounted to only 250 mw. On 31 Dec. 1983, the total capacity of generators (of hydro-electric plants) was 27,035 mva.

In 1983 the total production of electricity amounted to 106,370m kwh of which 99 7% was produced by hydro-electric plants.

Most of the electricity is used for industrial purposes, especially by the chemical and basic metal industries for production of nitrate of calcium and other nitrogen products, carbide, ferrosilicon and other ferro-alloys, aluminium and zinc. The paper and pulp industries are also big consumers of electricity

Oil. In 1963 sovereignty was proclaimed over the Norwegian continental shelf and in 1966 the first exploration well was drilled By 1984 production was 8 times the domestic consumption of petroleum and is valued at about 20% of the GNP Production (1985) 38m tonnes

Gas. Production (1983) 895,000m cu. ft

Agriculture. Norway, including Svalbard and Jan Mayen, is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fiords and lakes. Large, continuous tracts fit for cultivation do not exist. Of the total area, 79, 3% is unproductive, 18% productive forest and 2, 6% under cultivation.

Forestry. The area covered with productive forests is 66,600 sq. km. About 81% of this consists of conifers and 19% of broadleaves. Forests in public ownership cover 8,470 sq. km of productive area. Between 1974–75 and 1983–84 an annual average of 8 3m cu metres was cut for sale. 8 1m for industrial use, 0 2m for fuel. Of industrial use, 4 5m cu metres in the lumber industry, 3m. as pulp, 200,000 as particle board. About 800,000 cu metres are consumed annually on farms. The annual increment (estimate, 1982) is about 16m cu. metres.

Fisheries. The total number of registered fishermen in 1984 was 29,632, of whom 6,768 had another chief occupation. In 1984, the number of fishing vessels (all with motor) was 25,564, and of these, 16,478 were open boats

The value of sea fisheries in 1m kroner in 1984 was. Cod, 1,136, capelin, 639, mackerel, 165, coal-fish (saithe), 530, deep-water prawn, 734, haddock, 84, herring, 194, dogfish, 13 The catch totalled in 1984, 2 4m tons, valued at 4,226m kroner.

Fish farming is a growth industry, exports 1,000m kroner per annum

#### INDUSTRY AND TRADE

Industry. Industry is chiefly based on raw materials produced within the country (wood, fish, etc.) and on water power, of which the country possesses a large amount Crude petroleum and natural gas production, the manufacture of paper and paper products, industrial chemicals and basic metals are the most important export manufactures. In the following table are given figures for industrial establishments in 1983, excluding one-man units. Electrical plants, construction and building industry are not included. The values are given in 1 m. kroner.

On 1 Aug. 1946 DNL, together with DDL (Danish Airlines) and ABA/SILA (Swedish Airlines), formed the 'Scandinavian Airlines System'—SAS. The 3 companies remained independent units, but all services were co-ordinated. In 1951 a new agreement was signed (retroactive from 1 Oct. 1950) according to which the 3 national companies became holding partners in a new organization which took over the entire operational system. Denmark and Norway hold each two-sevenths

and Sweden three-sevenths of the capital, but they have joint responsibility towards third parties

In the autumn of 1984 SAS had a fleet of 89 jet planes. Length of route network, about 252,000 km Scheduled air services are run by SAS, Braathens South-American and Far East Air transport service (SAFE) and Wideroes Flyveselskap service. # JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The judicature is common to civil and criminal cases. The same professional judges, who are legally educated, preside over both kinds of cases. These judges are as such state officials. The participation of lay judges and jurors, both summoned for the individual case, varies according to the kind of court and kind of case.

The ordinary Court of First Instance (Hernedsrett and Byrett) is in criminal cases composed of one professional judge and 2 lay judges, chosen by ballot from a panel elected by the district council. In civil cases 2 lay judges may participate. The ordinary Court of First Instance is in general competent in all kinds of cases with the exception of criminal cases where the maximum penalty prescribed in the Criminal Code for the offence in question exceeds five years imprisonment. Altogether there are about 100 ordinary courts of first instance.

In every community there is a Conciliation Council (Forliksråd) composed of 3

In every community there is a Conciliation Council (Forliksråd) composed of 3 lay persons elected by the district council. A civil lawsuit usually begins with mediation in the council which also has judicial authority in minor civil cases

The ordinary Courts of Second Instance (Lagmannsrett), of which there are 5, are composed of 3 professional judges. Additionally, in civil cases 2 or 4 lay judges may be summoned. In criminal cases a jury of 10 lay persons is summoned to determine whether the defendant is guilty according to the charge. In civil cases, the Court of Second Instance is an ordinary court of appeal. In criminal cases in which

the lower court does not have judicial authority, it is itself the court of first instance In other criminal cases it is an appeal court as far as the appeal is based on an attack against the lower court's assessment of the facts when determining the guilt of the defendant. An appeal based on any other alleged mistakes is brought directly before the Supreme Court.

The Supreme Court ( $H \omega y e sterett$ ) is the court of last resort. There are 18 Supreme Court judges. Each individual case is heard by 5 judges. Some major cases are determined in plenary session. The Supreme Court may in general examine every aspect of the case and the handling of it by the lower courts. However, in criminal cases the Court may not overrule the lower court's assessment of the facts as far as the guilt of the defendant is concerned

The Court of Impeachment (Riksretten) is composed of 5 judges of the Supreme Court and 10 members of Parliament

All serious offences are prosecuted by the State The Public Prosecution Authority (Patalemyndigheten) consists of the Attorney General (Riksadvokaten), the district attorneys (statsadvokater) and legally qualified officers of the ordinary police force Counsel for the defence is in general provided for by the State.

# SVALBARD

An archipelago situated between 10° and 35° E long and between 74° and 81° N lat Total area, 62,000 sq km (24,000 sq miles)

The main islands of the archipelago are Spitsbergen (formerly called Vest-spitsbergen), Nordaustlandet, Edgeøya, Barentsøya, Prins Karls Forland, Bjørnøya, Hopen, Kong Karls Land, Kvitøya, and many small islands. The arctic climate is tempered by mild winds from the Atlantic.

The archipelago was probably discovered by Norsemen in 1194 and rediscovered by the Dutch navigator Barents in 1596. In the 17th century the very lucrative whale-hunting caused rival Dutch, British and Danish-Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Svalbard lost its significance, it was again raised in the 20th century, owing to the discovery and exploitation of coalfields. By a treaty, signed on 9 Feb. 1920 in Paris, Norway's sovereignty over the archipelago was recognized. On 14 Aug. 1925 the archipelago was officially incorporated in Norway.

Coal is the principal product Of the 3 Norwegian and 3 Soviet mining camps, 2 Norwegian and 2 Soviet camps are operating Total population on 31 Dec 1984 was 3,480, of which 1,227 were Norwegians, 2,228 Soviet citizens, and 10 Poles In 1984, 552,187 tonnes of coal were exported from the Norwegian and 484,182 tonnes from the Soviet mines

Norwegian and foreign companies have been prospecting for oil So far 5 deep drillings have been made, but oil and gas finds have not been reported.

There are Norwegian meteorological and/or radio stations at the following places Bjørnøya (since 1920), Hopen (1945), Isfjord Radio (1933), Longyearbyen (1930), Svalbard Lufthavn (1975) and Ny-Ålesund (1961) A research station, administered by Norsk Polarinstitutt, was creeted at Ny-Alesund in 1968 for various observations and investigations. An airport near Longyearbyen (Svalbard Lufthavn) opened in 1975.

# JAN MAYEN

This bleak, desolate and mountainous island of volcanic origin and partly covered by glaciers, is situated 71° N lat and 8° 30′ W long, 300 miles NNE of Iceland The total area is 380 sq. km (147 sq. miles). Beerenberg, its highest peak, reaches a height of 2,277 metres. Volcanic activity, which had been dormant, was reactivated in Sept. 1970.

The island was possibly discovered by Henry Hudson in 1608, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed Its present name derives from the Dutch whaling captain Jan Jacobsz May, who indisputably discovered the island in 1614. It was uninhabited, but occasion-

ally visited by seal hunters and trappers, until 1921 when Norway established a radio and meteorological station. On 8 May 1929 Jan Mayen was officially proclaimed as incorporated in the Kingdom of Norway. Its relation to Norway was finally settled by law of 27 Feb. 1930. A LORAN station (1959) and a Consoi station (1968) have been established.

# BOUVET ISLAND Bouvetøya

This uninhabited volcanic island, mostly covered by glaciers and situated 54° 25′ S lat. and 3° 21′ E long, was discovered in 1739 by a French naval officer, Jean Baptiste Loziert Bouvet, but no flag was hoisted till, in 1825, Capt Norris raised the Union Jack In 1928 Great Britain waived its claim to the island in favour of Norway, which in Dec 1927 had occupied it A law of 27 Feb 1930 declared Bouvetøya a Norwegian dependency. The area is 50 sq. km (19 sq. miles) From 1977 Norway has had an automatic meteorological station on the island, and 5 men operated a meteorological station there during the 1978–79 season.

# PETER I ISLAND Peter I Øy

This uninhabited island, situated 68° 48′ S. lat and 90° 35′ W long, was sighted in 1821 by the Russian explorer, Admiral von Bellingshausen. The first landing was made in 1929 by a Norwegian expedition which hoisted the Norwegian flag. On 1 May 1931 Peter I Island was placed under Norwegian sovereignty, and on 24 March 1933 it was incorporated in Norway as a dependency. The area is 180 sq km (69 sq. miles).

# QUEEN MAUD LAND Dronning Maud Land

On 14 Jan 1939 the Norwegian Cabinet placed that part of the Antarctic Continent from the border of Falkland Islands dependencies in the west to the border of the Australian Antarctic Dependency in the east (between 20° W and 45° E) under Norwegian sovereignty. The territory had been explored only by Norwegians and hitherto been ownerless. Since 1949 expeditions from various countries have explored the area. In 1957 Dronning Maud Land was given the status of a Norwegian dependency.

# Sultanate of Oman

HISTORY. Oman was dominated by Portugal from 1507–1649 The Al-Busaid family assumed power in 1749 and have ruled to the present day. The Sultanate of Oman, known as the Sultanate of Muscat and Oman until 1970, is an independent sovereign state, situated in south-east Arabia.

AREA AND POPULATION. Its coastline is over 1,000 miles long and extends from the Ras al Khaimah Shaikdom near Bukha on the west side of the Musandum Peninsula to Ras Dharbat Ali, which marks the boundary between Oman and the territory of the People's Democratic Republic of Yemen The Sultanate extends inland to the borders of the Rub' al Khali ('Empty Quarter') across three geographical divisions—a coastal plain, a range of hills and a plateau The coastal plain varies in width from 10 miles near Suwaig to practically nothing in the vicinity of Mutrah and Muscat towns, where the hills descend abruptly into the sea These hills are for the most part barren except at the highest part of the mountainous region of the Jebel Akhdar (summit 9,998 ft) where there is some cultivation. The plateau has an average height of 1,000 ft. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain, known as the Batinah, is fertile and prosperous. The date gardens extend for over 150 miles. Whereas the coastline between the capital, Muscat, and the southern province of Dhofar is barren, Dhofar itself is highly fertile. Its principal town is Salalah on the coast which is served by the port of Raysut

The area has been estimated at about 105,000 sq miles and the population at 1 5m, chiefly Arabs, of these, some 40,000 live in Dhofar The town of Muscat is the capital which, while formerly of some commercial importance, has now lost most of its trade to the adjacent port of Mutrah (combined populations, 80,000) the starting point for the trade routes into the interior. The population of both towns consists of pure Arabs, Indians, Pakistanis and Negroes, numerous merchants are Khojas (from Sind and Kutch) and Hindus (mostly from Gujarat and Bombay). Other ports are Sohar, Khaburah and Sur, Raysut in the south, none, however, affords shelter from bad weather.

The port of Gwadur and a small tract of country on the Balúchistán coast of the Gulf of Oman were handed over to Pakistan on 8 Sept 1958

The Kuria Muria islands were ceded to the UK in 1854 by the Sultan of Muscat and Oman for the purpose of a cable station. On 30 Nov. 1967 the islands were retroceded to the Sultan of Muscat and Oman in accordance with the wishes of the population.

CLIMATE. Oman has a desert climate, with exceptionally hot and humid months from April to Oct, when temperatures may reach 117°F (47°C) From Dec to the end of March, the climate is more pleasant Light monsoon rains fall in the south from June to Sept., with highest amounts in the western highland region Muscat Jan. 72°F (22 2°C), July 91°F (33 3°C) Annual rainfall 4 0" (99 1 mm) Salalah, Jan. 72°F (22 2°C), July 78°F (25 6°C) Annual rainfall 3 3" (81 3 mm)

RULER. The present Sultan is Qaboos bin Said (born Nov 1940) He took over from his father Said bin Taimur, on 23 July 1970 in a Palace coup

In Oct 1981 the Sultan issued three decrees establishing a 45-member State advisory council.

The company (PDO) regained the Dhofar concession area in 1969 When some of the IPC partners withdrew from Oman in 1960, Shell took over the management of PDO with an 85% interest (minority interests were held by Compagnie Française des Pétroles, 10% and Gulbenkian, 5%) At the beginning of 1974 the Oman Government bought a 25% share in PDO, increasing this retroactively to 60% in July A Joint Management Committee was established Other companies active in exploration activities in Oman, with mixed success, include Amoco, Elf-Acquitaine and a consortium of Deminex, Agip and Hispanoil with BP as operator

Oil in commercial quantities was discovered in 1964 and production began at a rate of 200,000 bbls per day in 1967. Production has fluctuated from year to year, peaking in 1976 at 366,000 bbls per day. Due to conditions on the international oil market, production fell to a low of 282,000 bbls per day in 1980 but was restored to about 414,000 bbls per day in the third quarter of 1984. Total generated electrical energy in 1982–83, 19,636m kwh, 60% of this was hydro-electricity, the main source being the Tarbela Dam By 1983 30% of the population had access to electric power.

The Pak-Arab refinery pipeline runs 865 km from Karachi to Multan; capacity, 4.5m. tonnes of oil annually.

Gas. Gas pipelines from Sui to Karachi (345 miles) and Multan (200) supply natural gas to industry and domestic consumers. A pipeline between Quetta and

Shikarpur was constructed in 1982. There are 4 other productive fields Reserves (1983), 500,000m. cu metres, production in 1983-84 was 9,767m cu metres, or about 42% of energy needs.

Water. The Indus water treaty of 1960, concluded between India and Pakistan, has created the basis for a large-scale development programme. The Indus Basin Development Fund Agreement has been subscribed by Australia, Canada, Federal Republic of Germany, New Zealand, UK and USA and is administered by the International Bank, the works to be constructed call for expenditure of US\$1,000m. The main purpose of the treaty is the division of the water power of the Indus and its 5 tributaries between India and Pakistan. After the construction of some 460 miles of canals, the Indus and the 2 western tributaries will serve Pakistan and the entire flow of the 3 eastern tributaries will be released for use in India.

The largest project is the construction of the Tarbela Dam, an earth-and-rock filled dam on the river Indus, 485 ft high, which has a gross storage capacity of 11 1m acre feet of water for irrigation

The Lloyd Barrage and Canal Construction Scheme, consists of a barrage across the river Indus at Sukkur and 7 canals—4 on the left and 3 on the right bank. Another barrage across the Indus, 4½ miles north of Kotri, called the Ghulam Muhammad Barrage, was completed in 1955 The Taunsa barrage on the Indus, 80 miles downstream of Kalabagh, was completed in 1958 The Gudu barrage, 10 miles from Kashinore, was completed in 1962.

The province of the Punjab set up in 1949 the Thal Development Authority to colonize the Thal desert between the Indus and Jhelum rivers

# **ENERGY AND NATURAL RESOURCES**

Electricity. Production of electric energy, 1984, amounted to 2,900m. kwh Minerals. There are known to be copper deposits in the provinces of Chiriqui,

Colón and Darien. The most important, containing possibly the largest undeveloped reserves in the world, is Cerro Colorado (Chiriqui) on which a feasibility study is being undertaken by the Rio Tinto Zinc Coporation Ltd. If it is eventually decided to develop the mine, it is expected that the annual production of copper will reach 260,000 to 280,000 tonnes within a few years. The deposit has estimated reserves of 1,300m. tonnes, with an average grade of 0.76% copper

Agriculture. Of the whole area (1975) 18 5% is cultivated, 57 1% is natural or artificial pasture land and 9 5% is fallow. Of the remainder only a small part is cultivated, though the land is rich in resources. About 60% of the country's food requirements are imported. Production in 1982 totalled 1 1m. tonnes of bananas and in 1981 187,000 tonnes of raw sugar. Oranges (64,000 tonnes) and mangoes (27,000 tonnes) are also produced. Most important food crop, for home consumption, is rice, grown on 80% of the farms, Panama's per capita consumption is very high. Output of rough rice was 150,000 tonnes in 1982. Other products are maize (63,000 tonnes in 1982), cocoa (1,000 tonnes), coffee (8,000 tonnes) and coconuts (25,000 tonnes). Beer, whisky, rum, 'seco', anise and gin are produced. Coffee is mainly grown in the province of Chiriqui, near the Costa Rican frontier, total production in 1982 was 8,000 tonnes, and small amounts were exported. The country has great timber resources, notably mahogany. Livestock (1984) 1 47m cattle, 200,000 pigs and 6m poultry.

Fisheries. The catch in 1982 was 337,000 tonnes

# COMMUNICATIONS

Roads. Panama had on 1 Jan 1980, 8,606 km of roads. The road from Panama City westward to the cities of David and Concepción and to the Costa Rican frontier, with several branches, is part of the Pan-American Highway. A concrete highway connects Panama City and Colón.

On 1 Jan. 1980 registered motor vehicles, private and commercial, numbered 111,052, this excludes vehicles owned by government departments.

Railways. The Ferrocarril de Panama (Panama Railroad) (1,524 mm gauge) (through the Canal area), which connects Ancón on the Pacific with Cristóbal on the Atlantic, is the principal railway. It is 76 km long and runs along the banks of the Canal. As most vessels unload their cargo at Cristóbal (Colón), on the Atlantic

side, the greater portion of the merchandise destined for Panama City is brought overland by the *Ferrocarril de Panama* The United Brands Company runs 376 km of railway, and the Chiriqui National Railroad 126 km.

Aviation. PANAM, Braniss Airways, British Airways, KLM, Iberia Airlines and other international companies operate at Tocumen Airport, 17 miles from Panama City Air Panama provides services between Panama City and New York, Los Angeles, Miami, Central America and some countries in South America. The Compañía Panameña de Aviación (COPA) and Aerolineas Las Perlas provide a local service between Panama City and the provincial towns COPA also provides an international service to Central America

Shipping. Ships under Panamanian registry on 25 Sept 1981 numbered 10,859 of 27 2m. gross tons, most of these ships elect Panamanian registry because fees are low and labour laws lenient. All the international maintime traffic for Colón and Panama runs through the Canal ports of Cristóbal, Balboa and Bahia Las Minas (Colón), Almirante is used for both the provincial and international trade. There is an oil transfer terminal at Puerto Armuelles on the Pacific coast.

Panama Canal. On 18 Nov. 1903 a treaty between the USA and the Republic of Panama was signed making it possible for the US to build and operate a canal connecting the Atlantic and Pacific oceans through the Isthmus of Panama The treaty granted the US in perpetuity the use, occupation and control of a Canal Zone, approximately 10 miles wide, in which the US would possess full sovereign rights to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority' In return the US guaranteed the independence of the republic and agreed to pay the republic \$10m and an annuity of \$250,000 The US purchased the French rights and properties—the French had been labouring from 1879 to 1899 in an effort to build the Canal—for \$40m and in addition, paid private landholders within what would be the Canal Zone a mutually agreeable price for their properites

Two new treaties between Panama and USA were agreed on 10 Aug and signed on 7 Sept. 1977. One deals with the operation and defence of the canal until the end

of 1999 and the other guarantees permanent neutrality

The USA maintains operational control over all lands, waters and installations, including military bases, necessary to manage, operate and defend the canal until 31 Dec 1999. A new agency of the US Government, the Panama Canal Commission, operates the canal, replacing the Panama Canal Co A policy-making board of 5 US citizens and 4 Panamanians serves on the Commission's board of directors Until 1990 the canal administrator will be a US citizen and the deputy will be Panamanian After that date the position will be reversed

Six months after the exchange of instruments of ratification Panama assumed general territorial jurisdiction over the former Canal Zone and became able to use portions of the area not needed for the operation and defence of the canal Panamanian penal and civil codes became applicable. At the same time Panama assumed responsibility for commercial ship repairs and supplies, railway and pier operations, passengers, police and courts, all of which were among other areas formerly administered by the Canal Co and the Canal Zone Government

66% of the electorate of Panama agreed to the ratification of the treaties when a referendum was held on 23 Oct 1977 and on 18 April 1978 the treaty was ratified

by the US Congress The treaty went into effect on 1 Oct. 1979.

The treaty of 1936 increased the annuity to US\$430,000 and, as desired by Panama, withdrew the guarantee of independence In 1955 the annuity was increased to US\$1 93m., and the Panama Canal Co. turned over to the Republic the Panama City railroad yards and other properties valued at US\$22m. At the end of 1962 the US completed the construction of a high-level bridge over the Pacific entrance to the Canal, and the flags of Panama and the US were flown jointly over areas of the Canal Zone under civilian authority. Following the devaluation of the dollar in 1972 and 1973, the annuity was adjusted proportionally to US\$2 1m. and US\$2 33m. respectively.

The Panama Canal Commission, a US Government Agency, is concerned prim-

arily with the actual operation of the Canal. On 8 July 1974, 18 Nov. 1976 and 10 Oct. 1979 tolls were increased. These were the first increases of toll rates in the history of the Canal Tolls were raised again on 12 March 1983. The new rates are US\$1 83 a Panama Canal ton for vessels carrying passengers or cargo and US\$1 46 per ton for vessels in transit in ballast A Panama Canal ton is equivalent to 100 cu. ft of actual earning capacity. The new toll rate for warships, hospital ships and supply ships, which pay on a displacement basis, is US\$1 02 a ton

The changes were designed to continue the approximately break-even financial operating results after paying its own expenses and paying interest on the net direct

investment of the US in the Canal

Administrator of the Panama Canal Commission Dennis P. McAuliffe Deputy Administrator Fernando Manfredo (Panama)

The total civilian and military population of the Canal area is 31.618 (estimate) The total force employed by the Panama Canal Commission on 28 Sept 1985 was 7,544, comprising 1,355 US citizens, 6,008 Panamanians and 181 others.

The Canal was opened to commerce on 15 Aug. 1914 It is 85 ft above sea-level It is 51 2 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific ocean, and 36 statute miles from shore to shore. The channel ranges in bottom-width from 500 to 1,000 ft, the widening of Gaillard Cut to a minimum width of 500 ft was completed in 1969 Normally, the average time of a vessel in Canal waters is about 24 hours, 8-12 of which are in transit through the Canal proper A map showing the Panama, Suez and Kiel canals on the same scale will be found in The Statesman's Year-Book, 1959 and a new map in the 1978-79 edition

Particulars of the ocean-going commercial traffic through the canal are given as follows (vessels of 300 tons Panama Canal net and 500 displacement tons and over, cargo in long tons)

HISTORY. To prevent that portion of the island of New Guinea not claimed by the Netherlands or Germany from passing into the hands of a foreign power, the Government of Queensland annexed Papua in 1883. This step was not sanctioned by the Imperial Government, but on 6 Nov 1884 a British Protectorate was proclaimed over the southern portion of the eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The federal government took over the control in 1901, the political transfer was completed by the Papua Act of the federal parliament in Nov. 1905, and on 1 Sept. 1906 a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua. The northern portion of New Guinea was a German colony until the First World War. It became a League of Nations mandated territory in 1921, administered by Australia, and later a UN Trust Territory (of New Guinea).

# República del Perú

HISTORY. The Republic of Peru, formerly the most important of the Spanish vice-royalties in South America, declared its independence on 28 July 1821, but it was not till after a war, protracted till 1824, that the country gained its actual freedom

AREA AND POPULATION. The total area of Peru is estimated to be 1,285,216 sq km (496,093 sq. miles)

The long-standing dispute with Chile over the provinces of Tacna and Arica (see The Statesman's Year-Book, 1928, p. 1198) reached an amicable settlement on 3 June 1929 at Lima, Tacna going to Peru and Arica to Chile. In response to demands by Bolivia for permanent access to the Pacific Coast, proposals for a Bolivian corridor to the sea and a new Bolivian port to be built in the disputed area have been put forward by Chile and Peru. To date, little progress has been made. One result has been increased tension along the Chilean-Peruvian border, there is no sign of a settlement of the border dispute, and the armed forces of both countries remain on the alert in the disputed border area. Fighting broke out between Peruvian and Ecuadorean Forces, in early 1981, along part of the disputed border (the Cordillera del Condor) which has to date not been adequately mapped. A number of proposals for settling the issue permanently have been put forward but a final settlement is unlikely to be reached in the near future. For an account of the settlement of other boundary disputes, see The Statesman's Year-Book, 1948, p. 1173

of proposals for settling the issue permanently have been put forward but a final settlement is unlikely to be reached in the near future. Children under 15 years, 7.2m. (41% of total population). Birth rate, 4.2%, death rate, 1.3%. Lima, the capital, had (1983) 5,258,600 population. Other major cities (with census population 1981), are Callao (478,500), Arequipa (447,431), Trujillo (354,557), Chiclayo (280,244), Chimbote (216,406), Piura (186,354), Cuzco (181,604), Huancayo (115,693, 1972), Iquitos (173,629), Ica (111,087). The language is Spanish, but the Indian population speak either Quechua (the second official language) or Aymará.

The area of the 24 departments and the constitutional province of Callao are given below with the population, according to the official census of 1981. The area of the department of Puno includes the Peruvian zone of Lake Titicaca, 4,996. 28 sq. km. The chief towns are shown in brackets.

Little rain is experienced in that period. In the Sierra, temperatures remain fairly constant over the year, but the daily range is considerable. There the dry season is from April to Nov Desert conditions occur in the extreme south, where the climate is uniformly dry, with a few heavy showers falling between Jan and March. Lima Jan 74°F (23 3°C), July 62°F (16 7°C). Annual rainfall 2" (48 mm) Cuzco Jan 56°F (13 3°C), July 50°F (10°C) Annual rainfall 32" (804 mm)

# Polska Rzeczpospolita Ludowa

HISTORY. In 1966 Poland celebrated its millennium, but modern Polish history begins with the partitions of the once-powerful kingdom between Russia, Austria and Prussia in 1772, 1793 and 1795 For 19th century events see The Statesman's Ylar-Book 1980-81

On 10 Nov. 1918 independence was proclaimed by Józef Piłsudski, the founder of the Polish Legions during the war. On 28 June 1919 the Treaty of Versailles recognized the independence of Poland

On 1 Sept 1939 Germany invaded Poland, on 17 Sept 1939 Russian troops entered eastern Poland, and on 29 Sept. 1939 the fourth partition of Poland took place After the German attack on Russia, the Germans occupied the whole of

Poland By March 1945 the country had been liberated by the Russians.

In July 1944 the USSR recognized the Polish Committee of National Liberation (Polski Komitet Wyzwolenia Narodowego) established in Lublin as an executive organ of the National Council of the Homeland (Krajowa Ruda Narodowa). The Committee was transformed into the Provisional Government in Dec 1944, and on 28 June 1945, supplemented by members of the Polish Government in London (which had been recognized by the UK and USA), it was re-established—in Moscow—as the Polish Provisional Government of National Unity and on 6 July recognized as such by the UK and USA

Elections were held on 19 Jan 1947 Of the 12 7m votes cast, 11 24m were recognized as valid and 9m were given for the Communist-dominated 'Democratic Bloc' After riots in Poznań in June 1956 nationalist anti-Stalinist elements gained control of the Communist Party, under the leadership of Wladyslaw Gomułka

In 1970 the Federal Republic of Germany recognized Poland's western boundary as laid down by the Potsdam Conference of 1945 (the 'Oder-Neisse line').

In Dec 1970 strikes and riots in Gdańsk, Szczecin and Gdynia led to the resignation of a number of leaders including Gomułka. He was replaced by Edward Gierek

The introduction of price rises in June 1976 was again followed by strikes and riots. The rises were withdrawn and some demonstrators were imprisoned. In the campaign of protest which followed a Committee for the Defence of the Workers (KOR) was formed.

The raising of meat prices on 1 July 1980 resulted in a wave of strikes which broadened into generalized wage demands and eventually by mid-Aug acquired a political character. Workers in Gdańsk, Gdynia and Sopot elected a joint strike committee, led by Lech Wałęsa demanding the right to strike and form independent. Trade Unions, the abolition of censorship, access to the media and the release of political prisoners.

On 24 Aug. Gierek reshuffled the Party and Government leadership, and Józef Pińkowski replaced Edward Babiuch as Prime Minister. On 31 Aug the Government and Wałęsa signed the 'Gdańsk Agreements' permitting the formation of

independent Trade Unions

On 5 Sept. Gierek suffered a heart attack and was replaced as First Secretary by Stanislaw Kania (Gierek was expelled from the Party in July 1981). On 17 Sept various Trade Unions decided to form a national confederation ('Solidarity') and applied for legal status, which was granted on 24 Oct after some Government resistance

On 9 Feb. Pińkowski was replaced as Prime Minister by the Defence Minister, Gen. Wojciech Jaruzelski. At an extraordinary Communist Party congress in July a

new leadership was elected At Solidarity's first national congress (4-10 Sept and 2-8 Oct 1981) Wałęsa was re-elected chairman and a radical programme of action was adopted. On 18 Oct. Kania resigned from the Party leadership and was replaced by Jaruzelski On 13 Dec. 1981 the Government imposed martial law (stan wojenny), banning a wide range of civil liberties, and establishing the rule of a 20-member Military Council of National Salvation (WRON). Solidarity was proscribed and its leaders detained Martial law was approved by the Sejm on 26 Jan 1982 with one dissident vote and 5 abstentions. The Party Central Committee approved the measure on 25 Feb Wałęsa was released in Nov. 1982. On 8 Oct the Sejm voted (with 12 dissident votes and 9 abstentions) a law dissolving all registered trade unions including Solidarity. These have been replaced by workplace unions which are required to pledge support for the Communist Party and the Constitution Martial law was suspended in Dec 1982 and finally lifted in July 1983 An amnesty of 21 July 1984 freed 35,000 common and 652 political prisoners, including 7 Solidarity and 4 KOR leaders. In Nov. 1985 Jaruzelski resigned the Prime Ministership in favour of Zbigniew Messner, and was elected Chairman of the Council of State.

The titular head of state is the Chairman of the Council of State, Wojciech Jaruzelski Deputy Chairmen: Kazimierz Barcikowski, Zenon Komender, Tadeusz Mlynczak, Tadeusz Szelachowski.

Since 1983 the Constitution has defined the position of political parties as follows. 'The alliance and cooperation of the Polish United Workers' (i e Communist) Party with the United Peasant Party and the Democratic Party in the construction of socialism and their cooperation with those social organizations and associations that are grounded in the principles of the system of the Polish People's Republic form the basis of the Patriotic Movement of National Renaissance.' (PRON) The latter was set up on 15 Oct 1982. The National Unity Front was dissolved in July 1983.

At the 9th, extraordinary, congress of the Communist Party on 19 July 1981 a new Politburo was elected by democratic vote. Only four of the 16 former members were re-elected. Changes were made in the Party and Government leadership in July and Oct. 1982, and in Nov. 1985. In March 1986 the Politburo consisted of Wojciech Jaruzelski (First Secretary and Chairman, Council of State); Kazimerz Barcikowski (Deputy Chairman, Council of State); Tadeusz Czechowicz; Józef Czyrek; Zofia Grzyb, Stanisław Kalkus; Hieronim Kubiak; Zbigniew Messner (Prime Minister); Štanisław Opalko; Tadeusz Porebski; Jerzy Romanik; Albin Siwak; Marian Wozniak. Candidate members: Stanisław Bejger; Jan Główczyk; Gen Czesław Kiszczak (Minister of the Interior); Włodzimierz Mokrzyszczak; Marian Orzechowski (Foreign Minister); Gen. Florian Siwicki (Defence). The authority of the republic is vested in the Sejm, elected for 4 years by all citizens over 18. The Sejm elects a Council of State, composed of a Chairman, the Secretary and 16 members, including 4 vice-chairmen; and a Council of Ministers.

The last elections for the Sejm were held on 13 Oct. 1985, having been postponed from March 1984. 410 seats were contested by 2 candidates each, and 50 seats by one candidate who had to obtain 50% of the vote, these latter being mainly Government leaders and 16 independents. All candidates had to support the poli-

cies of PRON. Turn-out was said officially to be 78.86%. Solidarity, which had called for a boycott of the election, claimed a turn-out of 66% (Turn-out was 98 87% in the 1980 election) The 460 seats are distributed as follows: 245 United Workers' Party, 106 United Peasants' Party, 35 Democratic Party, 74 independents, including 21 Catholics The Speaker of the Sejm is Roman Malinowski.

Local government is carried out by People's Councils elected every 4 years at voivodship and community level. Alongside these are the offices of state administration. The chairman of the People's Council is the Secretary of the regional organization for the area. Local elections due in 1982 were postponed until 17 June 1984. Solidarity called for a boycott of the elections, but the Government announced that 74 95% of the 25 9m electorate had voted (a figure claimed by Solidarity to be inflated by 12-15%). There were some 220,000 candidates, all selected by PRON.

### **ECONOMY**

Planning. For planning history until 1980 see THE STATESMAN'S YEAR-BOOK

1981-82, p.1002. Industrialization without sufficient expenditure on infrastructure; neglect of agriculture and the inefficiency of the planning mechanism, exacerbated by higher prices and declining Western demand for exports, and the social unrest since 1980, brought the economy to a state of paralysis. Some foodstuffs are rationed, and price increases were introduced in 1982 and 1984-85. In Apr. 1982 a Consultative Economic Council was set up as an advisory body to the Government. The economy since 1983 shows some signs of recovery. Economic reforms involving a closer linking of credits, profits and wages with market forces and efficiency were introduced in 1982. A 5-year National Socio-Economic Plan is running from 1986 to 1990, and into this Central Annual Plans are integrated

In Jan 1982 the złoty was substantially devalued against Western currencies. In March 1986, £1 sterling = 246 38 złotys, US\$1 = 165 72 złotys.

Banking. The National Bank of Poland (established 1945) is the central bank, has exclusive authority to issue currency, is charged with control of money and credit, and has responsibility for financial implementation of the national economic plan Since its merger with the former Investment Bank on 1 Jan. 1970 it exercises centralized control over investment financing. The Food Economics Bank (Bank Gospodarki Zywnościowej) has exclusive responsibility for direct financing of rural areas through both short-term and investment loans. It operates banks The General Savings Bank (Powszechna Kasa Oszczedności) exercises central control over savings activities, transfers and checking transactions, including activities of workers' co-operative banks.

Collectivization has been largely abandoned but remains a long-term aim. There were 2,180 co-operatives in 1983. A new agricultural policy of 1981 gave more autonomy to co-operatives, linked wages to productivity and equalized resources

between the state and private sectors. The peasants' trade union 'Rural Solidarity' won recognition in 1981 but was dissolved in Oct. 1982. A compulsory contributory pension scheme was introduced in 1978 for farmers who turn over their farms to their successors or the State. 250,000 such pensions had been paid by June 1980. 'Agricultural circles' numbered 26,000 with 2-2m. members in 1982. In 1983 there were 1,262 state agricultural holdings.

54% of Poland's trade is with Comecon countries (40% with the USSR). Soviet exports include plant and equipment and raw materials; Polish exports, machinery, ships, coal, chemicals and consumer goods. In Oct. 1985 Poland signed a trade agreement with the USSR for 1986–90. This gives the USSR a wider role in the Polish economy, particularly in the supply of oil, and reschedules Poland's 5,000m rouble debt beyond 1990.

Under it Romania becomes a 'Socialist' (as opposed to 'People's') Republic. The leading role of the Communist Party is reaffirmed. The Grand National Assembly of 369 is elected for 5 years (before 1972 for 4 years). It holds short sessions twice a year, and between sessions delegates its legislative rights to the State Council (the President, head of state; 3 Vice-presidents, 1 secretary and 20 members) Its Speaker is Nicolae Giosan.

The Socialist Democracy and Unity Front (SDUF) functions as a consultative body on home and foreign affairs. It has central and local councils in which workers, peasants, professional bodies, ethnic minorities and the Communist Party are represented. It replaced the Popular Democratic Front (see STATESMAN'S YEAR-BOOK, 1979–80).

Industries scheduled for particular development: machine-building, iron and steel, non-ferrous metals, chemicals and electric power. A 10-year programme introduced in 1980 is designed to make Romania self-sufficient in energy. (For previous plans see The Statesman's Year-Book, 1976–77.)

There is no move towards any fundamental decentralization of planning authority but limited devolutions of responsibility in an attempt to improve efficiency were introduced in 1967, 1979 and 1983. There are 102 economic units intermediate between ministries and enterprises

The republic proclaimed by the Parmehutu on 28 Jan 1961 was recognized by the Belgian administration (but not by the United Nations) in Oct 1961 Internal self-government was granted on 1 Jan 1962, and by decision of the General Assembly of the UN the Republic of Rwanda became independent on 1 July 1962. Tristan da Cunha, a small group of Islands in the Atlantic, halfway between the Cape and South America, in 37° 6′ S lat., 12° 1′ W long Besides Tristan da Cunha (98 sq km) and Gough Island (90 sq km), there are Inaccessible (10 sq km) and Nightingale Islands (2 sq. km), and a number of rocks As from 12 Jan 1938 the 4 islands have become dependencies of St Helena.

Tristan consists of a volcano rising to a height of 6,760 ft, with a circumference at its base of 21 miles. The volcano, believed to be extinct, erupted unexpectedly early in Oct 1961. The whole population was evacuated without loss and settled temporarily in the UK. In 1963 they returned to Tristan where they all dwell in the settlement of Edinburgh.

Before the disaster occurred the habitable area was a small plateau on the north west side of about 12 sq. miles, 100 ft above sea-level. Only about 30 acres was under cultivation, three-quarters of it for potatoes. There were apple and peach trees. Potatoes remain the chief crop, cattle, sheep and pigs are now reared, and fish are plentiful.

Population in 1880, 109; in 1983, 296. The original inhabitants were ship-wrecked sailors and soldiers who remained behind when the garrison from St Helena was withdrawn in 1817.

At the end of April 1942 Tristan da Cunha was commissioned as HMS Atlantic Isle, and became an important meteorological and radio station. In Jan 1949 a South African company commenced crawfishing operations. An Administrator was appointed at the end of 1948 and a body of basic law brought into operation. The Island Council, which was set up in 1932, in 1982 consisted of a Chief Islander, 3 nominated and 7 elected members under the chairmanship of the Administrator. Women's affairs are discussed by the Island Women's Council, which presents them for consideration to the general council.

#### INTERNATIONAL RELATIONS

Membership. Saudi Arabia is a member of UN, the Arab League, the Gulf Cooperation Council and OPEC.

#### **ECONOMY**

Planning. The third development plan ran 1980-90, and emphasized industrial development and the training of an indigenous work force. The fourth development plan 1985-89 was launched on 22 March 1985. Expenditure is envisaged at US\$277.000m

Budget. The fiscal year runs from 1 Rajab to 30 Jumad II in the lunar calendar, and consequently starts approximately 10 days earlier each year. The 1984–85 budget envisaged expenditure of 260,000m. rials and revenue of 214,100m. rials.

Currency. The paper rial is divided into 100 halalas. In March 1986, £1 = 5 25 rials; US\$1 = 3 65 rials

Banking. There are 11 commercial banks. Two are wholly owned by Saudi interests (National Commercial Bank and the Riyadh Bank) The other 9 are majority-owned by Saudi shareholders

#### **ENERGY AND NATURAL RESOURCES**

Electricity. 42,443m. kwh was generated by the main electricity companies in 1985.

Oil. The first general geologic-geographical survey of Saudi Arabia was completed in 1961 under the joint sponsorship of the Saudi Arabian and US governments but surveying continues. Reserves (1984) 165,200m. bbls.

The original oil concession agreement was signed in 1933 with Standard Oil Co. of California. The name Aramco appeared in 1944, and by 1948 Exxon, Texaco and Mobil held shares in the company. In 1973 the Saudi Arabian Government acquired a 25% interest in Aramco: this became 60% in 1974, and in 1979 it was announced that the Government had taken full control of Aramco equity retroactively from Jan. 1976. By 1979 Aramco retained only 189,000 sq. km or 15 4% of the original concession areas.

Two other companies have concessions of Saudi Arabia's oil rights in the

Kuwait/Saudi Arabian Neutral Zone. Getty Oil's concession dates from 1953 and that of the Arabian Oil Co. (Japanese) from 1957.

Crude oil production in 1985 was 220m. tonnes. Crude oil exports in 1985 were 1,216m. bbls, of which Aramco provided 97.4%, Arabian Oil 1 94% and Getty Oil 0.6%. 1985 oil exports earned US\$30,000m. (95m. for crude) and Aramco earned 98% of this total.

The agency responsible for co-ordination of national oil policy is Petromin (General Petroleum and Minerals Organization). Petromin manages exploration and concession agreements, oil refineries (except that of Aramco at Ras Tanura) and the distribution and marketing of oil and oil products

In 1982, when Aramco produced 2,300m. bbls of crude oil, 55m (2 38%) were sent by pipeline to Bahrain, and 1,500m. bbls (67 78%) were shipped out via Gulf terminals. The volume of crude exported will decline as the national refining capacity increases. In 1984 total refining capacity was 1,185,000 bbls per day including Ras Tanura (Aramco) 450,000 bbls per day, 135,000 bbls per day at Riyadh, 100,000 bbls per day at Jiddah and 170,000 bbls per day at Yanbu (Petromin). In 1984, 349m. bbls per day of refined products were produced by Saudi Arabian refineries, of which fuel oil accounted for 98m, gasoline, 49m, Kerozene, 9.5m.

About 3,000m. cu. ft per day of associated gas produced with crude oil is collected at gas-oil separator plants and piped to gas plants in the Eastern Province There, impurities such as hydrogen sulfide are removed and a sweet, dry gas is extracted for use as an industrial fuel. From gas-processing centres at Shedgum and Uthmaniyah, the remaining natural gas liquids and ethane are piped to plants at Yanbu and Juaymah for fractionation. In 1984 Aramco produced 335m bbls of natural gas liquids

Water Resources. Intensive efforts are underway to provide adequate supplies of water for urban, industrial, rural and agricultural use. There is an important programme to tap non-renewable (3,450m cu. metres per annum) and renewable (1,145m. cu. metres) water reserves by wells and small dams, and there are plans to reclaim urban waste water. Most investment however has gone into seawater desalination. By early 1985 22 plants in 21 towns had the capacity to produce 2 lm. metres per day and 5 more, totalling 444,200 cu. metres per day were under construction. Another 10, amounting to 475,682 cu metres per day, were at various stages of planning

Minerals. Surveys were launched during the second and third development plans to investigate potential mineral wealth other than oil. Deposits of several minerals including viable quantities of coal, iron and gold have been found. There are also reports of uranium deposits.

Agriculture. Since 1970 the Government has devoted huge resources to raise the Kingdom's agricultural potential, and spent substantially on desert reclamation, irrigation schemes, drainage and control of surface water and control of moving sands. Undeveloped land has been distributed to farmers and there are research and extension programmes. Large scale private investment has concentrated on meat, poultry and dairy production. Support finance from the Saudi Arabian Agricultural Bank in 1984 totalled 3,496m. rials, chiefly for machinery and equipment 1,127m., well drilling 492m., purchases of poultry stock 209m., wheat and animal feeds, 207m.

Production, 1984 (in 1,000 tonnes) were. Dates, 475, tomatoes, 344; water melons, 871; wheat, 2,047; grapes, 267, milk, 372, poultry meat, 177; red meat, 126; eggs, 132.

Livestock estimates for 1984 include 550,000 cattle, 110,000 asses, 165,000 camels, 3.6m. sheep and 2 35m. goats.

Fisheries. Total catch (1984) 460,000 tonnes.

#### INDUSTRY AND TRADE

Industry. The Government actively encourages the establishment of manufacturing industries in the country. The policy includes the provision of industrial estates and loans covering 50% of capital investment. The Government has also estab-

lished two industrial poles at Jubail and Yanbu, to be the focus of heavy industrial development. Linked by gas and oil pipelines both are to have petrochemical complexes producing, initially, ethylene and methanol, for which agreements have been signed with American and Japanese companies. Seven plants for petrochemicals are on stream in 1986. In addition an integrated steel complex (German partners) and a urea fertilizer factory (Taiwanese), both in Jubail started production in 1983.

Commerce. Exports amounted to 130,000m rials in 1984 and imports 119,000m rials. In 1984 Japan was the main supplier, accounting for 19.8% of the total Other major supplying countries were USA (17.4%), Federal Republic of Germany (8.3%). The main imports were machinery and electrical equipment (23.9%), transport equipment (13.4%) and foodstuffs (15.8%).

Total trade between Saudi Arabia and UK (British Department of Trade returns,

in £1,000 sterring).	1981	1982	1983	1984	1985
Imports to UK	1,892,605	1,447,775	897,702	545,149	483,634

A railway from Riyadh to Dammam on the Gulf (571 km, 1,435 mm gauge) via Dhahran and the oilfields Abqaiq, Ithmaniya (near Hofuf) and Haradh was completed in Oct 1951 A 'dry port' at Riyadh station opened in 1981, and a new 465 km Dammam-Riyadh direct line was opened throughout in 1985. There are plans to extend the line via Medina to Jiddah. That section of the Hejaz Railway which is in Saudi Arabian territory is not now in working order, but studies have been initiated to restore the whole line from Damascus to Medina. In 1985 railways carried 8m passenger-km and 958m tonne-km.

HISTORY. The Solomon Islands were discovered in 1568 by Alvaro de Mendana, on a voyage of discovery from Peru, 200 years passed before European contact was again made with the Solomons. The Solomon Islands lie within the area 5° to 12° 30′ S lat and 155° 30′ to 169° 45′ E long. The group includes the main islands of Guadalcanal, Malaita, San Cristobal, New Georgia, Santa Isabel and Choiseul, the smaller Florida and Russell groups, the Shortland, Mono (or Treasury), Vella La Vella, Kolombangara, Ranongga, Gizo and Rendova Islands, to the east, Santa Cruz, Tikopia, the Reef and Duff groups, Rennell and Bellona in the south, Ontong Java or Lord Howe to the north; and innumerable smaller islands. The 4 first-named were placed under British protection in 1893, the other islands were added in 1898 and 1899

AREA AND POPULATION. The land area of the Solomons is estimated at 11,500 sq miles (29,785 sq km) The larger islands are mountainous and forest clad, with flood-prone rivers of considerable energy potential Guadalcanal has the largest land area and the greatest amount of flat coastal plain

Population of the Solomon Islands was (1984) 258,193 Census (1976) 196,823, over 50% being under 20 years (183,665 Melanesians, 7,821 Polynesians, 452

Chinese, 1,359 Europeans, 2,753 Gilbertese and 773 others).

CONSTITUTION AND GOVERNMENT. A Constitutional Conference was held in London during Sept. 1977, where it was agreed that there should be full independence for the Solomon Islands and this was granted on 7 July 1978

The main provisions of the 1978 Constitution are that Solomon Islands is a constitutional monarchy with the British Sovereign (represented locally by a Governor-General, who must be a Solomon Island citizen) as Head of State, while legislative power is vested in the unicameral National Parliament composed of 38 members, elected by universal adult suffrage for four years (subject to dissolution), and executive authority is effectively held by the Cabinet, led by the Prime Minister

The Governor-General is appointed for up to five years, on the advice of Parliament, and acts in almost all matters on the advice of the Cabinet. The Prime Minister is elected by and from members of Parliament. Other Ministers are appointed by the Governor-General on the Prime Minister's recommendation, from members of Parliament. The Cabinet is responsible to Parliament Emphasis is laid on the devolution of power to provincial governments, and traditional chiefs and leaders have a special role within the arrangement

The Constitution contains comprehensive guarantees of fundamental human rights and freedom, and provides for the introduction of a leadership code and the appointment of an Ombudsman and a Public Solicitor. It also provides for the establishment of the underlying law, based on customary law and concepts of the Solomon Islands people.

Solomon Islands citizenship was automatically conferred on the indigenous people of the islands and on other residents with close ties with the islands upon independence. The acquisition of land is reserved for indigenous inhabitants or

their descendants.

However, despite serious efforts on the part of the registering authorities, the Blacks are still largely reluctant to have their essential data registered. Consequently no complete vital statistics are available for this population group

CLIMATE. The climate is healthy and invigorating, with abundant sunshine and relatively low rainfall. The factors controlling this include the latitudinal position, the oceanic location of much of the country, and the existence of high plateaus. The south-west has a Mediterranean climate, with rain mainly in winter, but most of the country has a summer maximum, though quantities show a clear decrease from east to west Temperatures are remarkably uniform over the whole country Pretoria. Jan. 70°F (21 1°C), July 52°F (11 1°C). Annual rainfall 31" (785 mm). Bloemfontein Jan 73°F (22 8°C), July 47°F (8·3°C). Annual rainfall 23" (564 mm). CONSTITUTION AND GOVERNMENT. On 2 Nov. 1983 a referendum among white voters approved the South Africa Constitution Bill which had pre viously been passed in the House of Assembly by 119 votes to 35. Turnout for the referendum was 2,062,469 (76.02%), of whom 1,360,223 voted in favour

The new constitution became effective on 4 Sept. 1984. It provides for a tricameral parliament: the House of Assembly with 178 members of whom 166 are directly elected and 8 indirectly elected by White voters, the House of Representatives with 85 members of whom 80 are directly elected by Coloured voters; the House of Delegates with 45 members of whom 40 are directly elected by Indian voters. The term for all members is 5 years.

These houses choose (from their majority parties) respectively 50 White, 25 Coloured and 13 Indian members of an electoral college which elects an executive President. The President initiates legislation and resolves disputes between houses He is helped by a 60-member President's Council: 20 members are elected by the House of Assembly, 10 by the House of Representatives and 5 by the House of Delegates, 15 are MPs nominated by himself and 10 are MPs nominated by

Opposition parties.

The President appoints a Ministers' Council for each house, choosing 5 members from the majority party, a member chosen from outside the house must become a member of it within one year, and enjoy majority-party support. The Councils handle the affairs of their own population group and administer the departments established for that group. The President also appoints a Cabinet; any member appointed from outside Parliament must become a member of one of the three Houses within one year. Any Ministers' Council member may be appointed a Cabinet member for a specific purpose or for an indefinite period. Any Ministers' Council may co-opt a Cabinet member in the same way, providing that member qualifies as a member of the Council in question.

Each house legislates on its own community affairs; the three houses have coresponsibility for national affairs. The State President, on the Cabinets' advice,

decides whether a certain matter is a community or a national affair.

To hold an office of profit under the State (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime and insanity Pretoria is the seat of government, and Cape Town is the seat of legislature

National anthem. The Call of South Africa/Die Stem van Suid-Afrika (words by C. J. Langenhoven, 1918; tune by M. L. de Villiers, 1921).

Provincial Administration. In each of the 4 provinces there is an Administrator appointed by the State President-in-Council for 5 years, and a provincial council elected for 5 years, each council electing an executive committee of 4 (either members or not of the council), the Administrator acting as chairman. Members of the provincial council are elected on the same system as members of Parliament The provincial committees and councils have authority to deal with local matters, of which provincial finance, education (primary and secondary, other than higher education and technical education), hospitals, roads and bridges, townships, horse and other racing, and game and fish preservation are the most important. In 1953 the administration and control of Black education was transferred from the provincial councils to the central government. All ordinances passed by a provincial council are subject to the veto of the State President-in-Council

Black Administration In 1951 the Bantu Authorities Act was enacted to provide a system of Black tribal, regional and territorial authorities. These were given limited administrative, executive and judicial functions and limited legislative powers. In 1959 the main ethnic groups received legislative recognition by the passing of the Promotion of Bantu Self-Government Act, which provided inter alia for the various ethnic groups to develop into self-governing national units.

As the Act envisages eventual political autonomy for each of the various national units and as representation in the highest White governing bodies is regarded as a retarding factor, the representation of Blacks by Whites in Parliament and the Cape Provincial Administration was abolished with effect from 30 June 1960.

Territorial Authorities were established between 1968 and 1970, and were converted to Legislative Assemblies in 1971

Each national unit also has an Executive Council. These Councils, each headed by a Chief Councillor, consist of 6 members, except in the case of the South Sotho, where there are only 4 Each of these Councillors is responsible for the administration of a Department A civil service has been established in each instance, staffed by citizens of the respective homelands. White officials will serve the homeland governments on secondment, until trained Black citizens are able to take over all duties.

There are (1986) 10 homelands of which 4 are recognised by the South African government as Independent:

The Transkei, territory of the Xhosa nation, became independent on 25 Oct 1976 (see p. 1091), Bophuthatswana on 6 Dec 1977 (see p. 1089), Venda on 13 Sept. 1979 (see p. 1092) and Ciskei on 4 Dec 1981 (see p. 1094)

There are (1986) 6 territories with a degree of self-government but still forming part of the Republic: Kwa Zulu, Gazankulu (Machangana-Tsonga people), Lebowa (North Soto), Qwaqwa (South Soto), Ka Ngwane (Swazi) and Kwa Ndebele (Southern Ndebele).

DEFENCE. The South African Defence Force comprises a Permanent Force, a Citizen Force and a Commando organization. The Permanent Force consists of professional soldiers, airmen and seamen who are responsible for the administration and training of the whole Defence Force in peace-time, but who are gradually absorbed into the Citizen Force in time of war. The Permanent Force and the Citizen Force consist of Army, Air Force and Naval components; the Commando organization is an army and air organization.

Every white male citizen between 18 and 65 is liable to undergo training and to render personal service in time of war. Those between the ages of 16 and

25 are liable to undergo a compulsory course of peace training. Peace-time training in Commando organizations extends over a period of 16 years' intermittent training. Training in the Citizen Force takes the form of 2 years of continuous training, followed by 9 years during which training takes place at regular intervals.

Aliens have become liable for military service after 5 years' residence by Act of Parliament, 1967

The S A Defence Force is administered by the Chief of the Defence Force, his advisers being the Chief of the Army, Chief of the Air Force and Chief of the Navy, Chief of Staff Operations, Chief of Staff Personnel, the Chief of Staff Management Services and the Surgeon-General

A Water Research Commission was established in 1971 to co-ordinate and promote research; it is responsible for hydrological research, major water resource development, water pollution control. The combined average flow of South Africa's rivers is about 52,000m. cu. metres annually, most of it lost by evaporation and spillage. About 3,100m. cu. metres annually is available from storage dams, and 1,100m. cu. metres from ground water. Water demand (now mainly urban-industrial) grows at 7% annually.

Fisheries. South Africa is no longer engaged in whaling

About 90% of the catch is taken from the cold waters off the west coast. In 1983 sea fisheries caught 376,467 tonnes of pelagic shoal fish, mainly anchovy, and trawl fisheries (hake and sole) landed 123,000 tonnes. # JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The common law of the republic is the Roman-Dutch law-that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, eg, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the Cape Province, and it has also largely influenced civil and criminal procedure throughout the republic. In all other matters, family relations, property, succession, contract, etc., Roman-Dutch law rules, English decisions being valued only so far as they agree therewith

The Supreme Court of South Africa is constituted as follows: (1) The Appellate Division, consisting of the Chief Justice and as many Judges of Appeal as the State President may stipulate, is the highest court and its decisions are binding on all courts. It has no original jurisdiction, but is purely a Court of Appeal. (11) The Provincial Divisions: In each province there is a provincial division of the Supreme Court, while in the Cape there are three such divisions possessing both original and appellate jurisdiction (111) The Local Divisions. There is a local division each in the Transvaal and Natal exercising the same original jurisdiction within limited areas as the provincial divisions. The judges hold office till they attain the age of 70 years. No judge can be removed from office except by the State President upon an address from both Houses of Parliament on the ground of misbehaviour or incapacity. The circuit system is fully developed.

The Black appeal courts and 3 Black divorce courts have jurisdiction to some extent concurrent with and in certain respects exclusive of that of the Supreme Court in cases in which the parties are Black.

Each province is further divided into districts with a magistrate's court having a prescribed civil and criminal jurisdiction. From this court there is an appeal to the provincial divisions of the Supreme Court, and thence to the appellate division Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a judge. In addition, several regional divisions consisting of a number of districts have been constituted. Convictions of such courts are not subject to automatic review by a judge.

Courts of Black affairs commissioners have been constituted in defined areas to hear all civil cases and matters between Black and Black only. An appeal lies to the Black appeal court, whose decision is final, unless the court consents to an appeal to the appellate division of the Supreme Court on a point stated by the court itself Black affairs commissioners have concurrent criminal jurisdiction with magistrates' courts in respect of certain offences committed by Black, while a limited civil and criminal jurisdiction is conferred upon the Black chief or headman over his own tribe

Technical and Vocational Education Technical, vocational and special education for persons other than those for whom specific provision is made (e.g., Black). The Department of National Education is responsible for the maintenance, management and control of or the payment of subsidies to colleges for advanced technical education, technical colleges, technical institutes, special schools, schools of industries and reform schools. Colleges for advanced technical education provide education on an advanced level for a variety of technical, commercial and general courses of study as well as secondary education on a part-time basis Technical colleges and technical institutes are mainly responsible for the training of apprentices and the education, on a part-time basis, of persons not subject to compulsory school attendance. Special schools for handicapped children cater for the educational needs of those who are blind, partially sighted, deaf, hard of hearing, epileptic, cerebral palsied and physically handicapped. Children found to be in need of care by a children's court, are admitted to schools of industries and reform schools.

The Department of Internal Affairs has taken over all schools of this nature for Coloureds.

In 1982, 77 technical and training colleges for Whites had 95,184 students; 12 for Coloureds had about 9,160 students; 1 for Asians had 3,911 students. Provision is made for technical education for Black students at 4 institutions for advanced technical education and 33 industrial or trade schools; total enrolment at these institutions was 15,519 in 1982.

State and State-aided Education other than Higher Education Primary and secondary public education, other than that specifically provided elsewhere, falls under the Provincial Administration. In terms of the National Education Policy Act, 1967, the Minister of Education, Arts and Science may, after consultation with the Provincial Administrators and the National Advisory Education Council, determine general educational policy within the framework of the Act Black education is the responsibility of the Department of Black Education and Training, while education for Coloureds and Indians is controlled by the Department of Internal Affairs

Of these, 2,177 were provincial schools (927,531 and 47,907) For Coloureds, 2,030 schools with 781,339 pupils and 29,973 teachers. Of these, 931 were state schools (634,901 and 24,182) and the rest state-aided For Indians there were 440 schools with 230,725 pupils and 10,011 teachers Of these, 336 were state schools (206,803 and 9,014) and the rest state-aided. Private Schools To a certain extent the activities of private schools are controlled by government regulations. Their pupils generally sit for the state schools' examinations. These schools make provision for kindergarten, elementary and preparatory, general primary, secondary and commercial education.

In 1984, 135 private schools for Whites had 3,130 teachers and 43,111 students, 12 schools for Coloureds had 115 teachers and 2,242 students, 84 for Blacks had 784 teachers and 25,434 students.

All public health services rendered by government bodies are free, or charged according to the patient's means. The Department of Health and Welfare works according to the Health Act, 1977. The Department works with the Departments of Internal Affairs and of Co-operation and Development; it also co-operates with the health departments of Black national states.

In preventive medicine there are important programmes for controlling infectious diseases, genetic disorders and malnutrition. Notifiable diseases reported in recent years have been mainly tuberculosis, measles, typhoid, malaria, viral hepatitis, meningococcal infection and (1980–81) cholera.

Social Welfare. Under the Social Pensions Act, 1973, pensions and allowances are made to aged, blind, disabled and war veterans, subject to a means test. Family allowances are paid to families with 3 or more children and inadequate income, and to mothers alone with one or more children and inadequate income.

Welfare Services. South Africa is not a welfare state, yet provides many services for the community Welfare work on behalf of the Government is done by the Departments of Health and Welfare, Co-operation and Development, and Internal Affairs.

Voluntary organizations are numerous. The work of all these bodies is coordinated by the South African Welfare Council and regional welfare boards set up under the National Welfare Act. 1978

The Children's Act, 1960, provides for the protection of children from neglect, ill-treatment and exploitation, the child is cared for within the family whenever possible, but there are also State subsidies to children's homes, crèches and foster families.

Welfare services for the aged are mainly provided by voluntary bodies with government subsidies, the same principle applies to the care of the handicapped, but there are State settlements for the permanently handicapped, and State sheltered-employment programmes for handicapped adults

The National Advisory Board on Rehabilitation Matters advises and brings together the voluntary and government agencies working on drug abuse and alcoholism

The province of Zululand was annexed to Natal on 30 Dec 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in Jan. 1903. # PROVINCE OF THE TRANSVAAL

HISTORY. The Transvaal was one of the territories colonized by the Boers who left the Cape Colony during the Great Trek in 1831 and following years. In 1852,

by the Sand River Treaty, Great Britain recognized the independence of the Transvaal, which, in 1853, took the name of the South African Republic. In 1877 the republic was annexed by Great Britain, but the Boers took up arms towards the end of 1880. In 1881 peace was made and self-government, subject to British suzerainty and certain stipulated restrictions, was restored to the Boers. The London Convention of 1884 removed the suzerainty and a number of these restrictions but reserved to Great Britain the right of approval of the Transvaal's foreign relations, excepting with regard to the Orange Free State. In 1886 gold was discovered on the Witwatersrand, and this discovery, together with the great influx of foreigners which it occasioned, gave rise to many grave problems. Eventually, in 1899, war broke out between Great Britain and the Transvaal. Peace was concluded on 31 May 1902, the Transvaal and the Orange Free State both losing their independence. The Transvaal was governed as a crown colony until 12 Jan. 1907, when responsible government came into force On 31 May 1910 the Transvaal became one of the four provinces of the Union.

AREA AND POPULATION. The area of the province is 262,499 sq km or 101,351 sq miles, including Gazankulu, Lebowa, Ka Ngwane and Kwa Ndebele. The province is divided into 53 districts. # PROVINCE OF THE ORANGE FREE STATE

# Oranje-Vrystaat

HISTORY. The Orange River was first crossed by Europeans in the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly increased the number of settlers during and after 1836. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal rivers as a British possession called the 'Orange River Sovereignty' However, in 1854, by the Convention of Bloemfontein, British sovereignty was withdrawn and the independence of the country was recognized

During the first 5 years of its existence the Orange Free State was much harassed by incessant raids by the Basutos These were at length conquered, but, owing to the intervention of the British Government, the treaty of Aliwal North incorporated only part of the territory of the Basutos in the Orange Free State

On account of the treaty with the South African Republic, the Orange Free State took a prominent part in the South African War (1899–1902) and was annexed on 28 May 1900 as the Orange River Colony Crown colony government continued until 1907, when responsible government was introduced On 31 May 1910 the Orange River Colony was merged in the Union of South Africa as the province of the Orange Free State, and on 31 May 1961 became a province of the Republic of South Africa.

# SOUTH WEST AFRICA

# Suidwes-Afrika—Namibia

HISTORY. Britain annexed Walvis Bay in 1878, and incorporated it in the Cape of Good Hope in 1884. In 1884 South West Africa was declared a German protectorate. In 1915 the Union of South Africa occupied German South West Africa at the request of the Allied powers. On 17 Dec. 1920 the League of Nations entrusted South West Africa as a Mandate to the Union of South Africa, to be administered under the laws of the mandatory power. In 1921 the Governor-General of South Africa delegated certain of his functions to the Administrator of the territory. After World War II South Africa refused to place the territory under the UN Trusteeship system, and formally applied for its annexation to the Union. On 18 July 1966 the International Court of Justice decided that Ethiopia and Liberia had no legal right

in applying for a decision on the international status of South West Africa, but in Oct. 1966 the General Assembly of the UN terminated South Africa's mandate, and established a UN Council for South West Africa in May 1967. However, South Africa continued to administer the territory, in defiance of various UN resolutions. It speeded up the implementation of the Odendaal Plan (1964), which required massive development aid and the formation of enlarged homelands for the various ethnic groups. In June 1968 the UN changed the name of the territory to Namibia. In 1971 the International Court of Justice ruled in an advisory opinion that South Africa's presence in Namibia was illegal. In Dec. 1973 the UN appointed a UN Commissioner for Namibia.

After negotiations between South Africa and the UN, a multi-racial Advisory Council was appointed in 1973 Representatives of all the population groups assembled in the Turnhalle in Windhoek for the Constitutional Conference, which on 17 Aug. 1976 decided that a multi-racial interim government was to be formed by early 1977, and that the country should become independent by 31 Dec. 1978 This interim government was rejected by the Western Five, (USA, Britain, Federal Republic of Germany, France and Canada), after which South Africa agreed to universal suffrage elections. An Administrator-General was appointed in Sept. 1977 to govern the territory until independence, and he quickly moved to abolish all laws based on racial discrimination – a precondition for elections. In April 1978 South Africa accepted a plan for UN-supervised elections leading to independence, which was endorsed in UN Security Council Resolution 435 of 27 July 1978 After the final plans for the UN-supervised elections were published, South Africa announced on 20 Sept 1978 that it was going ahead with internally sponsored elections for a Constitutent Assembly. In the elections held on 4-8 Dec. 1978 the Democratic Turnalle Alliance (DTA) gained 41 of the 50 seats in a percentage poll of 82%, in spite of the fact that the South West Africa People's Organisation (SWAPO) instructed its members not to take part in the elections

A 12-member Ministers' Council was instituted, and in Sept. 1981 it was enlarged to 15 members and given executive authority on all matters except constitutional issues, security and foreign affairs. On 11-13 Nov 1980 elections were held for the second-tier Representative Authorities, which each controls certain administrative functions for a specific ethnic group, but no specific geographical area. In Jan. 1983 the Ministers' Council and the National Assembly were dissolved and executive and legislative powers reverted to the Administrator-General

On 13 Sept 1983 the Multi-Party Conference (MPC) was formed In May 1984 talks were held in Lusaka between the MPC and SWAPO, which were followed in July 1984 by talks between the Administrator-General and SWAPO SWAPO, which had been waging a terrorist war in the north for almost two decades, was again invited to take part in constitutional talks with the MPC, but again refused The MPC then petitioned the Republic of South Africa for a form of self-government for Namibia, and on 17 June 1985 the Transitional Government of National Unity was installed, consisting of the six political groups in the MPC

AREA AND POPULATION. The total area of the Territory, including the Caprivi-Zipfel, is 318,251 sq miles (824,269 sq. km), this figure includes that of Walvis Bay, administered by South West Africa, 434 sq. miles (1,124 sq. km).

The country is bounded on the north by Angola and Zambia, on the west by the Atlantic ocean, on the south and southern portion of the eastern boundary by the Cape Province, and on the remainder of the eastern boundary by Botswana and Zambia There are 3 main regions the Namib, an extremely arid and desolate region stretching along the entire coastline to a width of between 80 to 130 km. The major portion of the Namib receives an annual rainfall of less than 50 mm. The Central Plateau is the region lying to the east of the Namib. It varies in altitude between 1,000 and 2,000 metres and offers a diversified landscape of rugged mountains, rocky outcrops, sand-filled valleys and plains. It covers approximately 50% of the total area; the Kalahari covers the eastern, north-eastern and northern areas of South West Africa.

The rainfall increases steadily from less than 50 mm in the west and south-west up to 600 mm. in the Caprivi Strip.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi-Zipfel, the Kwando or Mashi, which flows through the Caprivi-Zipfel from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great, sandy, dry river-beds throughout the country, in which water can generally be obtained by sinking shallow wells. In the Grootfontein area there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water in the country.

On 13 Oct 1964 and 29 Jan 1969 the Republic of South Africa and Portugal signed agreements on the common use of the Kunene River

Owing to the difficulty of satisfactorily controlling that part of the Caprivi-Zipfel, east of the line running due south from Beacon 22, situated west of the Kwando (or Mashi) River, the control of this area was in Aug 1939 transferred to the Union Department of Native Affairs

The population at the census 1960, 1970 and 1981 was

	1960	1970	1981
Ovambos	239,363	342,455	506,114

ADMINISTRATION. The South West Africa Affairs Amendment Act, 1949, abolished the Advisory Council and the nominated members of the Legislative Assembly All 18 members of the Assembly are now elected by the registered voters of the Territory

The election held on 24 April 1974 returned 18 Nationalists

Until 1977 the Territory was represented in the South African House of Assembly by 6 members elected by the registered voters of the Territory, and in the Senate by 4 Senators, of which number 2 were elected by the members of the Legislative Assembly and the representatives of the Territory in the House of Assembly, and 2 nominated by the President of the Republic Under the South West Africa Constitution Amendment Act 1977 this representation was abolished.

A commission of inquiry, appointed by the South African Government, in 1964 recommended the establishment of 'homeland areas' for the non-White groups. All these areas should be governed by legislative councils, headed by executive committees, franchise should be granted to males and females over 18 years who qualify for citizenship in their respective homelands.

On 17 Oct. 1968, 22 Oct 1970 and 15 March 1973 respectively the first sessions of the Legislative Councils of Ovambo (77 members), Kavango (30 members) and Eastern Caprivi (28 members) were opened.

On 1 May 1973 and 9 May 1973 respectively Ovambo and Kavango obtained self-government

On 13 Oct. 1966 the security and apartheid laws of the Republic of South Africa were extended to South West Africa, retrospective to 1950. The Legislative Assembly adopted a resolution on 22 Nov. 1974 inviting the representatives of the various population groups to deliberate with the representatives of the Whites on the manner in which they should exercise their right of self-determination in view of the South African government's desire that the inhabitants of South West Africa should themselves decide upon their future

The seat of the administration is Windhoek. The country is divided into 22 districts controlled by magistrates and commissioners

Administrator-General Louis Pienaar.

## **BOPHUTHATSWANA**

HISTOR\. Bophuthatswana was first to obtain self-government under the Bantu Homelands Constitution Act of 1971 and was the second black homeland to ask the Republic of South Africa for full independence, which was granted on 6 Dec 1977

## AREA AND POPULATION. The total area is 44,000 sq km

In 1985 there was a de jure population of 3.2m, of which 43% lived in the White areas. The remaining 57% (1,830,840) lived in the homeland. In addition, the homeland has a further population of about 405,000 non-Tswanas, giving the homeland a de facto population of about 1,656,000 Estimate (1985) 1 66m.

CONSTITUTION AND GOVERNMENT. The Bophuthatswana Government is a compromise between the traditional chief-in-council system and a democratic electoral system. There are 72 elected and 24 nominated members in the Legislative Assembly. Self-government was granted in 1972. Each regional authority (coinciding with the 12 districts of the homeland) nominates 2 members, and each district elects 6 members to the National Assembly and 12 designated by the President on account of their special knowledge, qualifications or experience.

Executive power vests in the President, who is directly elected by general suffrage of persons who are registered as voters, and he elects his Cabinet.

The first general election was held in Oct. 1972, 2 political parties taking part. Kgosi Lucas Mangope's Bophuthatswana National Party (BNP) won 20 of the 24 contested seats, but in 1974 he formed the Bophuthatswana Democratic Party which in 1979 held two-thirds of the seats in the Assembly and in the 1983 elections gained all the seats.

Members of regional authorities are elected from among the tribal and community authorities in their area.

The Cabinet in Feb. 1986 consisted of:

President, Minister of Law and Order Kgosi Dr Lucas Manyane Mangope (took office 6 Dec. 1977; re-elected for another 7 years as from 11 Nov 1984)

## **ECONOMY**

**Budget.** The 1983–84 budget envisaged expenditure of R152,074,050

Currency. South African Rand

## NATURAL RESOURCES

Water. In Oct 1982 there were 118 hectares of canals, 250 dams and 520 boreholes

Minerals. Venda is relatively poor in mineral resources, although there are large supplies of stone for construction. Coal is the most important mineral; there are large deposits in the west near Makhado and in the north-east, bordering on the Kruger National Park, which it is hoped will soon be exploited. In addition there are deposits of graphite, copper sulphides, phosphates and magnesite, in 1978 the 2 graphite and 2 magnesite mines provided employment for 233 people, and the value of their output was R963,900.

Agriculture. About 85% of Venda is suitable only for the raising of livestock because of insufficient rainfall and poor soils, while some 10% is suited to dry-land crop production. Over 10,965 hectares have been given over to forest, mainly pine and eucalyptus. Eighteen irrigation schemes are being developed and there is extensive reclamation and conservation of eroded or overgrazed land; nearly R2m, were spent on these projects in 1980–81. Only maize is grown on a comparatively large scale, but tea, sisal, groundnuts, coffee and sub-tropical fruits are increasing in importance. A fish-breeding project produced 3 tonnes in 1980–81.

Over 80% of the working population are engaged in agriculture. The Venda Agricultural Corporation (Agriven) was established on 1 April 1982 to promote agricultural development.

INDUSTRY. Industrial development is still in its early stages, and since Venda's location is unfavourable, the Government is concentrating on the promotion of agro-industries utilizing local produce, and small-scale industries. A chutney factory has recently been established, in addition to a tea processing plant, a furniture factory and several saw-mills. A copper-chrome arsenate preservation plant has been established at Phiphidi. At Shayandima a 20-hectare industrial area has been

1094 CISKEI

prepared The construction industry is particularly important owing to the substantial increase in the demand for buildings caused by the recent expansion of government, educational and health services

In Dec. 1982 total investment in industry was estimated at R18.9m. The Venda Development Corporation was established in 1975 to promote and finance economic developments

# SOUTH GEORGIA AND SOUTH SANDWICH ISLANDS

HISTORY. South Georgia was probably first sighted by a London merchant, Antonio de la Roche, and then in 1756 by a Spanish Captain, Gregorie Jerez The first landing and exploration was undertaken by Captain James Cook, who formally took possession in the name of George III on 17 Jan 1775. British sealers arrived in 1788 and American sealers in 1791 Sealing reached its peak in 1800. A German team was the first to carry out scientific studies there in 1882–83 Whaling began in 1904 when the Compania Argentina de Pesca formed by C. A. Larsen, a Norwegian, established a station at Grytviken. Six other stations were established up to 1912. Whaling ceased in 1966 and the civil administration was withdrawn. Argentine forces invaded South Georgia on 3 April 1982. A British naval task force recovered the Island on 25 April 1982.

AREA AND POPULATION. South Georgia lies 800 miles south-east of the Falkland Islands and has an area of 1,450 sq miles. The South Sandwich Islands are 470 miles south-east of South Georgia and have an area of 130 sq. miles. There has been no permanent population in South Georgia since the whaling station at Leith was abandoned in 1966. There is a small military garrison. The British Antarctic Survey have a biological station on Bird Island. The South Sandwich Islands are uninhabited.

CLIMATE. The climate is wet and cold with strong winds and little seasonal variation. 15°C is occasionally reached on a windless day Temperatures below -15°C at sea level are unusual

CONSTITUTION AND GOVERNMENT. Under the new Constitution which came into force on 3 Oct. 1985 the Territories ceased to be dependencies of the Falkland Islands Executive power is vested in a Commissioner who is the officer for the time being administering the Government of the Falkland Islands. The Commissioner is obliged to consult the officer for the time being commanding. Her Majesty's British Forces in the South Atlantic on matters relating to defence and internal security (except police). Communications. There is occasional direct sea communication between the Falkland Islands and South Georgia and the South Sandwich Islands by means of the Royal Research Ships John Biscoe and Bransfield and the ice patrol vessel HMS Endurance. Royal Fleet Auxiliary ships, which serve the garrison, run regularly to South Georgia. Mail is dropped from military aircraft.

Justice. There is a Supreme Court for the Territories and a Court of Appeal in the United Kingdom Appeals may go from that court to the Judicial Committee of the Privy Council. There is no magistrate permanently in residence. The Officer Commanding the garrison is usually appointed a magistrate.

Legislative power is vested in the *Cortes*, a bicameral parliament composed of the Congress of Deputies (lower house) and the Senate (upper house). The Congress of Deputies has not less than 300 nor more than 400 members (350 in the general elections of 1977, 1979 and 1982), all elected in a proportional system regarding the population of every province. The members of the Senate are elected in a majority system. the 47 peninsular provinces elect 4 senators each, regardless of population, the insular provinces electing 5 (Baleares, Las Palmas) or 6 (Santa Cruz de Tenerife), and Ceuta and Melilla, 2 senators each. Regional and local government The Constitution of 1978 establishes a semifederal system of regional administration, with the autonomous community (Comunidad Autónoma) as its basic element. There are 17 autonomous communities, each of them having a Parliament, elected by universal vote, and a regional government; all possess exclusive legislative and executive power in many matters, as listed in the national Constitution and in their own fundamental law (estatuto de autonomía). The Basque Country and Catalonia elected their first parliaments in

March 1980, Galicia in Oct. 1981 and Andalusia in May 1982. All others in May 1983. Basque, Catalan and Galician parliaments were renewed in their regional

elections of Feb. 1984, April 1984 and Nov. 1985 respectively.

There are 7 autonomous communities composed of one only province, 1 e, Asturias (ex-Oviedo province), Cantabria (ex-Santander province), La Rioja (ex-Logroño province), Navarra, Baleares, Murcia and Madrid. The other 10 are formed by 2 or more provinces. In all, there are in Spain 50 provinces, since the administrative division established in 1833, Ceuta and Melilla, municipalities in the northern coast of Morocco, are not part of any province. The provincial council (Diputación Provincial) is the administrative organ of the province, except in the 7 autonomous communities composed of one only province, where there are only the regional legislative and executive powers. The provincial council is indirectly elected Each of the 7 main islands of the Canaries (provinces of Las Palmas and Santa Cruz de Tenerife) has a directly elected corporation, the Cabildo Insular, to rule its special interests

The provinces are constituted by the association of municipalities (8,022 in 1981 census). Municipalities are autonomous in their own sphere. At their head stands the municipal council (Ayuntamiento), members of which are elected in a universal ballot every 4 years, and they, in turn, elect one of them as Mayor (Alcalde)

## JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. Justice is administered by Tribunales and Juzgados (Tribunals and Courts), which conjointly form the Poder Judicial (Judicial Power). Judges and magistrates cannot be removed, suspended or transferred except as set forth by law The Constitution of 1978 has established a new organ, the Consejo General del Poder Judicial (General Council of the Judicial Power), formed by magistrates, judges, attorneys and lawyers, governing the Judicial Power in full independence from the other two powers of the State, the Legislative (Cortes) and the Executive (President of the Government and his Cabinet). The territorial organization of justice is being gradually changed, adapting it to the new map of the country in Autonomous Communities and when completed, in each of these it will be a Tribunal Superior de Justicia as the highest judicial organ, responsible only to the national Tribunal Supremo.

The Judicature is composed of the Tribunal Supremo (Supreme High Court), 16 Audiencias Territoriales (Division High Courts), 50 Audiencias Provinciales (Provincial High Courts), 518 Juzgados de Primera Instancia (Courts of First Instance), 755 Juzgados de Distrito (District Courts) and 7,532 Juzgados Municipales y de paz (Municipal and Peace Courts, court of lowest jurisdiction held by Justices of the Peace)

The Tribunal Supremo consists of a President (appointed by the King, on proposal from the Consejo General del Poder Judicial) and various judges distributed

among 6 chambers: 1 for trying civil matters, 3 for administrative purposes, 1 for criminal trials and 1 for social matters. The *Tribunal Supremo* has disciplinary faculties, is court of cassation in all criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the State, and in social matters resolves in the last instance all cases involving over 100,000 pesetas.

The Audiencias Territoriales have power to try in second instance sentences

passed by judges in civil matters.

The Audiencias Provinciales try and pass sentence in first instance on all cases filed for delinquency. The jury system, re-established by the art 125 of the Constitution, had not been applied by Jan 1984, pending its parliamentary regulation

The Juzgados Municipales try small civil cases and petty offences The Juzgados Comarcales deal with the same charges, but their jurisdiction embraces larger districts.

Military cases are tried by the *Consejo Supremo de Justicia Militar* but its sentences can now pass to the (civil) *Tribunal Supremo*, as final cassation instance

The Tribunal Constitutional (Constitutional Court) has power to solve conflicts between the State and the Autonomous Communities, to determine if legislation passed by the Cortes is contrary to the Constitution and to protect constitutional rights of the individuals violated by any authority. Its 12 members are appointed by the King in the following way. 4, on proposal of the Congress of Deputies; 4, on proposal of the Senate, 2 on proposal of the Consejo General del Poder Judicial, and 2 on proposal of the Cabinet.

The death penalty was abolished in 1978 by the Constitution (art. 15) Divorce is again legal since July 1981 and abortion since Aug 1985

The prison population was, on 11 Nov. 1984, 18,200

**Religion.** Roman Catholicism is the religion of the majority. There are 11 metropolitan sees and 52 suffragan sees, the chief being Toledo, where the Primate resides.

The archdioceses of Madrid-Alcalá and Barcelona depend directly from the Vatican.

The Constitution guarantees full religious freedom and states that no religion has an established legal condition (art 16); so, since 29 Dec 1978 there has been no official religion in Spain. A report issued in 1982 by the Episcopal Conference of the Roman Catholic Church claims that 82 76% of all children born in 1981 were baptized in that church

There are about 250,000 other Christians, including several Protestant denominations, Jehovah Witnesses (about 60,000) and Mormons The British and Foreign Bible Society was, on 10 March 1963, allowed to resume its activities

The first synagogue since the expulsion of the Jews in 1492 was opened in Madrid on 2 Oct. 1959. The number of Jews is estimated at about 13,000

Education. Primary education is compulsory and free between 6 and 14 years of

In 1983-84 pre-primary education (under 6 years) was conducted by 38,386 schools, with 38,084 teachers and 1,171,062 pupils. Primary or basic education (6 to 14 years): 183,861 schools, 191,145 teachers and 5,633,509 pupils. Secondary education (14-17 years) is conducted on two branches: Middle schools (Institutos), and vocational and technical centres (Formación Profesional), with together 4,944 school units, 116,595 teachers and 1,837,488 pupils. For adult education there were (in 1983-84) 2,988 school units, with 3,112 teachers and 104,593 students. For the physically or mentally disabled there were 4,462 school units, with 4,467 teachers and 48,079 pupils.

# FORMER PROVINCE IN AFRICA (WESTERN SAHARA)

It was announced in Madrid on 14 Nov. 1975 that Spain, Morocco and Mauritania had reached agreement on the transfer of power over Western Sahara to Morocco and Mauritania on 28 Feb. 1976. Morocco occupied El Ajaún in late

Nov. and on 12 Jan. 1976 the Spanish army withdrew from Western Sahara which had ceased to be a Spanish province on 31 Dec. 1975. The country was partitioned by Morocco and Mauritania. In Aug. 1979 Mauritania withdrew from the territory it took over in 1976. The area was taken over by Morocco and

reorganized into provinces.

Algeria stated that the former province should be handed over to the people of the territory, objected to the partition and is (1982) backing the claims of *Frente Polisario* for an independent state. In spite of occupation of all western centres by Moroccan troops, Saharan guerrillas based in Algeria continue to attempt to liberate their country. They have renamed it the Democratic Saharan Arab Republic and hold most of the desert beyond a defensive line built by Moroccan troops encompassing Smara, Bu Craa and Laayoune.

In 1982 the Democratic Saharwi Arab Republic became a member of the

Organization of African Unity (OAU)

The area was 266,769 sq. km (102,680 sq miles). The population at the census (1970) was 76,425, Saharans, 59,777 and 16,648 Europeans The

capital was El Aaiún (Laayoune) (population, 24,048).

Rich phosphate deposits were discovered in 1963 at Bu Craa Morocco holds 65% of the shares of the former Spanish state-controlled company. While production reached 5 6m tonnes in 1975, exploitation has been severely reduced by guerrilla activity but in 1984 produced 1m tonnes. After a nearly complete collapse, production and transportation of phosphate resumed in 1978, ceased again, and then resumed in 1982.

HISTORY. The Swazi migrated into the country to which they have given their name, in the last half of the 18th century. They settled first in what is now southern Swaziland, but moved northwards under their chief, Sobhuza-known also to the Swazi as Somhlolo. Sobhuza died in 1838 and was succeeded by Mswati. The further order of succession has been Mbandzeni and Bhunu, whose son, Sobhuza II,

was installed as King of the Swazi nation in 1921 after a long minority

The independence of the Swazis was guaranteed in the conventions of 1881 and 1884 between the British Government and the Government of the South African Republic In 1890, soon after the death of Mbandzeni, a provisional government was established representative of the Swazis, the British and the South African Republic Governments. In 1894 the South African Republic was given powers of protection and administration In 1902, after the conclusion of the Boer War, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory, through the Special Commissioner Swaziland became independent on 6 Sept 1968

On 25 April 1967 the British Government gave the country internal self-government. It changed the country's status to that of a protected state with the Ngwenyama, Sobhuza II, recognized as King of Swaziland and head of state. King

Sobhuza died on 21 Aug. 1982

The Parliament consists of a House of Assembly, with 24 elected and 6 nominated members and the Attorney-General, who has no vote, and a Senate comprising 12 members, 6 of whom are elected by the House of Assembly and 6 appointed by the King. The executive authority is vested in the King and exercised through a Cabinet presided over by the Prime Minister, and consisting of the Prime Minister, the Deputy Prime Minister and up to 8 other ministers. In April 1973 the King assumed supreme power and the Constitution was suspended and in 1976 it was abolished On 28 Oct 1983 a general election took place to elect an electoral college of 80 members. CONSTITUTION AND GOVERNMENT. Sweden's present Constitution came into force in 1975 and replaced the 1809 Constitution. Under the present Constitution Sweden is a representative and parliamentary democracy. Parliament (Riksdag) is declared to be the central organ of government. The executive power of the country is vested in the Government, which is responsible to Parliament The King is Head of State, but he does not participate in the government of the country Since 1971 Parliament has consisted of one chamber. It has 349 members, who are elected for a period of 3 years in direct, general elections

Every man and woman who has reached the age of 18 years on election-day itself, and who is not under wardship has the right to vote and to stand for election.

The manner of election to the Riksdag is proportional. The country is divided into 28 constituencies. In these constituencies 310 members are elected. The remaining 39 seats constitute a nation-wide pool intended to give absolute proportionality to parties that receive at least 4% of the votes. A party receiving less than 4% of the votes in the country is, however, entitled to participate in the distribution of seats in a constituency, if it has obtained at least 12% of the votes cast there.

The Riksdag, elected 1982, has 159 Social Democrats, 76 Conservatives, 44 Centre Party, 51 Liberals and 19 Communists.

The Social Democratic Cabinet was composed as follows in Feb. 1986:

Prime Minister and Minister with special responsibility for Research and

Environment Ingvar Carlsson.

Agriculture Svante Lundkvist. Finance Kjell-Olof Feldt. Health and Social Affairs: Gertrud Sigurdsen. Housing Hans Gustafsson. Labour. Anna-Greta Leijon. Special responsibility for international development co-operation, Ministry of Foreign Affairs. Lena Hjelm-Wallen. Industry Thage Peterson. Foreign Affairs Sten Andersson. Justice Sten Wickbom. Transport and Communications Sven Hulterström. Education and Cultural Affairs Lennart Bodström. Education, with special responsibility for cultural affairs, the mass media and comprehensive schools Bengt Göransson. Labour, with special responsibility for immigrant and equality affairs: Anita Gradin. Industry, with special responsibility for energy questions Birgitta Dahl Defence Roine Carlsson Public Administration Bo Holmberg. Foreign Trade Mats Hellström. Special responsibility for wages in public administration, Ministry of Finance: Bengt Johansson. Special responsibility for family policy, the disabled and elderly, Ministry of Health and Social Affairs. Bengt Lindquist.

Ministerial decisions are formally made by the Cabinet collectively and not (with some exceptions) by individual ministers.

Public administration in Sweden is characterized by a unique degree of functional decentralization. The Ministries are not really administrative agencies. Their main function is to prepare the decisions of the Cabinet, such decisions may concern bills for the Riksdag, general government directives and higher appointments. Only to a small extent does the Cabinet make individual administrative decisions. The routine administrative work is attended to by the central boards (centrala ambetsverk). Each board is in principle subordinate to the government, its sphere of activity depends on the appropriations granted by the Riksdag. The Government often asks the boards' opinion on proposed measures.

National flag Blue with a yellow Scandinavian cross

National anthem Du gamla, du fria, du fjallhoga nord (words by R Dybeck, 1844, folk-tune).

The official language is Swedish. The capital is Stockholm

Regional and Local Government For national administrative purposes Sweden is divided into 24 counties (làn), in each of which the central government is represented by a state county administrative board (lansstyrelse). The governor (landshovding), appointed by the government, is chairman of the board, which in addition to the governor has 14 members elected by the county council

Local government and the levying of local taxes are based on the Instrument of Government (the Swedish Constitution) and are regulated by the local government act and special acts. According to the local government act Sweden is divided into municipalities in which all men and women who have reached the age of 18 on election-day itself, and not under wardship, are entitled to elect the municipal council These councils are named kommunfullmaktige The number of municipalities has, since 1951, been reduced from about 2,500 to 284. The municipalities deal with a great variety of different tasks such as social welfare, education and culture, public health, town planning, housing etc. Each county, except Gotland, which consists of only one municipality, has a county council (landsting) elected by men and women who enjoy local suffrage. The county councils chiefly administer the health services and medical care. The municipalities of Gothenburg and Malmo do not belong to county councils Ecclesiastical affairs in all parishes with more than 500 inhabitants entitled to vote are dealt with by church councils (kyrkofullmaktige), smaller parishes may make the same arrangement. All elections are conducted on a proportional basis

**DEFENCE.** A Supreme Commander 1s, under the Government, 1n command of the three services. He is assisted by the Defence Staff under a chief of staff.

The military forces are recruited on the principle of national service, supplemented by voluntarily enlisted personnel who form the permanent cadres for training purposes, staff duties, etc.

Liability to service commences at the age of 18, and lasts till the end of the 47th year. The period of training for the Army and Navy is 7½-15 months and for the Airforce 8-15 months.

The territorial organization consists of 6 military commands each one under a general officer commanding

Army. The C.-in-C. of the Swedish Army has at his disposal the Army Staff under a chief of staff. The peace-time Army consists for training purposes of 16 infantry, 2 cavalry, 6 armour, 5 artillery, 5 AA, 3 engineer, 2 signal and 3 Army Service Corps units, most of which are called 'regiments' (regementen). The Army Aviation Corps comprises 2 Battalions operating 20 Bulldog aircraft and 20 JetRanger helicopters for observation, 12 AB.204B transport helicopters, and 25 Hughes 269 helicopters and 3 DO 27 aircraft for training.

The Army is organized and equipped with regard to the varying geographical

and climatic conditions of the country. The voluntary Home Guard (*Hemvärnet*) with a total strength of more than 100,000 men ready for action within 2 hours, raised during the War continues to be in force.

Sweden's ground forces, total 850,000 men (including the voluntary Home Guard), can be said to consist of an Army which for the most part is on indefinite leave, but which on short notice can be ready for action. One of the basic principles of the Swedish system of mobilization is the local recruitment of as many units as possible. The storage of equipment and supplies is decentralized on more than 3,000 places.

The active personnel of the Army comprises (1986) about 47,000, including 38,000 conscripts doing basic training

Navy. The C -in-C of the Swedish Navy is assisted by the Chief of Naval Staff, the Inspector of the Navy and the Inspector of the Coast Artillery. The Navy is divided into two branches, the Navy and the Royal Coast Artillery. There are 3 Naval Base Areas: those of the southern, eastern and western coasts. The coast artillery defence areas are those of the Stockholm archipelago, Blekinge, Gothenburg, Gotland and Norrland There are 5 coastal artillery regiments.

There are 12 diesel-powered patrol submarines, 16 fast missile craft, 14 fast missile/torpedo boats, 6 fast torpedo boats, 2 patrol craft, 3 minelayers, 1 mine countermeasures support ship, 11 coastal minelayers, 3 new minehunters, 10 coastal minesweepers, 4 patrol vessels (ex-minesweepers), 23 inshore minesweepers, 25 coastal patrol craft, 2 mine transports, 22 minelaying boats, 1 surveillance ship, 3 torpedo recovery vessels, 17 tenders, 5 surveying vessels, 7 icebreakers, 3 oilers, 1 salvage vessel, 13 artillery landing craft, 81 utility landing craft, 54 minor landing craft, 2 sail training ships, 1 supply ship, 2 water carriers and 17 tugs.

Four submarines, 4 missile armed fast attack craft leaders (officially classed as corvettes), 2 coastal minelayers and 4 more minehunters are under construction or projected.

The Naval Air Arm comprises 14 Boeing Vertol 107 helicopters and 10 Jet-Ranger helicopters. Four heavy helicopters are to be acquired for anti-submarine warfare.

The personnel of the navy and coast artillery in 1985 totalled 18,000 officers and men, comprising 3,500 regulars and 6,200 national servicemen. 6,250 conscripts train annually

The Coast Guard operates 140 cutters, patrol boats and service craft and lists 5 aircraft. Personnel in 1986 numbered 570.

Air Force. The C-in-C. of the Swedish Air Force has at his disposal the Air Staff under a chief of staff.

The combat force consists of 3 fighter-interceptor, 3 ground-attack and 3 mixed interceptor/reconnaissance wings (flottilier), each with 2-3 squadrons of 12-15 aircraft, including 3 reconnaissance squadrons (divisioner). Total peace-time strength of the combat units is 20 squadrons with nearly 400 first-line aircraft.

Night and all-weather fighters are the Swedish-built Saab J35 Draken, equipping 5 squadrons, and JA37 Viggen, equipping 6 squadrons. The ground-attack wings have 5 squadrons of Saab AJ37 Viggens, and there is provision for 4 light ground-attack squadrons of twin-jet Saab-105s (Sk60s), which could be withdrawn in wartime from training units. The 3 reconnaissance squadrons have SF37 (photo) and SH37 (maritime, radar) Viggen reconnaissance aircraft; and there are transport, helicopter and other support units. The Sk60A is the Air Force's standard advanced trainer, to which pupils progress after initial training on piston-engined Bulldogs. Other trainers in service include the Sk61 Bulldog, Sk35C Draken and Sk37 Viggen.

Active strength consists of about 9,500 personnel, including 4,500 conscripts.

# **ENERGY AND NATURAL RESOURCES**

Electricity. Sweden is rich in hydro-power resources. The total electric energy production in 1983 was 109,391m kwh. About 59% of this energy was produced in hydro-electric plants. Additional electric energy consumption will in the future mainly be covered by nuclear power and conventional thermal power.

Minerals. Sweden is one of the leading exporters of iron ore. The largest deposits are found north of the polar circle in the area of Kiruna and Gallivare-Malmberget. The ore is exported via the Norwegian port of Narvik and the Swedish port of Luleå. There are also important resources of iron ore in southern Sweden (Bergslagen). The most important fields are Grangesberg and Stråssa and the ores are shipped via the port of Oxelösund. Some of the southern deposits have, in contrast to the fields in North Sweden, a low phosphorus content.

There are also some deposits of copper, lead and zinc ores especially in the Boliden area in the north of Sweden. These ores are often found together with pyrites Non-ferrous ores, except zinc ores, are used in the Swedish metal industry and

barely satisfy domestic needs

The total production of iron ores amounted to 13 8m tons in 1983 and exports to 10 5m tons. The production of copper ore was 303,597 tons, of lead ore 115,949 tons, of zinc ore 374,985 tons.

There are also deposits of raw materials for aluminium not worked at present. In southern Sweden there are big resources of alum shale, containing oil and uranium

Agriculture. According to the farm register which is revised annually the following data was provided for 1983. The number of farms in cultivation of more than 2 hectares of arable land, was 111,580, of these there were 67,016 of 2-20 hectares, 41,119 of 20-100 hectares; 3,446 of above 100 hectares. Of the total land area of Sweden (41,161,500 hectares), 2,933,133 hectares were arable land, 346,458 hectares cultivated pastures and (1981) 22,742,235 hectares forests

<sup>1</sup> Figures refer to holdings of more than 2 hectares of arable land

Forestry. In 1978-82 the forests covered an area of 23 5m hectares, i.e. roughly 57% of the country's land area. Municipal and State ownership accounts for one-fourth of the forests, companies own another fourth, and the remaining half is in private hands. In the felling seasons, 1981-82 and 1982-83 respectively, 49.4m and 51.6m. cu. metres (solid volume excluding bark) of wood were removed from the forests in Sweden. The sawmill, wood pulp and paper industries are all of great importance. The number of sawmills in 1979 was about 2,600, 400 of which were commercial sawmills, with more than 90% of the total production of sawn hardand soft-wood. In 1983 the total production was about 11.5m. cu. metres. The wood pulp factories total output amounted to 8 4m. tons (including dissolving pulp) (dry weight).

Fisheries. In 1984 the total catch of the sea fisheries was 259,300 tons, landed weight, value 714.9m. kr.

## INDUSTRY AND TRADE

Manufacturing. The most important sector of Swedish manufacturing is the

production of metals, metal products, machinery and transport equipment, covering almost half of the total value added by manufacturing. Production of high-quality steel is an old Swedish speciality. A large part of this production is exported. The production of ordinary steel is slightly decreasing and is still short of domestic demand. The total production of steel amounted to 4 1m. tons in 1983. There is also a large production of other metals (aluminium, lead, copper) and rolled semi-manufactured goods of these metals.

These basic metal industries are an important basis for the production of more developed metal products, machinery and equipment, which are to a large extent sold on the world market, ie, hand tools, mining drills, ball-bearings, turbines, pneumatic machinery, refrigerating equipment, machinery for pulp and paper industries, etc., sewing machines, machine tools, office machinery, high-voltage electric machinery, telephone equipment, cars and trucks, ships and

aeroplanes

Another important manufacturing sector is based on Sweden's forest resources. This sector includes saw-mills, plywood factories, joinery industries, pulp- and paper-mills, wallboard and particle board factories, accounting for about 20% of the total value of manufacturing. A fast increasing sector is the chemical industry, especially the petro-chemical branch. Minerals industries include production of building materials, decorative arts products of glass and china.

#### JUSTICE, RELIGION, EDUCATION AND WELFARE

Justice. The administration of justice is entirely independent of the Government. The Justitiekansler, or Attorney General (a royal appointment) and the Justitieombudsmän (Parliamentary Commissioners appointed by the Diet), exercise a check on the administration In 1968 a reform was carried through which meant that the offices of the former Justitieombudsman (Ombudsman for civil affairs) and the Militieombudsman (Ombudsman for military affairs) were turned into one sole institution with 3 Ombudsmen, each styled Justitieombudsman They exert a general supervision over all courts of law, the civil service, military laws and the military services. In 1984–85 they received altogether 3,329 cases; of these, 141 were instituted on their own initiative and 3,163 on complaints.

The Riksåklagaren (a royal appointment) is the chief public prosecutor.

The kingdom has a Supreme Court of Judicature and is divided into 6 Courts of Appeal districts (hovratter) and 97 district-court divisions (tingsrätter). There is also a Housing Appeal Court and 12 rent and tenancy tribunals.

Of the district courts 27 also serve as real estate courts and 6 as water rights courts.

These district courts (or courts of first instance) deal with both civil and criminal cases. Each member of the court has an individual vote and is legally responsible for the decision. In the voting, the majority rules. When the votes are evenly divided in a criminal case, the opinion implying the least severe sentence applies, and in cases where there is no opinion that could be considered the mildest, the Chair has the casting vote, as is also the case in family civil cases and matters; petty cases are tried by the judge alone. Civil cases are tried as a rule by 3 to 4 judges or in minor cases by 1 judge. Disputes of greater consequence relating to the Marriage Code or the Code relating to Parenthood and Guardianship are tried by a judge and a naimnd of 3-4 lay assessors. When cases concerning real estate are being tried the court consists of 2 qualified lawyers, 1 specialist on technical matters and 2 lay assessors.

Criminal cases are tried by a judge and a jury of 5 members (lay assessors) in felony cases, and of 3 members in misdemeanour cases. The cases in Courts of Appeal are generally tried by 4 or 5 judges, but the same cases, which are tried with a judge and a namnd in the first instance, are tried by 3 or 4 judges and a namnd of 2-3 members. In cases concerning real estate the court consists of a specialist on technical matters in place of one of the judges and in water-right cases of 3 or 4 judges and 1 or 2 specialists on technical water matters

Those with low incomes can receive free legal aid out of public funds. In criminal cases a suspected person has the right to a defence counsel, paid out of public funds

The Attorney-General (Justitiekanslern) and the Parliamentary Commissioner (Justitieombudsmannen) for the Judiciary and Civil Administration supervise the application in the public sector of acts of parliament and regulations. The Attorney-General is the Government's legal adviser and also the Public Prosecutor

The holders of the office of Parliamentary Commissioner are 4 in number

There were 75 penal and correctional institutions for offenders, with 4,616 male and 210 female inmates on 1 March 1985 (including offenders in remand prison) Besides, there were 622 children or young people registered for care in treatment and/or residential homes on 31 Dec 1984, admitted under the 'Care of Young Persons' Act

Religion. The overwhelming majority of the population belong to the Evangelical Lutheran Church, which is the established national church. In 1984 there were 13 bishoprics (Uppsala being the metropolitan see) and 2,566 parishes. The clergy are chiefly supported from the parishes and the proceeds of the church lands. The non-conformists mostly still adhere to the national church. The largest denominations, on 1 Jan 1984, were. Pentecost Movement, 100,523; The Mission Covenant Church of Sweden, 79,880, Salvation Army, 32,599; Swedish Evangelical Mission, 23,870, Swedish Baptist Church, 21,095, Orebro Missionary Society, 22,322, Swedish Alliance Missionary Society, 13,553; Holiness Mission, 6,010.

There were also 116,101 Roman Catholics (under a Bishop resident at Stockholm), about 35,000 Orthodox Catholics (1978) and about 15,000 Jews (1978)

Parliament and Convocation (Kyrkomotet) decided in 1958 to admit women to ordination as priests

Education. By the Swedish Higher Educational Act of 1977 a unified educational system was created by integrating institutions which had previously been administered separately. This new hogskola includes not only traditional university studies but also those of various former professional colleges as well as a number of study programmes offered earlier by the secondary school system. One of the goals of the 1977 university reform was to introduce an increased element of vocational training into Swedish higher education and to widen admission. A Certificate of Education (B Sc., M.Sc., U C etc.) is awarded on completion of a general study programme. This certificate states the number of courses taken as well as the points and grades obtained on each course in the study programme.

In autumn 1983 there were, in these new integrated institutions for higher education, hogskola, about 164,000 enrolled for undergraduate studies of whom 108,200 were distributed by sector as follows: Education for technical professions, 25,900; education for social work, economic and administrative professions, 29,500; education for medical and paramedical professions, 22,600; education for the teaching professions, 24,400; and education for information, communication and

cultural professions, 5,800. The number of students enrolled for post-graduate studies was 13,200.

In autumn term in the school year 1983–84 there were 647,000 pupils in primary education (grades 1–6 in compulsory comprehensive schools). Secondary education at the lower stage (grades 7–9 in compulsory comprehensive schools) comprised 328,800 pupils. In secondary education at the higher stage (the integrated upper secondary school), there were 275,300 pupils (excluding about 41,300 pupils in the 4-year technical tier regarded as third-level education). The folk high schools, 'people's colleges', had 14,700 pupils in courses of more than 15 weeks.

In municipal adult education there were 160,500 pupils (corresponding to a gross number of 355,000 participants) Basic education for adults had 18,000 pupils.

There are also special schools for pupils with visual and hearing handicaps (about 1983–84) and for those who are mentally retarded (about 12,700 pupils).

Social Welfare. The social security schemes are greatly expanding Supported by a referendum, the Diet in 1958 and 1959 decided that the national pensions should be increased successively until 1968 and supplementary pensions paid from 1963. These pensions are of invariable value. In 1969 the Diet decided that as from 1 July 1969 an increment to the basic pension was to be paid to persons without supplementary pensions, and this amount is to be successively increased in a 10-year period. The basic and supplementary pensions consist of old-age and family pensions, as well as pensions paid to the disabled. The financing of the supplementary system is based on the current-cost method

HISTORY. On 1 Aug 1291 the men of Uri, Schwyz and Unterwalden entered into a defensive league. In 1353 the league included 8 members and in 1513, 13 Various territories were acquired either by single cantons or by several in common, and in 1648 the league became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new Constitution, and out of the lands formerly allied or subject increased the number of cantons to 19 In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, France, Great Britain, Portugal, Prussia, Russia, Spain and Sweden, and the Federal Pact, which included 3 new cantons, was accepted by the Congress of Vienna In 1848 a new Constitution was passed The 22 cantons set up a Federal Government (consisting of a Federal Parliament and a Federal Council) and a Federal Tribunal This Constitution, in turn, was on 29 May 1874 superseded by the present Constitution. In a national referendum held in Sept 1978, 69 9% voted in favour of the establishment of a new canton, Jura, which was established on 1 Jan 1979

CONSTITUTION AND GOVERNMENT. Switzerland is a republic. The highest authority is vested in the electorate, i.e., all Swiss citizens of over 20. This electorate—besides electing its representatives to the Parliament—has the voting power on amendments to, or on the revision of, the Constitution It also takes decisions on laws and international treaties if requested by 30,000 voters or 8 cantons (facultative referendum), and it has the right of initiating constitutional amendments, the support required for such demands being 50,000 voters (popular initiative)

The Federal Government is supreme in matters of peace, war and treaties; it regulates the army, the railway, telecommunication systems, the coining of money, the issue and repayment of bank-notes and the weights and measures of the republic. It also legislates on matters of copyright, bankruptcy, patents, sanitary policy in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zurich and at Lausanne, 2 federal universities and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests and the construction of national highways and railways. By referendum of 13 Nov. 1898 it is also the authority in the entire spheres of common law. In 1957 the Federation was empowered to legislate on atomic energy matters and in 1961 on the construction of pipelines of petroleum and gas

National anthem. Trittst im Morgenrot daher (words by Leonard Widmer, 1808-68, tune by Alberik Zwyssig, 1808-54); adopted by the Federal Council in 1962

The legislative authority is vested in a parliament of 2 chambers, a *Standerat*, or Council of States, and a *Nationalrat*, or National Council.

The Standerat is composed of 46 members, chosen and paid by the 23 cantons of

the Confederation, 2 for each canton. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Ausser-Rhoden and Inner-Rhoden, and Unterwalden into Obwalden and Nidwalden Each of these 'half-cantons' sends I member to the State Council.

The Nationalrat—after the referendum taken on 4 Nov. 1962—consists of 200 National Councillors, directly elected for 4 years, in proportion to the population of the cantons, with the proviso that each canton or half-canton is represented by at least 1 member. The members are paid from federal funds at the rate of 150 francs for each day during the session and a nominal sum of 10,000 francs per annum.

In 1980 the 200 members were distributed among the cantons as follows

A general election takes place by ballot every 4 years. Every citizen of the republic who has entered on his 20th year is entitled to a vote, and any voter, not a clergy-man, may be elected a deputy. Laws passed by both chambers may be submitted to direct popular vote, when 50,000 citizens or 8 cantons demand it, the vote can be only 'Yes' or 'No' This principle, called the *referendum*, is frequently acted on

Women's suffrage, although advocated by the Federal Council and the Federal Assembly, was on 1 Feb 1959 rejected, but in a subsequent referendum, held on 7 Feb 1971, women's suffrage was carried.

The chief executive authority is deputed to the *Bundesrat*, or Federal Council, consisting of 7 members, elected from 7 different cantons for 4 years by the *Vereinigte Bundesversammlung*, i.e., joint sessions of both chambers. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Federal Council (called President of the Confederation) and the Vice-President are the first magistrates of the Confederation Both are elected by the Federal Assembly for 1 calendar year and are not immediately re-eligible to the same offices The Vice-President, however, may be, and usually is, elected to succeed the outgoing President

President of the Confederation for 1986 Alphons Egli.

The 7 members of the Federal Council—each of whom has a salary of 203,000 francs per annum, while the President has 215,000 francs—act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities

The Federal Council was composed as follows in 1986.

Local Government' Each of the cantons and demi-cantons is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution, all cantonal governments, though different in organization (membership varies from 5 to 11, and terms of office from 1 to 5 years), are based on the principle

of sovereignty of the people

In all cantons a body chosen by universal suffrage, usually called der Grosse Rat, or Kanionsrat, exercises the functions of a parliament. In all the cantonal constitutions, however, except those of the cantons which have a Landsgemeinde, the referendum has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revisions of the Constitution, must be submitted to the popular vote In Appenzell, Glarus and Unterwalden the people exercise their powers direct in the Landsgemeinde, i.e., the assembly in the open air of all male citizens of full age. In all the cantons the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initia*tive exists only for constitutional affairs. In most cantons there are districts (1mtsbezirke) consisting of a number of communes grouped together, each district having a Prefect (Regierungs statthalter) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials

**DEFENCE.** There are fortifications in all entrances to the Alps and on the important passes crossing the Alps and the Jura Large-scale destructions of bridges, tunnels and defiles are prepared for an emergency

Army. Switzerland depends for defence upon a national militia. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 50th year for soldiers and of the 55th year for officers. The first 12 years are spent in the first line, called the Auszug, or Élite, the next 10 in the Landwehr and 8 in the Landsturm. The unarmed Hilfsdienst comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 118 days for infantry, engineers, artillery, etc. The subsequent trainings, called 'repetition courses', are 20 days annually; but after going through 8 courses further attendance is excused for all under the rank of sergeant. The Landwehr men are called up for training courses of 13 days every 2 years, and the Landsturm men have to undergo a refresher course of 13 days.

The Army is divided into 3 field corps each of 1 armoured and 2 infantry divisions, 11 independent frontier brigades, 3 mountain divisions, and independent

redoubt-, fortress- and territorial-brigades, organized in 4 army corps Strength on mobilization: 580,000, and 400,000 reserves

The administration of the Swiss Army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments

In peace-time the Swiss Army has no general, only in time of war the Federal

Assembly in joint session of both Houses appoints a general.

The Swiss infantry are armed with the Swiss automatic rifle and with machineguns, bazookas and mortars. The field artillery is armed with a Q F. shielded 10.5 Bofors and field howitzers of 10.5 cm calibre. The heavy artillery is armed with guns of 10.5 cm and howitzers of 15 cm calibre. The armoured troops are equipped with the light French AMX, the British Centurion and a modern Swiss tank

Justice. The judicial power is exercised in the name of the King, by (a) courts of first instance, (b) the court of appeal (Uthorn) and (c) the Supreme Court (Dika). The King appoints, transfers and dismisses judges, who are independent in conducting trials and giving judgment in accordance with the law

Courts of first instance are subdivided into 20 magistrates' courts (Kwaeng) with limited civil and minor criminal jurisdiction, 85 provincial courts (Changwad) with unlimited civil and criminal jurisdiction; the criminal and civil courts with exclusive jurisdiction in Bangkok, the central juvenile courts for persons under 18 years of age in Bangkok.

The court of appeal exercises appellate jurisdiction in civil and criminal cases from all courts of first instance. From it appeals lie to Dika Court on any point of law and, in certain cases, on questions of fact.

The Supreme Court is the supreme tribunal of the land. Besides its normal appellate jurisdiction in civil and criminal matters, it has semi-original jurisdiction over general election petitions. HISTORY. The Kingdom of Tonga attained unity under Taufa'ahau Tupou (George I) who became ruler of his native Ha'apai in 1820, of Vava'u in 1833 and of Tongatapu in 1845 By 1860 the kingdom had become converted to Christianity (George himself having been baptized in 1831) In 1862 the king granted freedom to the people from arbitrary rule of minor chiefs and gave them the right to the allocation of land for their own needs. These institutional changes, together with the establishment of a parliament of chiefs, paved the way towards the democratic constitution under which the kingdom is now governed, and provided a background of stability against which Tonga was able to develop her agricultural economy

The kingdom continued up to 1899 to be a neutral region in accordance with the Declaration of Berlin, 6 April 1886 By the Anglo-German Agreement of 14 Nov 1899 subsequently accepted by the USA, the Tonga Islands were left under the Pro-

tectorate of Great Britain

A protectorate was proclaimed on 18 May 1900, and a British Agent and Consul appointed. On 4 June 1970 the UK Government ceased to have any responsibility for the external relations of Tonga

The Tongatapu group was discovered by Tasman in 1643

AREA AND POPULATION. The kingdom consists of some 169 islands and islets with a total area of 289 sq miles (748 sq km, including inland waters), and lies between 15° and 23° 30′ S. lat and 173° and 177° W long, its western boundary being the eastern boundary of Fiji The islands are split up into the following groups reading from north to south. The Niuas, Vava'u, Ha'apai, Kotu, Nomuka, Otu Tolu and Tongatapu The 3 main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north

The capital is Nuku'alofa on Tongatapu (18,312)

The islands to the east, being mostly of limestone formation, are low lying and with but a few exceptions seldom exceed 100 ft above sea-level. The islands to the west are of a volcanic nature, approximately 11, average between 350 and 3,433 ft in height. After a violent volcanic eruption in Sept. 1946 on the island of Niuafo'ou (Tin Can Island to philatelists, so named because of the method that was used of collecting and delivering mail) the 1,300 inhabitants were evacuated, most of them to Tongatapu and 'Eua, but more than 600 have returned since 1958

Census population (1976) 90,085 (males, 46,036); estimate, 1983, 98,750.

CLIMATE. Generally a healthy climate, though Jan to March is hot and humid, with temperatures of 90°F (32 2°C) Rainfall amounts are comparatively high, being greatest from Dec. to March Nuku'alofa. Jan. 78°F (25.6°C), July 70°F (21 1°C). Annual rainfall 63" (1,576 mm). Vava'u Jan. 80°F (26 7°C), July 73°F (22 8°C). Annual rainfall 110" (2,750 mm).

CONSTITUTION AND GOVERNMENT. The present Constitution is almost identical with that granted in 1875 by King George Tupou I There is a Privy Council, Cabinet, Legislative Assembly and Judiciary The legislative assembly, which meets annually, is composed of 7 nobles elected by their peers, 7 elected representatives of the people and the Privy Councillors (numbering 8), the King appoints one of the 7 nobles to be the Speaker. The elections are held triennially In 1960, women voted for the first time

King HM King Taufa'ahau Tupou IV, GCVO, GCMG, KBE, born 4 July 1918, succeeded on 16 Dec 1965 on the death of his mother, Queen Salote Tupou III, his coronation took place on 4 July 1967
